Overview

Organic-Fanatџcs Are Deranged Liars

The only people who want reckless and arbitrary prohibitions against pest control products are a small group of pesticide-hating organic-fanatџcs [a.k.a. activists].

With organic food production, society faces hostile and deranged lunatџc-CONSPIRACIES that are fanatџcally-deranged with LIES, and subversive in avoiding REAL FACTS.

CONSPIRACIES prove that organic food production has been a dismal failure !

Here are examples of CONSPIRACIES by organic-fanatџcs —

- **CONSPIRACY** — Adopting ideological conflicts-of-interest
- **CONSPIRACY** — Colluding with the Russian propaganda machine
- **CONSPIRACY** — Deliberately causing societal strife
- **CONSPIRACY** — Fooling gullible & politicized journalists
- **CONSPIRACY** — Giving interviews on Russian TV with no moral qualms
- **CONSPIRACY** — Orchestrating campaigns against scientists by smearing & cyber-bullying
- **CONSPIRACY** — Performing journalistic malpractice
- **CONSPIRACY** — Pushing conspiracy theories
- **CONSPIRACY** — Rejecting the scientific consensus
- **CONSPIRACY** — Reporting easily provable lies
- **CONSPIRACY** — Sowing discord, chaos, & confusion
- **CONSPIRACY** — Spreading Russian mis-information about American agriculture
- **CONSPIRACY** — Operating as lying sacks of сџџ

Organic food production has been a dismal failure !

Organic-fanatџcs concoct false-facts and state LIES like they are truth.

They are subversive lying sacks of сџџ.

They LIE and LIE and LIE and LIE.

Their LIES prove that organic food production has been a dismal failure !

They have vested interests in concocting LIES such as —

- X LIE — **Glyphosate causes cancer [See later segment]**
- X LIE — Organic farming makes the environment better
- X LIE — Organic farms do not use pesticides
- X LIE — Organic food is healthier for people
- X LIE — Organic food is pesticide-free
- X LIE — **School shootings are caused by pesticides [See later segment]**

Organic food production has been a dismal failure !

Organic-fanatѡcs continue LYING in defiance of REAL FACTS that clearly demonstrate that ALL organic-fanatѡcs are subversive lying sacks of crѡp.

REAL FACTS prove that organic food production has been a dismal failure !

Here are examples of REAL FACTS about organic-fanatѡcs —

- √ FACT — **Activists are commanded by Russia [See later segment]**
- √ FACT — Eating organic food will NOT stop violence in schools
- √ FACT — Glyphosate DOES NOT cause cancer
- √ FACT — **Natural pesticides exist in all food [See later segment]**
- √ FACT — Nothing will change the minds of organic-fanatѡcs
- √ FACT — Organic farming makes the environment worse
- √ FACT — Organic farms DO use pesticides
- √ FACT — **Organic food & its certification is an extortion racket [See later segment]**
- √ FACT — Organic food is NOT healthier for people
- √ FACT — Organic food is NOT pesticide-free

- ✓ **FACT** — Organic-fanatџcs are anathema to science
- ✓ **FACT** — Science is never enough for organic-fanatџcs
- ✓ **FACT** — Virtually all pesticides we eat are natural
- ✓ **FACT** — Organic-fanatџcs are lying sacks of сгжр
- ✓ **FACT** — Organic food production has been a dismal failure

In the 9|11 era of the organic nightmare, organic-fanatџcs have been absolutely **WRONG** and have been **DEBUNKED** about the myth of so-called « *healthier* » organic food !

Non-organic fruits and vegetables that are pesticide-treated have been shown to be scientifically-safe and will cause **NO** harm since government agencies build in immense safety factors to comply with reference dose and acceptable daily intake recommendations.

Who needs this #@!%! organic food nonsense ?!?!

A woman in a black bikini stands in a field of tall, golden-brown grain. In the background, several large metal silos are visible against a dark, overcast sky. The woman has a serious expression and her hands are on her hips.

Organic-Fanatics

Deranged Lunatƙc Conspiracy Theories

According to Dr Alex Berezow ...

One of the problems with SCIENCE COMMUNICATION is that we are always a day or two behind the mass media.

The general pattern is this —

1. Bad research is published or a crazy person makes a crazy claim.
2. The mass media gets a hold of it, and broadcasts it all over the world.
3. Sane people are alerted to this nonsense, who then have to craft an evidence-based response. That takes a substantial amount of time and effort and, as a result, a lie circles the globe before the truth gets its shoes on.

