The CARNAGE of
Enviro-Maniac-Basterds
is devalorizing the
professional labour force
of the Green Space Industry
into a group of mere
Cotton-Pickers !

Overview from an Independent Perspective

Carnage caused by Enviro–Maniac lies

THERE ARE NO VALID ALTERNATIVES TO CONVENTIONAL PEST CONTROL PRODUCTS !

Government Officials, the Green Space Industry, and the public were assured by Enviro–Maniac–Activists that so–called safe and effective Green Alternatives were already available to replace conventional pest control products. [Wrong !]

The Green Alternatives are BOGUS, LESS EFFECTIVE, and STUNNINGLY EXPENSIVE !

VIRTUALLY ALL Green Alternatives are BOGUS, and have negatives ranging from almost TOTAL INEFFECTIVENESS except under very specific circumstances, to a question about their TOXICITY. The Enviro–Maniacs did not know what they were talking about.

Carnage on Green Space workers

Without the use of conventional pest control products, many jurisdictions have had to resort to the back–breaking and agonizing job of WEED PULLING BY HAND !

The CARNAGE of Enviro–Maniac–Basterds is converting the professional labour force of the Green Space Industry into a group of mere COTTON–PICKERS ! Without effective weed control products, they are required to crawl on lawns on their hands and knees pulling weeds manually.

Moreover, municipalities CANNOT afford the high cost manual labour required for weed pulling. Consequently, Government Officials enlist the help of UNRELIABLE resident VOLUNTEERS, most of whom are women, elderly, and unemployed.

Carnage in municipal Green Spaces

Consequently, the prohibition of pest control products has RUINED municipal Green Spaces in both Canada and America ! Because of the prohibition imposed in many jurisdictions, Green Spaces are over–run by invasive weeds, and LOOK LIKE GARBAGE DUMPS !

The MUNICIPAL CARNAGE of implementing and enforcing NEEDLESS, SENSELESS, and MALICIOUS prohibition of pest control products is costing from 200,000 dollars to 1,000,000 dollars PER YEAR for EACH municipality !

So far, the MUNICIPAL CARNAGE of PROHIBITION–ENVIRO–TYRANNY across Canada has cost the public well over 30,000,000 dollars.

Carnage in Surrey, British Columbia, Canada

For municipalities like Surrey, British Columbia, the cost of prohibition city has been estimated at 1,000,000 dollars ANNUALLY to manage weeds without the use of chemicals.

Overview from an Independent Perspective

Carnage in Lawrence, Kansas, U.S.A.

In cities like Lawrence, Kansas, Government Officials are now reverting back to conventional pest control since residents are no longer interested to volunteer their time in a losing battle against weeds.

Although the parks and recreation department of Lawrence, Kansas, showed it spends less than 10,000 dollars per year for pesticides, Enviro-Maniac-Activists had lobbied the city's commissioners to convert all of the city's 52 parks to pesticide-free maintenance by 2009. However, a cost analysis by the Parks and Recreation staff estimated that the city would have to spend 213,000 dollars for equipment; 116,000 dollars annually for staff; and 95,000 dollars annually for materials to achieve that goal.

Carnage in Portland, Oregon, U.S.A.

In 2004, the City of Portland capitulated under pressure from the Environmental-Terror-Organization called Northwest Coalition For Alternatives To Pesticides (N.C.A.P.). Both Portland and N.C.A.P. recognized that so-called Green Alternatives were bogus, and almost totally ineffective. The only solutions were the huge cost in paid labour and volunteer work as back-breaking weed-pickers, and potentially hazardous flame-throwers.

Ultimately, the City of Portland was only able to afford Pesticide-Free Parks through the use of Enviro-Maniac-Volunteers. Originally, 244 volunteers put in a combined 1,374 hours removing weeds at three parks. The availability of Enviro-Maniac-Volunteers was UNRELIABLE, and SEVERELY DECLINED over a three year period. In the first year, turn-out was low, but peaked 60 hours for one work party. By the third year, the most attended was a mere 12 hours.

When using conventional, scientifically safe, and effective weed control products, Enviro-Maniacs at N.C.A.P. estimated that an average five-acre neighbourhood park in Portland cost 371 dollars per year to keep the weeds out.

Pesticide-Free Parks in the City of Portland, on the other hand, came with the exorbitant cost of 3,621 dollars in annual maintenance costs, and 9,455 dollars in start-up costs for each new park. High costs were required to pay parks department employees to haul weeds collected by volunteers, and to inspect the parks to make sure weeds were under control. Another issue was the extraneous carbon emissions from cars used by volunteers driving to the parks to do the weeding.

Carnage is caused by incompetent Enviro-Maniacs

It is abundantly evident, and not surprising, that NOT A SINGLE Environmental-Maniac-Activist has ANY recognized expertise, training or background in matters concerning pest control products or the management of Green Spaces ! The opinions of Enviro-Maniac-Activists in matters concerning turf management and weed control are TOTALLY VALUELESS and UTTERLY WORTHLESS.

ENVIRO-MANIACS DO NOT KNOW WHAT THEY ARE TALKING ABOUT !

The **DESTRUCTION** of the Green Space Industry by Environmental-Terrorists

*Parks staff are on their hands and knees,
manually weeding just like cotton-pickers,
thanks to the carnage of enviro-terrorists.*

Pesticide-free parks pose challenges

May 14th, 2010

Vickie Aldous

Ashland Daily Tidings

[BACKGROUND INFORMATION — Lincoln City is located in Lincoln County, in the State of Oregon, United States. The population is approximately 7,500.]

