

The background of the entire page is a dark, apocalyptic illustration. It depicts a city skyline with smoke and debris rising from the ground, suggesting a scene of destruction or environmental collapse. In the foreground, on the right side, there is a silhouette of a woman with long hair, looking towards the viewer. The overall color palette is dark, with shades of black, grey, and a hint of greenish-blue smoke.

The National Annihilation of the Modern Green Space Industry!

Suzuki's National Alliance Of Terrorists Demand A Needless & Wasteful Review Of Pest Control Products, Including 2,4-D

Three members of Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS are DEMANDING that the federal government to REVIEW a LIST of 30 pest control products, including, not surprisingly, 2,4-D Herbicide.

They are using the PRETEXT that they are BANNED BY OTHER COUNTRIES.

In fact, many of these products may simply NOT BE REGISTERED by the manufacturer because THE MARKET SIZE OR PRODUCT USE RESTRICTIONS DO NOT WARRANT THE COST OF MAINTAINING REGISTRATIONS.

They are also using the PRETEXT that they pose risks to the environment and to people's health.

In fact, NO ONE within Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS has ANY background, training, or experience in matters concerning pest control products.

They are NOT COMPETENT to make ANY assessments.

The organizations are — DAVID SUZUKI FOUNDATION, ECOJUSTICE, and EQUITERRE.

Ecojustice, acting on behalf of the David Suzuki Foundation and Equiterre, have FILED A REQUEST FOR A SPECIAL REVIEW by Health Minister Leona Aglukkaq on the products.

The National Prohibition Against 2,4-D Herbicide !

Clearly, the goal is to WEAR DOWN Health Canada and WASTE its limited resources on a NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY TO NATIONALLY PROHIBIT PEST CONTROL PRODUCTS.

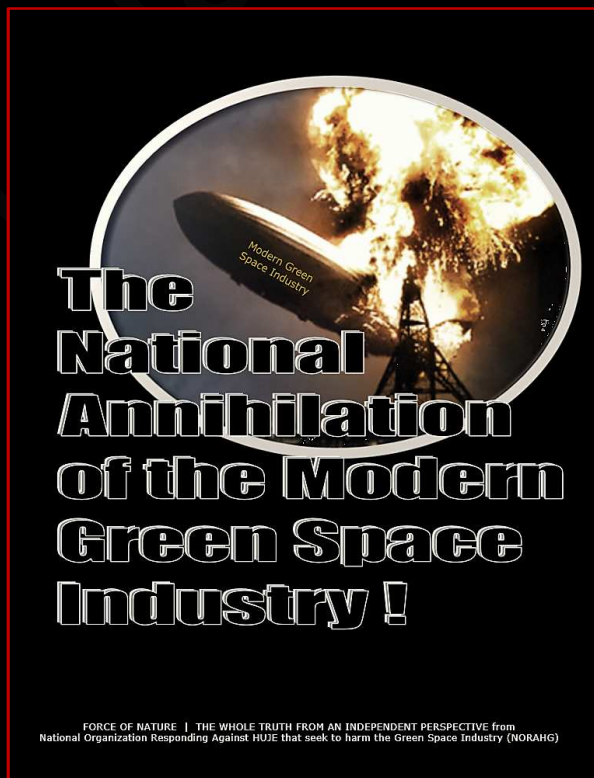

The request for a review was filed under section 17 the Pest Control Products Act, which allows any person to request a special review « *of the registration of a pest control product by making a request to the minister* » if that product has been SUPPOSEDLY BANNED by nations who are members of Organisation for Economic Co-Operation and Development (OECD).

Not surprisingly, 2,4-D HERBICIDE is NUMBER 1 on the list.

2,4-D is an EXTREMELY IMPORTANT INGREDIENT used for the control of broad-leaved weeds in turf — A NATIONAL 2,4-D BAN LEAD TO THE WOULD ANNIHILATE THE GREEN SPACE INDUSTRY.

Scientific research shows, as reported through Health Canada's VAST TOXICOLOGY DATABASE, that NO HARM WILL OCCUR when pest control products like 2,4-D are used according to label directions.

The toxicity of 2,4-D is NOT VERY HIGH when compared to TABLE SALT.

The National ANNIHILATION of the Modern Green Space Industry !