A pre-emptive solution is ideal.

Science communicators should hunt down kooky [lunatƙc conspiracy theories], then take them behind the barn and shoot them before they have the opportunity to gain a substantial following.

But here's the catch —

How does one identify which DERANGED CONSPIRACY THEORIES will go viral !?!?

There are more LIES than there are hours in the day to debunk them.

The best (as in, the most viral) CONSPIRACIES engage people's emotions.

They also tend to invoke some, big mysterious force (be it corporations or the government) manipulating or otherwise harming people for the sake of power or profit.

Given those criteria, we should nip in the bud a potentially new viral conspiracy theory — PESTICIDES ARE CAUSING SCHOOL SHOOTINGS [?!?].

Eat Only Organic Food [?!?!]

Key points ...

Deranged Lunatƙc Conspiracy —

Blaming School Shootings On Pesticides

Fooling Gullible & Politicized Journalists

**Performing Propaganda Interviews On
Russian TV With No Moral Qualms**

**Orchestrating Campaigns Against Scientists
By Smearing & Cyber-Bullying**

Organic-Fanatƙcs Are Subversive Lying Sacks Of Crƙp

According to Dr Alex Berezow ...

A crack-pot named E G Vallianatos, [a fanatƙcal organic-food-activist], has written a blog post that LINKS PESTICIDES TO SCHOOL SHOOTINGS [?!?!].

He says —

[Pesticides] *may have something to do with the mass-shootings [sic] in schools all over America because some of them are neuro-toxins.* [?!?!?!?!]

He claims that the chemical industry's pesticides make children stupid and violent [?!?!], and the government acts as an accomplice [?!?!].

His solution, of course, is to eat ONLY organic food. [?!?!]

This nonsense probably would have remained in total obscurity were it not for the fact that it was reprinted, in part, by the Organic Consumers

Association (OCA) — a group of CONSPIRACY THEORISTS that has been cited as a source by outlets such as the New York Times.

What does the OCA believe ?!?!

The Organic Consumers Association (OCA) ...

- Lies about nuclear power [?!?!]
- Peddles all sorts of conspiracy theories, including 9|11 trutherism, chemtrails, and FEMA's secret plan to implement martial law [?!?!]
- Promotes alternative medicine [?!?!]
- Publishes anti-vaccine propaganda [?!?!]
- Vehemently anti-GMO [?!?!]

The head of the OCA is Ronnie Cummins, [a fanatical organic-food-activist] who has NO MORAL QUALMS about doing interviews on the Russian propaganda network, RT.

OCA is also behind US Right To Know, the organization that LIES about GMOs and endorses mandatory labels.

They have engaged in SMEAR AND CYBER-BULLYING CAMPAIGNS against scientists (including me, your humble correspondent, who they tried to prevent from being published in USA Today, where I serve on the Board of Contributors).

In short, the Organic Consumers Association (OCA) is a [Russian troll] group of DANGEROUS FRAUDS who are entirely UNHINGED FROM REALITY.

[See later segment entitled « *Organic Consumers Association Colludes With Russia* ».]

Yet, they have FOOLED GULLIBLE AND POLITICALLY SYMPATHETIC JOURNALISTS into believing they are somehow a respectable organization when it comes to food science.

That's why this conspiracy needs to be addressed.

Pesticide-Free Is A Gigantic Lie

Key points ...

- The Failure Of Organic —**
- Organic Farms Use Pesticides**
- Natural Pesticides Exist In All Food**
- Virtually All Pesticides We Eat Are Natural**
- Organic Food Is Not Pesticide-Free**
- Eating Organic Food Will Not Stop Violence**
- Organic-Fanatics Are Lying Sacks Of Crap**

According to Dr Alex Bereznov ...

The following are FACTS —

1. Both conventional and organic agriculture use pesticides. The only difference is the type of pesticide that each uses. Organic-food-activists [i.e. fanatics] want you to believe that their food is pesticide-free, but that is a GIGANTIC LIE. ORGANIC FARMS USE PESTICIDES.
2. Both conventional and organic farms use pesticides at safe levels.
3. Even if agriculture didn't use pesticides, you would still consume pesticides. Why !?! Because 99.99 PER CENT OF THE PESTICIDES YOU EAT ARE MADE BY THE PLANTS THEMSELVES. [See later segments.]