Lincoln City's move three years ago [2007] to ELIMINATE PESTICIDES in its parks was going smoothly until this spring.

That's when people noticed a SURGE OF WEED GROWTH because the lingering effects of herbicides had worn off [?!?!], said Lincoln City Parks and Recreation Department Director Ron Ploger.

According to Ploger —

*<< This year during the months of February, March and April,
we spent 260 staff hours with people ON THEIR HANDS AND
KNEES WEEDING. >>*

Enviro carnage

The DESTRUCTION of the Green Space Industry by Environmental-Terrorists

Heavy weed growth occurs in the third year after going pesticide-free.

Back when the department was applying chemical pesticides, parks workers would spend 60 hours [in comparison to 260 hours when pesticide-free] during those three months treating weeds, Ploger said.

The coastal town's experience in going pesticide-free may offer lessons for [other municipalities].

Lincoln City Parks and Recreation Department Director Ron Ploger said this spring's heavy growth of weeds DID NOT COME AS A SURPRISE.

Based on his past experiences, a consultant Lincoln City hired to help with a parks master plan WARNED OF HEAVY WEED GROWTH IN THE THIRD YEAR of going pesticide-free, Ploger said.

Ploger said his parks department HAS NOT saved much money from not purchasing chemicals, since they are relatively inexpensive.

The department added an extra half-time worker to help deal with weeds, but STILL CAN'T KEEP UP.

It has had to NEGLECT TASKS ranging from manicuring trees to pressure-washing and painting trash cans, he said.

According to Ploger —

| << *Those things have had to take a back seat to weeding.* >>

Enviro carnage

The DESTRUCTION of the Green Space Industry by Environmental-Terrorists

*Green alternatives like vinegar acid
are MORE TOXIC and MORE DANGEROUS.
They can BURN the eyes and skin of workers,
so they have to wear protective masks and suits.*

Ploger compared weeding to painting the Golden Gate Bridge. It has to be done CONSTANTLY, and the work NEVER ENDS.

He said the Lincoln City parks department probably will change landscaping beds from designs with clumps of single plants to designs with spreading ground cover to prevent weed growth.

The department has had MARGINAL SUCCESS using WINE VINEGAR ACID, a by-product of the wine industry, to kill weeds before they grow. The ACID CAN BURN THE EYES AND SKIN OF WORKERS, so they have to WEAR PROTECTIVE MASKS AND SUITS, Ploger said.

According to Ploger —

<< It's a tough one. People don't like the sound of using chemicals, but some studies have found that organic pesticides are MORE DANGEROUS. They think they're safer because they're organic, but some organic-based pesticides are MORE TOXIC to humans and the environment than regular pesticides. >>

Corn meal gluten was supposed to prevent weed re-growth, but nitrogen in the gluten actually promoted weeds, the department found.

Enviro carnage

The DESTRUCTION of the Green Space Industry by Environmental-Terrorists

*Three years after going pesticide-free,
pesticides definitely need to be used
again in weed-infested parks.*

Lincoln City HAS NOT tried to rely on volunteers to do manual weeding because volunteers tend to be enthusiastic at first, but then the work eventually shifts back to staff, Ploger said.

In Ashland [another municipality in Oregon], [Enviro-Maniac] residents who are advocating for pesticide-free parks have said they will help with manual weeding. A local Soroptimist Club, a service group for women, agreed in April to adopt Garden Way Park so that it can become pesticide-free.

[Soroptimist is a world-wide Enviro-Maniac feminist organization.]

Parks staff members WARNED Lincoln City officials that some areas might not look as nice, or might suffer from pests, but parks board and City Council members were very supportive, according to Ploger.

The parks department did RESERVE THE RIGHT TO USE PESTICIDES ON INVASIVE PLANTS such as Japanese Knotweed, which can grow back from even a scrap of root and ruin wetlands, he said.

Lincoln City's master plan consultant predicted the parks department would re-evaluate its decision to go pesticide-free three years after making the change, Ploger said. That prediction also has proven accurate.

Ploger said parks staff members plan to return to Lincoln City officials to tell them THE PARKS DEPARTMENT IS GOING TO START USING PESTICIDES AGAIN in some areas.

We must defend the industry, whatever the cost may be !

N

Force Of Nature is a report from National Organization Responding Against Huje that seek to harm the Green Space Industry (NORAHG). It is a series of e-newsletters destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY.

O

Huje is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing that families are in some NON-EXISTENT danger with conventional pest control products. Huje also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS prohibition of FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE conventional pest control products.

All information, excerpts, and pictures contained in this document were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release. The events, characters, companies, and organizations, depicted in this document are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. Don't thank us. It's a public service. And we are glad to do it.

R

Force Of Nature is the brainchild of William H. Gathercole and his entourage. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in public affairs, workplace safety, and environmental compliance. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority. Mr. Gathercole is now retired from Force Of Nature, although his name continues to appear as the founder. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status, that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of Environmental Terror for the entire Modern Green Space Industry across Canada. Mr. Gathercole's involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec. Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair.

A

Mr. Gathercole and his entourage have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. Through Force Of Nature, Enviro Maniac Activist Huje are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry. Their pretentious prohibitionist rants have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd Huje is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.