Despite the opposite claims of activists, NO REGULATORY BODY IN THE WORLD CLASSIFIES 2,4-D AS A HUMAN CARCINOGEN.

2,4-D has been used for the control of broad-leaved weeds in the Urban Landscape SINCE 1946.

2,4-D has a 65-YEAR UNBLEMISHED SAFETY RECORD regarding long-term risk to health.

2,4-D is SCIENTIFICALLY SAFE and will CAUSE NO HARM.

To evaluate the full body of evidence, please take a look at The Industry Task Force II On 2,4-D Research Data.

Nonetheless, according to NON-EXPERT Suzuki/Ecojustice/Equiterre —

The herbicide 2,4 D has been banned in NORWAY since January, 2000 due to reasons pertaining to human health and the environment.

[SO WHAT ?]

The reasons for the final regulatory action were relevant to : human health and the environment.

Summary of known hazards and risks to human health : 2.4-D is moderate acute toxic and irritating to eyes, but these characteristics is comparable to the alternative preparations or active substances. [WRONG !]

In addition there are some studies indicating a risk of cancer in soft tissue and lymph, but the

The National Prohibition Against 2,4-D Herbicide !

evidence isn't strong enough to label the product for risk of cancer. [WRONG !]

2,4-D is banned in some countries. [?!?!]

According to The Industry Task Force II On 2,4-D Research Data, this is a MYTH !

Here are some facts —

2,4-D is registered for use in over 100 countries.

The most recent country to approve its continued sale and use was Sweden in 2011.

In some countries, the market size or product use restrictions do not warrant the cost of maintaining registrations.

The European Commission, conducted a major re-evaluation of 2,4-D which was completed in October 2001, concluding that 2,4-D was acceptable for continued registration in all European member countries.

October 15th, 2012

Postmedia News

Selected and Adapted Excerpts

Background Information from an Independent Perspective

Suzuki's National Alliance Of Enviro-Terrorists

On November 16th, 2009, David Suzuki Foundation announced its NATIONAL ALLIANCE OF ENVIRO-TERRORISTS.

Twelve national organizations representing Enviro-Lunatic and Anti-Pesticide Health Care Workers joined David Suzuki Foundation, with the following mission —

That government at all levels understand and address links between health and the environment and incorporate these links into policy decisions through legislative and budgetary actions.

Many are Anti-Golf, Anti-Pesticide, and Environmental-Terrorist Organizations.

Many are listed among CANADA'S PROMINENT ANTI-PESTICIDE & ENVIRONMENTAL-TERRORIST ORGANIZATIONS.

Most are also FUND-RAISING, PROFIT-SEEKING, and LOBBYING organizations.

They are NOT a science, research, or health organizations — in other words, they KNOW NOTHING ABOUT THE ENVIRONMENT, and they KNOW NOTHING ABOUT PESTICIDES.

Several of these Environmental-Terrorist Organizations are presently UNDER INVESTIGATION FOR CHARITY FRAUD AND CONSPIRACY.

The Government of Canada has allocated 8 million dollars for the Canada Revenue Agency to ensure that NO MORE THAN 10 PER CENT OF THEIR FUNDS ARE BEING SPENT ON ADVOCACY.

Suzuki's National Alliance Will ANNIHILATE The Green Space Industry

Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS, which includes Ecojustice, represents one of THE GREATEST THREATS to the future of the Modern Green Space Industry !

The OBJECTIVES of Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS is to COERCE, INTIMIDATE, and INFLUENCE government at all levels with the CONCOCTION of so-called LINKS between health and the environment and incorporate these links into policy decisions through legislative [i.e. PROHIBITION] and budgetary actions.

Background Information from an Independent Perspective

If successful, Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS will become the INSTRUMENT OF NATIONAL ANNIHILATION against the Modern Canadian Green Space Industry by seeking to IMPOSE a NATIONAL PROHIBITION against conventional pest control products.

Suzuki's Quebec Alliance Of Enviro-Terrorists With Ecojustice

In 2009, Suzuki's QUEBEC ALLIANCE OF ENVIRO-TERRORISTS was formed with SEVEN Anti-Pesticide Organizations to CHALLENGE the threat against the Quebec PROHIBITION of pest control products.

This alliance was operated by LESS THAN A DOZEN Enviro-Lunatic-Activists, including David Suzuki Foundation and Ecojustice Canada.