Ergo, pesticides DO NOT cause school shootings, and eating organic food WILL NOT prevent school shootings.

The only thing eating organic food will prevent you from doing is keeping too much cash in your wallet.

When We Eat Plants, We Are Also Eating Natural Pesticides

According to Dr Alex Bereznov ...

The word « *pesticide* » is misunderstood, nearly to the same extent as the word « *chemical* ».

People have been led to believe, largely by the [fanatical] organic food industry and environmental activists, that « *pesticides* » are unnatural, dangerous, and do not belong in the food supply. [???]

But this defies a basic understanding of biology.

A « *pesticide* » is any chemical, natural or human-made, that is designed to kill another organism.

Using that broad definition, there are probably hundreds of thousands of « *pesticides* » in the natural environment.

As it turns out, biological warfare was invented and perfected by Mother Nature.

For example, some bacteria and fungi produce anti-biotics to kill other microbes.

We don't call these anti-biotics « *pesticide* », but that's exactly what they are.

To a bacterial cell, a microbe of a different species is often nothing more than a competitive pest that should die.

So, it produces chemicals with the intention of killing it.

That's a « *pesticide* ».

Plants do the same thing.

From a plant's point of view, many insects are nothing more than dangerous leaf-eating parasites that should die.

So, plants produce insecticides, like caffeine and nicotine, to keep those obnoxious, six-legged vegetarians away.

(They also produce pesticides to keep the furry, four-legged vegetarians away, too.)

And guess what ?

When we eat plants, we're eating those « *pesticides* », too.

Natural Pesticides Exist In All Food

99.99 Per Cent Of Pesticides We Eat Are Produced By Plants Themselves

Key points ...

The Failure Of Organic —

Natural Pesticides Exist In All Food

Virtually All Pesticides We Eat Are Natural

Organic-Fanatџcs Are Lying Sacks Of Crџp

According to Dr Alex Berezwow (& Dr Ames) ...

A paper co-authored in 1990 by the venerable Dr Bruce Nathan Ames found that 99.99 per cent of the « *pesticides* » we consume in our diet are produced BY THE PLANTS THEMSELVES.

Given the popularity of organic food and the unscientific mythology underlying it, his findings are more relevant now than ever.

According to Dr Ames' team, every plant produces roughly a few dozen toxins, some of which (at a high enough dose) would be toxic to humans.

Cabbage produces at least 49 known « *pesticides* ».

Given the ubiquity of « *natural pesticides* », Dr Ames estimates that ...

Americans eat about 1.5 g of NATURAL PESTICIDES per person per day, which is about 10,000 times more than they eat of synthetic pesticide residues.

Furthermore, Dr Ames has estimated that we consume 5,000 to 10,000 different « *natural pesticides* » every day, many of which cause cancer when tested in lab animals.

Dr Ames then pens quite possibly the best paragraph ever written in the scientific literature —

RODENT CARCINOGENS are present in the following foods — anise, apple, apricot, banana, basil, broccoli, Brussels sprouts, cabbage, cantaloupe, caraway, carrot, cauliflower, celery, cherries, cinnamon, cloves, cocoa, coffee, collard greens, comfrey herb tea, currants, dill, eggplant, endive, fennel, grapefruit juice, grapes, guava, honey, honeydew melon, horseradish, kale, lentils, lettuce, mango, mushrooms, mustard, nutmeg, orange juice, parsley, parsnip, peach, pear, peas, black pepper, pineapple, plum, potato, radish, raspberries, rosemary, sesame seeds, tarragon, tea, tomato, and turnip.

Thus, it is probable that almost every fruit and vegetable in the supermarket contains NATURAL PLANT PESTICIDES that are rodent carcinogens.

The levels of these ... RODENT CARCINOGENS in the above plants are commonly thousands of times higher than the levels of synthetic pesticides.

Explore the following link ...

✓ -- Dietary Pesticides (99.99% All Natural) -- Ames -- LINK

<http://pesticidetruths.com/wp-content/uploads/2019/02/%E2%88%9A-Dietary-Pesticides-99.99-All-Natural-Ames-LINK.pdf>

Natural Pesticides Exist In All Food

Eliminating All Pesticides From Your Diet !?!?

