Brigadoon Golf Course

No chemical fungicides, pesticides or herbicides used on the property ?!?!

Brigadoon Golf Course is a nine-hole public course in Parksville, British Columbia.

The putting greens were seeded with ' Penn-Links ' creeping bentgrass, and average 5000

The tees and fairways were seeded with velvet bentgrass.

According to Brigadoon —

Brigadoon exemplifies environmental stewardship and responsible construction methodology.

No chemical fungicides, pesticides or herbicides will be used on the

It is HIGHLY UNLIKELY that this pesticide-free allegation is entirely true, and it is most certainly NOT VERIFIABLE.

Environmental-Terror-Organizations, like Pesticide Free BC are using BOGUS ORGANIC AND PESTICIDE-FREE GOLF COURSES in order to advance their CON-SPIRACY to PROHIBIT pest control products that are FEDERALLY LEGAL, SCIEN-TIFICALLY SAFE, and TOTALLY IRREPLACEABLE.

GOLF and other Turf Exemptions

GOLF COURSES) have to use pesticides to maintain their « green »

There is a widespread, entrenched attitude in the turf industry and amongst golfers that GOLF COURSES must be exempt from rules that are in place to protect public health and the environment.

Unfortunately, law makers tend to support this position.

This is unconscionable.

Why should GOLF COURSES and other « turf » facilities (our school and sports fields) continue to use chemicals that are known to harm our children, pets and the environment?

Turf facilities DO NOT NEED CHEMICALS to maintain their greens.

Golf Digest's [treacherous 2008 article called] How Green Is Golf discusses GOLF'S CHEMICAL DEPENDENCE and why this must be phased out.

British Columbia has three [BOGUS] organic golf courses ...

- Grand Fork's Granby River.
- Parksville's 9 hole Brigadoon opened in 2008.
- [BOGUS] organic golf course established in the early 1990s.

Virtually All Organic Golf Courses Are BOGUS

There are NO industry standards for so-called Organic and Pesticide-Free Golf Courses.

The terms « organic » and « pesticide-free » have NOT been officially defined by the Golf Industry.

Organic Golf Courses are promoted by many people with UNVERIFIABLE SUCCESS STORIES!

Organic Golf Courses are promoted by people who FALSELY ALLEGE SUCCESS, and who are likely concocting LIES, MISCONCEPTIONS, AND DECEPTIONS for their own twisted personal interests.

Organic Golf Courses cannot be adequately maintained with Green Alternatives to replace conventional pest control products since they are NOT viable, efficacious, or economical.

Organic Golf Courses are promoted by the SAME people who advocate for Integrated Pest Management, which is ANOTHER BOGUS, FAILED, and INEFFECTIVE management practice.

Integrated Pest Management has been designed to be applicable to the Agriculture Industry, and NOT the Golf Industry, and will NOT significantly reduce the use of pest control products.

Enviro-Maniac Trade Associations have embarked on a RIDICULOUS effort to promote BOGUS, FAILED, and INEFFECTIVE management practices like Integrated Pest Management.

Enviro-Maniac Trade Associations have also embarked on a LUDICROUS effort to reduce the expectations of the golfer by promoting LOW-END PLAYING CONDITIONS.

Organic Golf Courses will NEVER improve the public and political LACK-OF-CONFIDENCE regarding the safety of ANY products used by the Golf Industry.

Organic Golf Courses will NEVER provide a SOLUTION to the public affairs problems of the Golf Industry.

BOGUS ORGANIC AND PESTICIDE-FREE GOLF COURSES represent a MAJOR THREAT to the Modern Golf Industry.

PROHIBITION-ENVIRO-TERRORISTS argue that BOGUS ORGANIC AND PESTICIDE-FREE GOLF

BOGUS ORGANIC AND PESTICIDE-FREE GOLF COURSES ARE NOT VIABLE BECAUSE ...

Most 18-hole golf courses are subject to a brutal 30,000 to 50,000 rounds of golf per year. Many courses have wear problems due to player traffic and golf cars that are far beyond their original design

The vast majority of golf courses are NOT located in temperate climates. Most courses are exposed to brutal extremes in weather conditions, leading to UNBEARABLE AND DESTRUCTIVE PEST PROBLEMS.

extremely persistent, but it is well-adapted to golf course conditions such as low mowing.

Most golf courses must provide players with HIGH-END PLAYING CONDITIONS in order to remain competitive in the market. HIGH-END PLAYING CONDITIONS are necessary to the game and business of golf, otherwise the Golf Industry will face ECONOMIC HARDSHIP BY DRIVING GOLFERS OUT.

Most golf courses cannot afford to lose business because of UNBEARABLE AND DESTRUCTIVE PEST PROBLEMS that disrupt playing conditions. These pests can effectively disrupt the smooth playing surface of putting greens, tees, and fairways. These pests must be effectively controlled.

Most golf courses are NOT walking golf courses. Most players use golf cars in order to get around on ABLE AND DESTRUCTIVE PEST PROBLEMS and disorders.

WEED PESTS can only be controlled with pest control products. Most golf courses cannot afford the man-power to remove weeds manually. The average 18-hole course has a maintenance crew of six. Most of the employee time is devoted to mowing turf. There is sometimes little time to do much else during the growing season.

Many golf courses have large numbers of mature shade trees that create UNBEARABLE AND DE-STRUCTIVE PEST PROBLEMS and disorders related to poor air circulation and shade. Most courses are

Most golf courses need the use of pest control products to compensate for the wide array of UNBEARspecies, shade trees, soil compaction, and poor drainage. The chemical « alternatives » proposed by have no expertise in the field of golf course maintenance. BOGUS ORGANIC AND PESTICIDE-FREE turf management practices will lead to DEAD GRASS on the golf course.

The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry.

HUJE is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MIS-CONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some IMAGINARY DANGER with conventional pest control products. HUJE also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY to PROHIBIT conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

HUJE have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd HUJE is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.

This Report provides NO guarantee regarding accuracy or completeness. In no event shall Force Of Nature be liable for any incidental or consequential damages, lost profits, or any indirect damages. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his colleagues. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from McGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in environmental compliance, government negotiations, public affairs, and work-place safety. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority.

Mr. Gathercole and his colleagues have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of the VERMIN OF ENVIRONMENTAL TERROR for the entire Modern Green Space Industry across Canada. Their involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec.

Today, Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully. I Mr. Gathercole is now retired, although his name continues to appear as FOLINDER of Force of Nature.