The alliance called upon the Government of Canada to vigorously defend Quebec's PROHIBITION against the use of pest control products in the Urban Landscape.

On May 25th, 2011, the AGREEMENT reached between Dow AgroSciences and the Government of Canada concluded that ...

- Pest control products are SCIENTIFICALLY SAFE
- PROHIBITIONS are IRREFUTABLY INVALIDATED

Ecojustice CONSPIRES Towards A NATIONAL BAN

Another member of Suzuki's ALLIANCE OF ENVIRO-TERRORISTS CONSPIRES TO IMPOSE NATIONAL Anti-Pesticide PROHIBITION.

According to a Media Release in May 2010 from the Wretched Ecojustice Canada —

Pesticides banned in Ontario.

Last spring, Ontario enacted a powerful pesticide ban — a step made possible by Ecojustice's defence of municipal pesticide bylaws, including our 2001 Supreme Court win that protected Hudson, Quebec's right to ban toxics.

Background Information from an Independent Perspective

Ontario has enacted the most comprehensive pesticide ban in North America with over 200 pesticide products banned for sale and use.

*Staff lawyer Justin Duncan continues to work on this file, seeking provincial bans in New Brunswick, Nova Scotia, British Columbia and Alberta, with **A GOAL TO BRING FORWARD A NATIONAL BAN** in the coming years.*

Ecojustice Canada is a Wretched Multi-Million-Dollar Environmental-Terror-Organization that uses litigation and subversive lobbying to advance the cravings of a power-hungry, unscrupulous, depraved-enviro-maniac-intelligentsia.

Ecojustice is listed among CANADA'S PROMINENT ANTI-PESTICIDE & ENVIRONMENTAL-TERRORIST ORGANIZATIONS.

In 2001, on behalf of the Federation of Canadian Municipalities, World Wildlife Fund of Canada, and Nature-Action Quebec, Wretched Ecojustice provided expertise in the case supporting the CONSPIRACY to PROHIBIT pest control products in the Town of Hudson, Quebec.

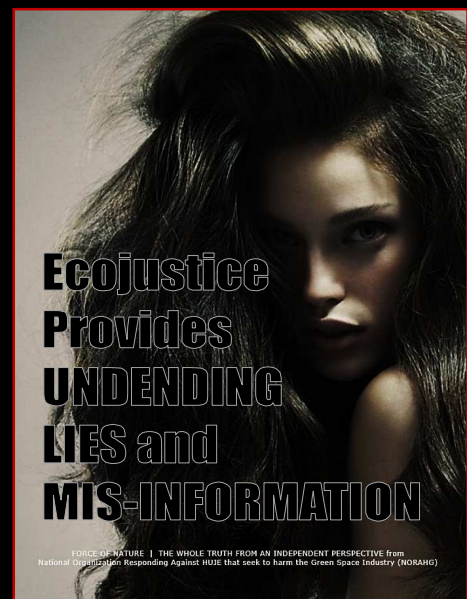

Additionally, in 2008, Wretched Ecojustice financially supported the PUBLIC AFFAIRS SHIELD ORGANIZATION called Coalition For Pesticide Reform Ontario.

This coalition was created to subvert public policy regarding the Cosmetic Pesticides Ban Act which now prohibits pest control products in Ontario.

In October 2012, Ecojustice released a document entitled BACKGROUND: Busting The Facts About Cosmetic Pesticide Bans.

The document was FILLED WITH UNENDING LIES AND MIS-INFORMATION.

Ecojustice drafted this document despite the fact that PESTICIDE BANS ARE NEEDLESS, SENSELESS, AND MALICIOUS, and DO NOTHING TO PROTECTING HEALTH — and particularly DO NOTHING TO PROTECT THE HEALTH OF CHILDREN and DO NOTHING TO STOP CANCER.

Background Information from an Independent Perspective

Equiterre (a.k.a. David Suzuki Foundation)

Equiterre is an Environmental-Terrorist and Anti-Pesticide Organization that is VERY CLOSELY ALLIED WITH DAVID SUZUKI FOUNDATION.

In 1992-1993, Equiterre was established as an AMBASSADOR AND PUBLIC POLICY SHIELD ORGANIZATION FOR DAVID SUZUKI FOUNDATION IN THE PROVINCE OF QUEBEC.