According to Dr Alex Berezow ...

Do you cook your food ?

That produces cancer-causing toxins, too.

Do you like coffee ?

That's a boiling hot cup of rodent carcinogens.

It must be kept in mind that for every scary synthetic pesticide man has created, Mother Nature has created something worse.

And you probably eat it regularly.

However, if you still insist on eliminating all pesticides from your diet, there is one thing you can do — stop eating.

<http://pesticidetruths.com/wp-content/uploads/2019/02/%E2%88%9A-How-Organic-Consumers-Association-Colludes-With-Russian-Trolls-Berezow-LINK.pdf>

Organic-Fanatжcs Are Commanded By Russia

Russian Trolls Meddling In America

Key points ...

**Deranged Lunatжc Conspiracy —
Russian Trolls Command Organic-Fanatжcs
Sowing Discord, Chaos, & Confusion
Deliberately Causing Societal Strife
Organic-Fanatжcs Are Deranged Lying Sacks Of Crжp**

According to Dr Alex Berezow ...

At first glance, RUSSIAN TROLLS and the [fanatжcal] activist group Organic Consumers Association (OCA) — a group of CONSPIRACY THEORISTS — seem to have no connection whatsoever.

But appearances can be DECEIVING.

Far from just meddling in American democracy, RUSSIAN TROLLS are MEDDLING wherever and whenever they can to CAUSE SOCIETAL STRIFE.

Radio Free Europe reports that RUSSIAN TROLLS may have contributed to the massive measles outbreak in Europe in 2018, which sickened 82,000 people, and killed 72, by spreading anti-vaccine propaganda.

This is consistent with stories that were reported a few months earlier, which concluded that RUSSIAN TROLLS were promoting pro- and anti-vaccine campaigns.

Why both ?

Because their mission is to SOW DISCORD, CHAOS, and CONFUSION.

This strategy even has a name — The Gerasimov Doctrine.

It's why the promotion of all sorts of CONSPIRACY THEORIES (including anti-GMO propaganda) on social media CAN OFTEN BE TRACED BACK TO RUSSIA.

Making it all worse is the fact that the RUSSIAN TROLLS have accomplices, « *useful idiots* » you could call them, willing to help.

And they're American [*organic-fanatics*].

Organic-Fanatџcs Are Commanded By Russia

Organic Consumers Association (OCA)

Key points ...

The Failure Of Organic —

Organic-Fanatџc-Doctrines Are Truth-Challenged

Organic Food Is Not Healthier For People

Organic Farming Makes The Environment Worse

Organic-Fanatџcs Are Lying Sacks Of Crџp

According to Dr Alex Berezow ...

OCA is funded by the [fanatџcal] organic industry, which is built upon a FOUNDATION OF LIES.

Evidence shows that organic food is NOT healthier for people and that organic farming is NOT better for the environment.

(Actually, it's WORSE for the environment.)

The only substantial difference between conventional food and organic food is the price.

Given its shaky relationship with reality, it shouldn't come as a surprise that OCA peddles other BIZARRE IDEAS.

If you believe one CONSPIRACY THEORY (namely, GMOs are poisoning everybody), then it's not too difficult to accept other CONSPIRACY THEORIES.

Indeed, OCA's web-site pushes the sort of nonsense you might hear come from Alex Jones or InfoWars, such as ...

- 9|11 trutherism [?!?!]
- Chemtrails [?!?!]
- FEMA's secret plan to implement martial law [?!?!]

Just in case that isn't kooky enough, they also believe PESTICIDES CAUSE SCHOOL SHOOTINGS [?!?!], and, lo and behold, they're anti-vaccine.

On February 19th, 2019, OCA [hosted] an event at the Minneapolis Club to discuss vaccines.

The featured speaker [was] none other than notorious anti-vaxxer, Robert F Kennedy, Jr.

Explore the following links ...

Organic-Fanatџcs Are Commanded By Russia

Collusion Between Russia & Organic Consumers Association (OCA)

Key points ...

Deranged Lunatџc Conspiracy —

**Organic-Fanatџc Doctrines Are Directed
By The Commands From Russian Trolls**

Pushing Conspiracy Theories

**Spreading Russian Mis-Information
About American Agriculture**

Colluding With Russian Propaganda Machine

Organic-Fanatџcs Are Subversive Lying Sacks Of Crџp

According to Dr Alex Berezow ...

