

Initiation of special reviews : potential environmental risk to aquatic invertebrates related to the use of clothianidin and thiamethoxam.: H113-5/2016-17E-PDF - Government of Canada Publications

"This notice is to advise that pursuant to subsection 17(1) of the Pest Control Products Act, Health Canada's Pest Management Regulatory Agency (PMRA) is initiating special reviews related to registered pest control products containing the active ingredients clothianidin or thiamethoxam. Based on a preliminary analysis of available information on the levels and frequency of detection of these pesticides in aquatic environments, the PMRA has determined that special reviews are warranted. The aspect of concern for these reviews is to assess potential risk to aquatic invertebrates exposed to clothianidin or thiamethoxam applied as a seed, foliar or soil treatment"--Initiation of Special Reviews. p. 1.
