Victory In Brazil

There Will Be NO Prohibition Against Glyphosate In Brazil

Brazil's Health Agency Says Glyphosate Does Not Cause Cancer

[Brazil, also known as the Federative Republic of Brazil, is the largest country in both South America and Latin America. Brazil is the world's fifth-largest country by area and the fifth most populous, with a population of 208 million. The agriculture of Brazil is historically one of the principal bases of Brazil's economy, worth 65 billion dollars US. While its initial focus was on sugarcane, Brazil eventually became the world's largest exporter of coffee, soybeans, beef, and crop-based ethanol. Brazil is the world's largest exporter of soybeans and relies heavily on glyphosate products.]

This is a really great day for evidence-based policy, which means it's a really bad day for environmental and anti-GMO activists.

Brazil's health agency, known as ANVISA (*Agência Nacional de Vigilância Sanitária*), declared that glyphosate DOES NOT CAUSE CANCER.

The press release issued by the agency (translated into English using Google) says that glyphosate DOES NOT POSE A HAZARD to the average person because ...

... the product has NOT been classified as mutagenic, carcinogenic, toxic for reproduction, teratogenic (causing fetal malformation), among others.

The only warning that the report issued was for people who apply glyphosate in the field or live nearby.

The report says —

The main conclusion of the re-evaluation is that glyphosate poses a greater risk to workers working in crops and to people living close to these areas.

Therefore, the main measures proposed are focused on measures related to the handling of the product during its application and its dispersion.

In other words, the report plans to update some safety guidelines for people who work in the field.

Other than that, DON'T WORRY ABOUT GLYPHOSATE.

This is completely in line with the scientific consensus, and the report itself notes that as well —

The conclusion is similar to that obtained in other countries that have recently reviewed the use of glyphosate in the field, such as the United States and Canada, in addition to the European Union.

[Clearly, there will be NO prohibition against glyphosate in Brazil.]

Victory In Brazil

Activists Go Berserk

Anti-Biotech & Environmental Activists Reject The Scientific Consensus On Glyphosate

Not that any of this matters to the [anti-pesticide & environmental-terrorist organizations] that get paid to lie about bio-technology, such as Greenpeace and the Environmental Working Group.

To those [fanatical-] activists, the scientific consensus on glyphosate is simply evidence of a gigantic Monsanto-led conspiracy [?!?!] that somehow involves the US EPA, the European Food Safety Authority, the World Health Organization, and now Brazil's ANVISA.

All of [these national regulatory agencies] agree that glyphosate DOES NOT CAUSE CANCER.

[Additionally], another conspiracy theory was posted on Twitter by science writer and anti-biotech [fanatical-] activist Michael Balter (who, incidentally, was fired by Science Magazine for a « *breakdown of trust* »).

Notice the conspiracy he invokes involves the American Academy for the Advancement of Science, California State University-Long Beach, Monsanto, Bayer, and the judicial system.

[See images below.]

Michael Balter @mbalter · 7h

Why is @CSULB ignoring a CA Public Records Act request for documents pertaining to a scientific misconduct investigation of #glyphosate researcher Sarath Gunatilake, whose @AAAS Scientific Freedom and Responsibility Award was rescinded after pressure from scientists...

Michael Balter @mbalter · 7h

...apparently sympathetic to #Roundup manufacturer #Monsanto/@Bayer? The award citation refers to this as an example of persecution of Gunatilake and his award co-winner and states that the investigation found him innocent. Background here: michael-balter.blogspot.com/2019/02/aaas-r...

1

Michael Balter @mbalter · 11h

Judge Sanctions Attorney in Second Day of #Roundup Trial. [Judge seems determined to protect #Monsanto/@Bayer from another devastating judgement over #glyphosate by withholding key and relevant evidence from the jury]

Much to [the surprise of observers], there's absolutely NO mention of black helicopters, chemtrails, FEMA death camps, or Area 51.

[See image below.]