So, both RUSSIAN TROLLS and OCA push CONSPIRACY THEORIES, including anti-vaccine propaganda.

But the similarities don't end there.

The OCA actively COLLUDES with the Russian propaganda machine.

Ronnie Cummins, who heads the OCA, appeared on the propaganda outlet RT (formerly known as Russia Today) to SPREAD [Russian] MIS-
INFORMATION about American agriculture.

And Gary Ruskin, who heads the anti-GMO group US Right To Know (which is funded primarily by OCA), gleefully SPREADS RT [Russian] propaganda.

Let's review.

The Organic Consumers Association ...

- Claims pesticides cause school shootings [?!?!]
- Colludes with Russian propaganda outlets, like RT [?!?!]
- Promotes 9|11 trutherism [?!?!]
- Promotes anti-vaxxerism [?!?!]
- Says chemtrails are real [?!?!]
- Spreads FEMA-martial law conspiracy theory [?!?!]

Vladimir Putin couldn't be happier.

✓ -- On Glyphosate, Carey Gillam Keeps Lying Early & Often -- Berezow -- LINK

<http://pesticidetruths.com/wp-content/uploads/2019/02/%E2%88%9A-On-Glyphosate-Carey-Gillam-Keeps-Lying-Early-Often-Berezow-LINK.pdf>

Glyphosate Causes Cancer [?!?!]

Organic Terrorkrism Will NEVER End !

Key points ...

Organic-Fanaticks Are Lying Sacks Of Crap

Science Is Never Enough

Nothing Will Change Their Minds

Adopting Ideological Conflicts-Of-Interest

Organic-Fanaticks Are Anathema To Science

According to Dr Alex Berezow ...

I've been a science writer and editor for nearly eight years.

During this time, I've learned a few things.

Perhaps the most important is that SCIENCE IS NEVER ENOUGH.

It doesn't matter if you have facts, data, and logic on your side, a substantial proportion of people will REJECT what you say and call you bad names.

The reason, usually, is because they have an IDEOLOGICAL CONFLICTS-OF-INTEREST — by far, the worst kind of conflict-of-interest.

That is, they are so dedicated to a particular viewpoint, that literally NOTHING WILL CHANGE THEIR MINDS.

That is ANATHEMA TO SCIENCE.

Editors must be aware of that fact.

Otherwise, they are likely to be BAMBOOZLED.

And that's exactly what happened to The Guardian, a newspaper that historically has been at least decent at reporting science.

Note — I'm being charitable. I want to believe that The Guardian was BAMBOOZLED, rather than purposefully SENSATIONALIZING BAD SCIENCE. Of course, they've done just that very recently when they claimed that a glass of wine will shorten your life by 30 minutes.

Glyphosate Causes Cancer [?!?!]

Carey Gillam Keeps Lying About Glyphosate

Key points ...

Deranged Lunatic Conspiracy —

Rejecting The Scientific Consensus

Reporting Easily Provable Lies

Performing Journalistic Malpractice

**The Scientific Consensus Is That
Glyphosate Does Not Cause Cancer**

Carey Gillam Is A Lying Sack Of Crap

According to Dr Alex Berezow ...

Carey Gillam is an anti-GMO [fanatical-] activist who once wrote for Reuters, but no longer does.

An e-mail obtained from a freedom-of-information request shows that her activism may be why.

Indeed, Gillam's work has been described as « *polemical, sometimes fraudulent and routinely misleading* ».

Any editor worth his or her salt should think twice before allowing Gillam to publish anything, particularly when it comes to GMOs.

Alas, that didn't happen here —

Weedkiller found in granola and crackers, internal FDA emails show

The FDA has been testing food samples for traces of glyphosate for two years, but the agency has not yet released any official results

Literally, the very first sentence of the article is a LIE.

Gillam wrote —

US government scientists have detected a weed-killer LINKED TO CANCER in an array of commonly consumed foods ...

That's a BALD-FACED LIE

Period.

The scientific consensus is that GLYPHOSATE DOES NOT CAUSE CANCER.

The EPA, FDA, EFSA (European Food Safety Authority), and WHO (World Health Organization) all have arrived at the same conclusion.

The only odd one out is IARC, a bizarre little outfit inside the WHO.

Why ?