SUZUKI and EQUITERRE are basically ONE-IN-THE-SAME GROUP that even operate out of the SAME LOCATION in Montreal.

In 2001, when Anti-Pesticide PROHIBITION in the Town of Hudson, Quebec, was challenged before The Supreme Court Of Canada, Ecojustice Canada provided legal counsel for the NATURE-ACTION QUEBEC (an early version of EQUITERRE), as well as Federation of Canadian Municipalities (managed by some of the same people that now run New Democratic Party of Canada (NDP)), and World Wildlife Fund (WWF).

EQUITERRE's office is located in Montreal, Quebec, in the Centre for Sustainable Development, which officially opened its doors on October 6th, 2011, and is home to EIGHT Environmental and Social Terrorist Organizations, including EQUITERRE, and co-incidentally, DAVID SUZUKI FOUNDATION.

The centre is COLLECTIVELY OWNED by the organizations that occupy the building, including the Quebec headquarters for the David Suzuki Foundation and Amnesty International.

2,4-D Prohibited By Other Nations

- Response By Health Canada
 - September 17th, 2004
-

In Canada, pest control products, or pesticides, are regulated by Health Canada under the Pest Control Products Act, and are among the most stringently regulated substances in Canada.

The Pest Management Regulatory Agency (PMRA) is the branch of Health Canada that administers the Act on behalf of the Minister Of Health.

The primary objective of the PMRA is to prevent unacceptable risks to people and the environment from the use of pest control products.

On September 17th, 2004, the Pest Management Regulatory Agency of Health Canada (PMRA) responded to the issue of nation prohibition with following statement —

Background Information from an Independent Perspective

Federal re-evaluation of pesticide 2,4-D.

2,4-D is no longer used in Sweden or Norway and its use is severely restricted in Denmark.

[HOWEVER, IN 2011, SWEDEN DID APPROVE THE CONTINUED SALE AND USE OF 2,4-D.]

Environmental effects are cited as the primary reason for these actions as 2,4-D has the potential to enter groundwater, the primary source of drinking water in these countries.

However, subsequent to these actions, the European Commission, upon completion of their re-evaluation of 2,4-D on October 1, 2001, concluded that it was acceptable for continued use the European Union, of which both Sweden and Denmark are members.

As part of the re-evaluation of 2,4-D, the PMRA has compiled all available drinking water data from various regions and sources across Canada.

These data indicate that the levels in drinking water do not pose unacceptable risks for the Canadian population.

It is important to recognize that of the many studies published, some report associations between adverse health effects and 2,4-D exposure, while many others report a lack of association.

As most of these papers acknowledge, epidemiology studies on their own are difficult to interpret because biases and confounding factors often preclude any convincing link between specific pesticide exposures and effects.

For example, influences from other chemicals and the physical environment encountered at the same time as pesticide exposures and recall bias from the individuals examined are two factors that can strongly influence the study result.

Background Information from an Independent Perspective

Without an actual exposure calculation, it is difficult to assess whether pesticides could have been responsible for an adverse health outcome.

This is why the PMRA also relies on the more scientifically exact method of quantitatively estimating risk by comparing exposures to the results of toxicity studies in laboratory animals.

The proprietary studies used are conducted to internationally accepted standards and include toxicity studies done on a number of laboratory animal species for comparative purposes, as well as studies of exposure from all routes and methods of exposure.

Safety factors (typically 100 to 1000 fold) are built into the assessment to account for different sensitivities between humans and experimental animals and among humans (age, gender and individual sensitivities to pesticides).

In general, this is the same approach that is currently utilized by the various international pesticide regulatory authorities including the US EPA and other OECD countries.

2,4-D Prohibited By Other Nations

— The Industry Task Force II On 2,4-D Research Data

2,4-D is banned in some countries. [?!?!]

According to The Industry Task Force II On 2,4-D Research Data, this is a MYTH !

Here are some facts —

2,4-D is registered for use in over 100 countries.

Background Information from an Independent Perspective

The most recent country to approve its continued sale and use was Sweden in 2011.

In some countries, the market size or product use restrictions do not warrant the cost of maintaining registrations.

The European Commission, conducted a major re-evaluation of 2,4-D which was completed in October 2001, concluding that 2,4-D was acceptable for continued registration in all European member countries.