Court Over-Turned Ban On Glyphosate

On September 3rd, 2018, a Brazilian court OVER-TURNED AN INJUNCTION PROHIBITING products containing glyphosate, KNOCKING DOWN a previous ruling that had been set to DISRUPT the soy planting season set to begin in September 2018.

A Brazilian judge had ruled to HALT THE REGISTRATION of new glyphosate-based products in the country and to SUSPEND EXISTING REGISTRATIONS after 30 days, until health agency ANVISA issued a pending ruling on its safety.

That 30-day deadline was due to pass on September 3rd, 2018, just as the first month of soy planting got under way.

The INJUNCTION and the subsequent REVERSAL also applied to insecticide abamectin and fungicide thiram.

Judge Kássio Marques, of the regional federal court of the first district in Brasilia, based the ruling SUSPENDING THE INJUNCTION on the government's argument that banning glyphosate, and the other two agro-chemicals, could HARM the country's economy.

Marques said in the decision —

... nothing justifies the suspension and abrupt removal of registrations of products containing glyphosate, abamectin, and thiram as active ingredients without an analysis of the serious impacts on the country's economy and population in general.

Brazil is the world's largest exporter of soybeans and RELIES HEAVILY on glyphosate products.

ANVISA, which has been reviewing glyphosate's safety since 2008 without issuing a decision, said it was aware of the OVER-TURNING OF THE INJUNCTION and would take the necessary legal and technical steps in response.

A woman with long, wavy hair is shown from the chest up, wearing a dark, low-cut top. She is looking directly at the camera with a slight smile. Her arms are crossed over her chest. The background is dark and textured, resembling a stormy sky or a close-up of a rough surface.

There Are Tremendous Victories Against Anti- Pesticide Terrorism

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUE that conspire to destroy the Green space and other industries (NORAHG)

Background Information

Joining The World-Wide Trends Against Pesticide Bans

World-wide, government officials are no longer readily jumping in favour of fanatical-prohibition. It is clear that pesticide-hating fanatics conspire to impose prohibition in order to destroy green space and manufacturer industries. At this time, there are dozens of jurisdictions that have aggressively-challenged and even repealed fanatical-prohibitions, or have granted professional lawn care businesses with an exception status.

On green spaces, these jurisdictions have kept children safe, since, with prohibitions, children are at high risk of slipping and tripping and becoming seriously hurt. Unfortunately, it is impossible to keep green spaces well-maintained, safe, and attractive without conventional pest control products. Playing surfaces become thin and yellow, and over-run with weeds and infested with insects, resulting in the dismal destruction of turf playing surfaces. In essence, pest control products prevent slipping and tripping injuries and keep children safe.

There are over fifty jurisdictions that have kept children safe by stopping or rescinding or limiting or beginning to repeal fanatical-prohibitions, or by granting professional lawn care or agricultural businesses with an exception status.

The following jurisdictions have joined the world-wide trends against pesticide bans ...

• Alberta (Province) • Altona (Manitoba) • Anne Arundel County (Maryland)
• Ashland (Oregon) • Beaumont (Alberta) • Belleville (Ontario) • Brazil ([see notes below](#)) • British Columbia (BC, Province) • Calgary (Alberta) • California (State – [see notes below](#)) • Campbell River (BC) • Charlottetown (Prince Edward Island) • Chicago (Illinois) • Deer Lake (Newfoundland) • Durango (Colorado) • Edmonton (Alberta) • European Union (EU, nations of – [see notes below](#)) • Everett (Washington) • Guelph (Ontario) • Guelph-Eramosa (Ontario) • Hudson (Quebec – [see notes below](#)) • Kaua'i County (Hawai'i) • Kelowna (BC) • Lawrence (Kansas) • Lincoln City (Oregon) • Maine (State) • Manitoba (Province – [see notes below](#)) • Merritt (BC) • New Brunswick (Province) • Newfoundland (Province) • Ontario (Province – [see notes below](#)) • Parksville (BC) • Port Alberni (BC) • Portage La Prairie (Manitoba) • Prince Edward Island (Province) • Quebec (Province – [see notes below](#)) • Regina (Saskatchewan) • Revelstoke (British Columbia) • Rossland