Investigations have revealed that IARC insiders are engaged in SCIENTIFIC FRAUD and have massive financial CONFLICTS-OF-INTEREST.

Is any of that mentioned in the article ?

Nope, of course not.

The content of the article is also suspect.

Instead of waiting for an official report from the FDA, Gillam obtained e-mails from a freedom-of-information request.

Her article is framed to make it appear as if the FDA is covering up unsafe levels of glyphosate in the food supply.

But her own source contradicts that assertion —

While developing his method he tested grain corn and found one sample to contain 6.5 ppm.

The corn he tested was not an official sample, therefor [sic] no regulatory status can be assigned.

So, one sample had a high glyphosate level.

One out of how many ?

100 ?

1000 ?

We don't know, because the e-mail has little context.

That's why we wait on official peer-reviewed reports, not on individual data points cherry-picked out of e-mails.

Does The Guardian article mention that incredibly important caveat ?

No.

This JOURNALISTIC MALPRACTICE should have been enough to prevent this article from being published.

But there's yet another reason — Gillam works for an organization, US Right to Know, that receives the majority of its funding from the Organic Consumers Association (OCA) ?

The OCA is a group of CONSPIRACY THEORISTS.

[According to a report by Dr Berezow on April 17th, 2018 —]

In addition to being vehemently anti-GMO, OCA also publishes anti-vaccine propaganda [?!?!], promotes alternative medicine [?!?!], lies about nuclear power [?!?!], and peddles all sorts of conspiracy theories, including 9/11 trutherism [?!?!], chemtrails [?!?!], and FEMA's secret plan to implement martial law [?!?!].

The head of the OCA is Ronnie Cummins, [a fanatical-organic-food-activist and] a man who has NO MORAL QUALMS about doing interviews on the Russian propaganda network, RT.

The bottom line ...

Carey Gillam is a well-known anti-GMO activist who REJECTS the scientific consensus, regularly reports EASILY PROVABLE LIES, and works for an organization that gets most of its money from 9|11 truthers.

Despite all that, The Guardian published her article anyway.

That's science « *journalism* » in 2018.

Background Information

Dr Alex Berezow's Biography

Dr Berezow is a doctorate-level leading policy expert on the subject of regulatory affairs and pest control products at the American Council on Science and Health (ACSH).

ACSH is a non-profit organization, co-founded in 1978 by Dr Elizabeth M Whelan, that produces peer-reviewed reports on issues related to food, nutrition, chemicals, pharmaceuticals, life-style, the environment, and health.

(In June 2015, Mr Hank Campbell became the second President of the American Council on Science and Health, succeeding co-founder Dr Elizabeth M Whelan.)

Dr Berezow holds a PhD in Microbiology.

He joined the ACSH as Senior Fellow of Biomedical Science in May 2016.

Dr Berezow is among several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths. <http://wp.me/p1jq40-8DV>

Dr Berezow is a prolific science writer whose work has appeared in multiple outlets, including The Wall Street Journal, CNN, BBC News, The Economist, and USA Today, where he serves as a member of the Board of Contributors.

In 2017, he published *Little Black Book of Junk Science*, and with Mr Hank Campbell in 2012, he co-authored *Science Left Behind*, which was an environmental policy best-seller.

Dr Berezow has spoken to a wide variety of audiences about science, from graduate school seminars and church congregations to national TV and radio programs.

Formerly, he was the founding editor of RealClearScience.

Dr Berezow speaks the truth — and deserves congratulation.

Background Information

Canada's Organic Food Certification System Is Little More Than An Extortion Racket

In Canada, there is NO mandatory laboratory testing of products to ensure organic-labelled food is actually farmed without pest control products, leaving the organics industry in the hands of the honour system.

Canadian Food Inspection Agency did internal spot tests in 2011, and found that nearly 24 per cent contained pesticide residue.

Organic crops and livestock are NOT tested in Canada before they are certified, thus making organic certification essentially meaningless.

A certifier really has NO incentive whatsoever to crack down on a grower who might be breaking the rules.

Lying, cheating, and fraud are the only ways to make organic food production appear to work effectively.

About NORAHG

We Speak The Whole Truth About Lying Sacks Of Crap From An Independent Perspective

We are the National Organization Responding Against HUE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged glyphosate-hating fanatics (HUE) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths.

Not surprisingly, glyphosate-hating fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

We dare to defy the glyphosate-hating fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ...