Measuring the Level of Toxicity

In order to prove that 2,4-D is SAFE, its TRUE LEVEL OF TOXICITY can be measured in the laboratory.

In toxicology, the Median Lethal Dose, LD₅₀ (abbreviation for the « *Lethal Dose, 50 per cent* »), is a value that represents the dose that is fatal for 50 per cent of an experimental group of laboratory animals, in most cases rats.

THE HIGHER THE LD₅₀ VALUE, THE LEAST TOXIC THE PRODUCT.

Comparative Examples

The LEVEL OF TOXICITY has been measured as ACUTE ORAL TOXICITY (LD₅₀, rat) for so-called green alternatives, conventional pest control products that contain 2,4-D, as well as household items.

All information concerning green and conventional pest control products was obtained from material safety data sheets.

Overall, the measurements have indicated that most green alternatives and household items are NOT SAFER when compared to conventional pest control products.

THE LOWER THE LD₅₀ VALUE, THE MORE TOXIC THE PRODUCT.

Background Information from an Independent Perspective

Relatively Harmless (LD_{50} 15000 +)

29700	sucrose	Table Sugar	edible food additive
-------	---------	-------------	----------------------

Practically Non-Toxic (LD_{50} 5000-15000)

11900	ascorbic acid	Vitamin C	edible nutrient
7060	ethyl alcohol	Ethanol	edible beverage constituent
5000 +	ferric phosphate	Snail and Slug Bait	green alternative molluscicide
5000 +	FeHEDTA iron	Fiesta	green alternative herbicide
5000 +	2,4-D, mecoprop, dicamba	Killex	conventional herbicide

Slightly Toxic (LD_{50} 500-5000)

4220	sodium bicarbonate	Baking Soda	household product
3000	sodium chloride	Table Salt	edible food additive
1994	acetaminophen	Tylenol	analgesic

Moderately Toxic (LD_{50} 50-500)

330	hydrogen peroxide	ZeroTol	green alternative fungicide
200	acetylsalicylic acid	Aspirin	analgesic

Background Information from an Independent Perspective

Canadian Cancer Society

Even Canadian Cancer Society has STATED REPEATEDLY that scientific research does NOT provide a conclusive link between pest control products and cancer.

Lunatic Logic

Anti-Pesticide LUNATIC-LOGIC dictates that if a chemical can be prohibited in Norway, why can't it be prohibited in Canada ???

Anti-Pesticide Lunatics will argue that these nations are so-called innovative world leaders.

If they can do it, why can't Canada ?

If a chemical like 2,4-D can be restricted in Norway, why can't Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS simply move to these wonderful and more advanced countries ?

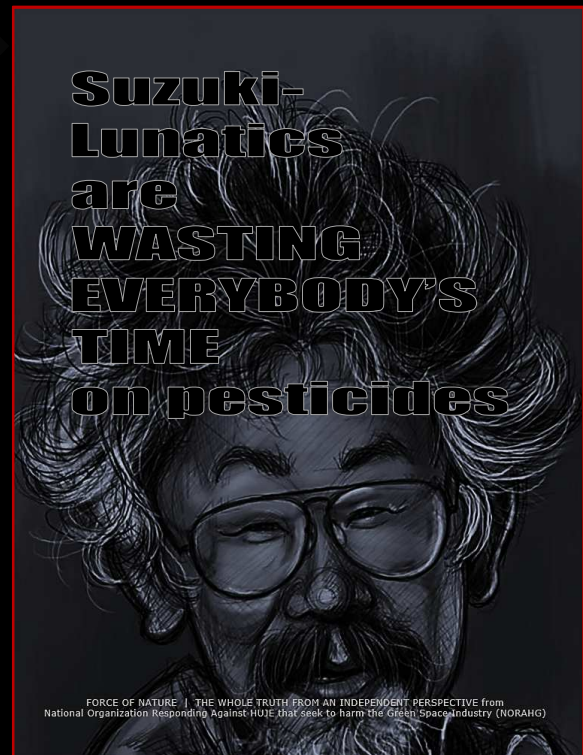

If scientific research does NOT provide a conclusive link between pest control products and cancer, why are Suzuki-Lunatics WASTING EVERYBODY'S TIME on the issue of pest control products ?