(BC) • Saint John's (Newfoundland) • Saint Josephine (Oregon) • Salmon Arm (BC) • Saskatchewan (Province) • Scarborough (Maine) • Steinbach (Manitoba) • Stratford (Prince Edward Island) • Stuartburn (Manitoba) • Summerside (Prince Edward Island) • United Kingdom (UK – [see notes below](#)) • USA ([see notes below](#)) • Vernon (BC) • Winkler (Manitoba)

Notes

- Brazil — Brazil's Anvisa Health Agency Says That Glyphosate Does Not Pose A Hazard To The Average Person
- California — Golf Course Saved After A Federal Judge Dismissed A Legal Challenge
- European Union — Glyphosate Re-Approved For Several Years
- Hudson (Quebec) — Existing Prohibition Morally Invalidated Since Several Government Officials Who Were Responsible For Prohibition Are Now Facing Charges Of Fraud, Corruption, & Tax-Evasion
- Manitoba — Observers Expect That the Pallister Government Will Rescind Provincial Prohibition
- Ontario — Proposed Amendment To Provincial Pesticide Ban Has Begun The Process To Repeal Provincial Prohibition
- Quebec — Provincial Prohibition Has Been Limited With Permitted Active Ingredients, & Also Invalidated Because Ban Has Been Defeated By Lawsuit
- United Kingdom — Suspended European Union Prohibition Against Neonicotinoid Insecticides
- USA — A Vast Majority Of States Have Legislated Pre-Emption Laws, Virtually All Proposed Prohibitions Stopped

Thanks to those jurisdictions that have joined the real trends against pesticide bans !

Background Information

Dr Alex Berezow's Biography

Dr Berezow is a doctorate-level leading policy expert on the subject of regulatory affairs and pest control products at the American Council on Science and Health (ACSH). ACSH is a non-profit organization, co-founded in 1978 by Dr Elizabeth M Whelan, that produces peer-reviewed reports on issues related to food, nutrition, chemicals, pharmaceuticals, life-style, the environment, and health. (In June 2015, Mr Hank Campbell became the second President of the American Council on Science and Health, succeeding co-founder Dr Elizabeth M Whelan.) Dr Berezow holds a Ph.D. in Microbiology. He joined the ACSH as Senior Fellow of Biomedical Science in May 2016. Dr Berezow is among several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths. <http://wp.me/p1jq40-8DV> Dr Berezow is a prolific science writer whose work has appeared in multiple outlets, including The Wall Street Journal, CNN, BBC News, The Economist, and USA Today, where he serves as a member of the Board of Contributors. In 2017, he published *Little Black Book of Junk Science*, and with Mr Hank Campbell in 2012, he co-authored *Science Left Behind*, which was an environmental policy best-seller. Dr Berezow has spoken to a wide variety of audiences about science, from graduate school seminars and church congregations to national TV and radio programs. Formerly, he was the founding editor of RealClearScience. Dr Berezow speaks the truth — and deserves congratulation.

Background Information

Glyphosate Has Been Vindicated

National regulatory agencies world-wide have vindicated glyphosate — these agencies include those within the European Union, the United States, the United Nations, and Canada. These agencies has found that glyphosate DOES NOT present risks of concern to human health or the environment when used according to label directions.

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUE that conspire to destroy the Green space and other industries (NORAHG)

Background Information

We Speak The Whole Truth About Glyphosate From An Independent Perspective

We are the National Organization Responding Against HUIE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating fanaticcs (HUIE) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths.

Not surprisingly, enviro-fanaticcs have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanaticcs, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brain-child of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the pesticide-hating fanaticcs by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORA H G