Suzuki-Lunatics are RIDICULOUSLY IMPLYING that their NON-EXPERT ASSESSMENT concerning pest control products is somehow being withheld from Health Canada and EVERY other regulatory agency in the world.

Health Canada, and NOT Suzuki, has THE ESSENTIAL EXPERTISE on the subject of pest control products.

Decisions regarding pest control products are to be left with the Environmental Protection Agency and Health Canada.

Conventional pest control products like 2,4-D are SCIENTIFICALLY SAFE.

Background Information from an Independent Perspective

David Suzuki Foundation

We are living in the 9|11 Era of Environmental Terror CONCOCTED by Suzuki-Lunatics !

And they have been REPEATEDLY PROVEN TO BE WRONG !

Suzuki was WRONG about polar bears.

Suzuki was WRONG about global warming.

Suzuki was WRONG about pest control products.

Suzuki was WRONG about INTERFERING IN POLITICAL CAMPAIGNS.

As a result of his POLITICAL INTERFERENCE in the Ontario 2011 General Election, David Suzuki was QUIETLY FORCED TO STEP DOWN from the Board of Directors of David Suzuki Foundation.

Demands are now being made for David Suzuki to STEP DOWN as host of television programs produced by Canadian Broadcasting Corporation, including The Nature Of Things.

The #@!!% Suzuki-Basterds INTERFERE IN PARTISAN POLITICS.

And The #@!!% Suzuki-Basterds Are STILL INTERFERING IN PARTISAN POLITICS ...

EVEN IN THE PROVINCE OF QUEBEC, Where They Believe No One In English-Speaking Canada Is Capable Of Reading Their French Anti-Pesticide Propaganda.

Health Canada Is THE EXPERT And NOT Suzuki

Why the #@!!%-ing hell is Suzuki asking for NATIONAL Anti-Pesticide Prohibition ?

Suzuki like a man in a dark room with his hands out looking for the light-switch of expertise and credibility ... blindly talking to the public and the media looking for a clue.

Suzuki and his Enviro-Lunatics present themselves as supposed experts in matters concerning PEST CONTROL PRODUCTS. [Wrong !]

Background Information from an Independent Perspective

Health Canada, and NOT Suzuki, has THE ESSENTIAL EXPERTISE on the subject of pest control products.

NOT A SINGLE PERSON among the Suzuki-Lunatics has ANY recognized expertise, training, or background, in matters concerning PEST CONTROL PRODUCTS !

This includes even David Suzuki himself.

In order to allow SOUND SCIENCE to be effectively practiced, it would be preferable leave the interpretation of scientific research to those people who are competent to do it ... Health Canada.

Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS even present themselves as supposed experts in matters concerning TURFGRASS and ORNAMENTAL PLANT MANAGEMENT. [Wrong !]

Suzuki and his Enviro-Lunatics merely represent their own interests only, and often seek to impose their CLOWNISH LIFESTYLE CHOICES on everyone too often through the creation of LIES, FEAR-MONGERING, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES.

Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS will become the instrument of national annihilation of the Modern Canadian Green Space Industry by seeking an unnecessary prohibition of conventional pest control products.

Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS are THE GREATEST THREAT to the future of the Modern Green Space Industry !

Background Information from an Independent Perspective

Repercussions Of Anti-Pesticide Terrorism

Federal, provincial, and municipal officials cannot EFFECTIVELY GOVERN THEIR JURISDICTIONS in a country that has Environmental-Terrorist-Organizations DICTATING PUBLIC POLICY on matters such as the NEEDLESS, SENSELESS, and MALICIOUS PROHIBITION of pest control products that are, in fact, FEDERALLY LEGAL, SCIENTIFICALLY SAFE, and CAUSE NO HARM.

If Canada is to become a haven for SUBVERSIVE ENVIRO-TERRORIST ACTIVITIES, companies and investors will SHUN CANADA, and GO ELSEWHERE !

For example, there are now SERIOUS REPERCUSSIONS TO PESTICIDE BANS.

Because of PESTICIDE BANS, major global manufacturers are entirely abandoning all sectors of the Pesticide Industry, and are directing their resources towards more lucrative and stable markets, such as agricultural, pharmaceutical, and veterinary products.

In jurisdictions like Canada, which is now INFESTED with Anti-Pesticide PROHIBITIONS, manufacturers will NO LONGER invest in ANY new products for registration in that country.

Since Canada is a HAVEN FOR ENVIRONMENTAL-TERRORIST ACTIVITIES, companies and investors have SHUN CANADA, and have gone ELSEWHERE !

The Canadian market is now FINISHED as far as many chemical manufacturers are concerned.

Canada will NO LONGER BENEFIT from ANY additional investment regarding new technologies applicable to pest control products.

That's it.

Game over.

Just like the companies that vacated the Province of Quebec in the 1970s because of a new separatist government, the EXODUS of chemical manufacturers from Canada is COMPLETE.

These manufacturers abhor operating in markets made UNSTABLE by TERRORISM, whether it is political or environmental.

Consequently, the manufacturers are TERRIFIED at the prospect of investing hundreds of millions of dollars on the research and registration of new products in an unstable Canada.

Background Information from an Independent Perspective

The exit strategies are now assured.

The EXODUS applies to ALL manufacturers and distributors of pest control products that are, in fact, HEALTH-CANADA-APPROVED, FEDERALLY-LEGAL, SCIENTIFICALLY-SAFE, PRACTICALLY-NON-TOXIC, and CAUSE NO HARM.

It is obvious that the Anti-Pesticide Lunatics within Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS must consider the hundreds of qualified scientists of the Pest Management Regulatory Agency of Health Canada to be incompetent and/or incapable of arriving at correct scientific findings concerning conventional pest control products.

Perhaps the services of Health Canada should be terminated, and Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS can run the show themselves.

Unfortunately, there is NOT ONE Suzuki-Lunatic competent to do this kind of work, especially in matters pertaining to pest control products.

Suzuki Terrorism Will NEVER End

There will be NO END to the demands, threats, and attacks from Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS that seek to ANNIHILATE the entire Green Space Industry because of malicious policies leading to LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting TERROR, DESPAIR, and DESTITUTION on THOUSANDS of people throughout the Green Space Industry.

Once Suzuki's NATIONAL ALLIANCE OF ENVIRO-TERRORISTS have been successful in annihilating the Professional Lawn Care Industry ...

ENVIRO-TERRORIST ACTIVITIES have now also spread against FERTILIZERS.

ENVIRO-TERRORIST ACTIVITIES will next eliminate pest control products from the HATED GOLF INDUSTRY.

And then ... NURSERY PRODUCTION.

And then ... AGRICULTURE.

And finally ... LUNATIC-TERRORIST PROHIBITION will spread NATIONALLY against ALL pest control products and even fertilizers.

Background Information from an Independent Perspective

David Suzuki Foundation STILL INTERFERING

The #@!!% Suzuki-Basterds are STILL INTERFERING IN PARTISAN POLITICS.

And the #@!!% Suzuki-Basterds are STILL INTERFERING IN PARTISAN POLITICS ... EVEN IN THE PROVINCE OF QUEBEC, where they believe no one in English-speaking Canada can read French.

David Suzuki DESTROYED the Professional Lawn Care Industry ... since it has MERCILESSLY TERRORIZED, BASELESSLY SMEARED, FALSELY ACCUSED, GROTESQUELY PUNISHED, INNOCENTLY CONVICTED, SHAMELESSLY PERSECUTED, and WRONGFULLY DEPRIVED those people working in the Professional Lawn Care Industry.

There is NO RECOURSE BUT OFFICIAL COMPLAINTS AND LITIGATION against Environmental and Anti-Pesticide Organizations like Suzuki.

Suzuki DOES NOT DESERVE ANY DONATIONS OR SUPPORT.

Suzuki DOES NOT DESERVE A TAX-EXEMPT STATUS.

Suzuki DOES deserve to FACE THE SPOTLIGHT OF SCRUTINY AND THE TERROR OF THE COURTS !

It is believed that Suzuki ought to be INVESTIGATED by Taxation Agencies in both Canada and the United States

ANY information concerning the activities of David Suzuki should be recorded and relayed to business, fund-raising, government, and taxation agencies in order to assist with investigation

Demand a REVOCATION of Suzuki's REGISTERED CHARITY TAX-EXEMPT STATUS !

David Suzuki must also STEP DOWN as host of television programs by Canadian Broadcasting Corporation, including The Nature Of Things

STOP Suzuki !
