Pembina Valley Online

City Of Morden, Province Of Manitoba

Selected And Adapted Excerpts

Part of the Integrated Pest Management Plan includes mowing grass higher in Morden to bolster the root system of the grass

In the City of Morden, on May 30th, 2016, City Council resolved to **INCREASE FUNDING** to its Integrated Pest Management Plan which will **RAISE THE BUDGET TO 150,000 DOLLARS**, because of Manitoba's Lunatic NDP 2013 Provincial Prohibition.

Morden is a city located in southern Manitoba, Canada, south of the Winnipeg Capital Region, with a population of almost 8,000.

BACKGROUND INFORMATION — MANITOBA'S NEW PALLISTER GOVERNMENT WILL RESCIND PROHIBITION ?!?! — Have Manitobans been forced to live in the 17-year NDP reign of anti-pesticide terrorism ?!?! **YES !** For example, on June 28th, 2013, Manitoba's Lunatic NDP Government IMPOSED ARBITRARY PROHIBITION against conventional pest control products used in the Urban Landscape. <http://wp.me/p1jq40-6RM> <http://wp.me/p1jq40-6Rj> New Democratic Party (NDP) operates as the POLITICAL SHIELD for Anti-Pesticide and Environmental-Terrorist Organizations. <http://wp.me/p1jq40-8Yb> With the 2013 Provincial Prohibition, were municipal governments and homeowners BETRAYED by Manitoba's Lunatic NDP Government ?!?! **YES !** Fortunately, on April 19th, 2016, the Pesticide-Hating Lunatic New Democratic Party (NDP) was DEFEATED by the Progressive Conservative Party of Manitoba, led by Brian Pallister, ending the 17-year NDP reign of anti-pesticide terrorism ! OBSERVERS EXPECT THAT THE PALLISTER GOVERNMENT WILL RESCIND PROHIBITION IN MANITOBA ! <http://wp.me/p1jq40-9zz>

<http://pesticidetruths.com/2016/06/09/manitoba-pesticide-ban-prohibition-review-by-new-conservative-pallister-government-2016-06-00/>

That means broad-leaved weeds will be tackled with MORE FREQUENT APPLICATIONS of Fiesta Herbicide, the ONLY product allowed by Manitoba's Lunatic NDP 2013 Provincial Prohibition.

BACKGROUND INFORMATION — IS FIESTA TOO GOOD TO BE TRUE ?!?! — Because of the imposition of reckless prohibition against conventional pest control products used in the urban landscape, home-owners and professionals are being arbitrarily forced to rely on inferior green alternative pesticides like Fiesta. Unfortunately, prohibitions are often imposed under the pretext that Fiesta is somehow economical, efficacious, effective, lauded, less toxic, and low-risk when compared to conventional and prohibited products like Killex and Par III which contain the active ingredient 2,4-D — **THIS IS FALSE !** In fact, observers have determined Fiesta is high-risk, ineffective, inadequate, more toxic, overwhelmingly condemned, and stunningly expensive ! Nonetheless, anti-pesticide activists and government officials, as well as the manufacturer of Fiesta, persist in perpetuating the lie that prohibitions are a success because Fiesta can somehow successfully replace conventional products such as Killex and Par III. Fiesta **DOES NOT WORK** when compared to conventional products like Killex and Par III. It is wrongly assumed that Fiesta somehow works as well as conventional pest control products like Killex and Par III — **THIS IS FALSE !** Fiesta does not work since weeds are **NOT** controlled or destroyed ! Conversely, Killex and Par III **DO** control weeds and **DO** destroy weeds. Fiesta does **NOT** work since it does **NOT** control weeds, it merely suppresses them. All rates of Fiesta have shown some re-growth of dandelions regardless of which of the rates were used. With Fiesta, there is considerable re-growth, back to similar levels before treatment. And, by the following spring, weed re-growth is back up to the same level regardless of the rates used. Fiesta **DOES NOT WORK AT ALL** unless excessive repeat applications are performed ! This is the reason why Fiesta is **INFERIOR !** Moreover, tests have revealed that there is actually an eventual increase in weed cover, with all Fiesta rates, for species like dandelion and black medick. This is another reason why Fiesta is **INFERIOR !** Not surprisingly, the vast majority of Fiesta users overwhelmingly condemn it. Furthermore, when compared to Killex and Par III, Fiesta requires more personal protection for the applicator, especially the eyes. Fiesta requires protective eye-wear, as well as waterproof gloves. By comparison, Killex and Par III require coveralls over a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes, but **NO** eye-wear. Fiesta cannot be considered safer when compared to conventional products like Killex and Par III. The whole truth about Fiesta can be explored through the following links ... <http://wp.me/P1jq40-1JQ> <http://wp.me/P1jq40-41t> <http://wp.me/P1jq40-80R> <http://wp.me/p1jq40-6ej> Fiesta is yet another example of why **PESTICIDE BANS ARE A FARCE !** Residents living in prohibition jurisdictions are obtaining conventional pest control products that actually **WORK**, either from other provinces, or from across the border in the United States. Conventional weed control products like Killex and Par III are still for sale to everyone despite any prohibition. No one wants this #@!!% ban nonsense ! No one wants #@!!% inferior products like Fiesta !

City council resolved a treatment plan with Fiesta Herbicide for more than 60 acres of City of Morden property, which includes some parks and boulevards on main thoroughfares throughout Morden.

According to Shawn Dias, Morden Parks Manager —

This year was particularly bad for broad-leaf weeds.

We [saw] very dry conditions in May, which is very abnormal, so the grass is less vigorous when it starts growing, which allows the weeds to get better established.

Before Manitoba enacted the Non-Essential Pesticide Use Regulation in December 2014, the city of Morden was using a product called Par III, which was found to be EFFECTIVE in killing weeds like thistles and dandelions.

So effective, that Morden only had to apply Par III once in two years.

BACKGROUND INFORMATION — STUNNINGLY EXORBITANT COSTS INFLICTED AGAINST MANITOBA'S URBAN LANDSCAPES ! — Are Manitobans witnessing the DISMAL DESTRUCTION OF SAFE TURF PLAYING SURFACES ?!?! **YES !** Manitoba's 2013 Provincial Prohibition DESTROYED public and residential green spaces by turning them into GARBAGE DUMPS. It is IMPOSSIBLE to control damaging pests of turf and ornamentals without conventional pest control products. Here is a summary of garbage dump green spaces inflicted by Manitoba's 2013 Provincial Prohibition ... • children at high risk of tripping and becoming seriously hurt • dandelions the dominant ground cover • dead mature street trees • hazardous slipping conditions in sports turf • invasive noxious weeds like Japanese Knotweed and Giant Hogweed • lawns decimated by insects like white grubs • lawns in entire neighborhoods ruined by pests • parks infested with weeds • rose plantations dying and removed. This is the #@!!% PROHIBITION CARNAGE that Manitoba is suffering. Can Manitoba's municipal governments and home-owners afford the hardship and cost of this #@!!% PROHIBITION nonsense ?!?! **NO !** OBSERVERS EXPECT THAT THE PALLISTER GOVERNMENT WILL RESCIND PROHIBITION IN MANITOBA !

However, Par III was mildly toxic to humans. [**WRONG !**]

BACKGROUND INFORMATION — TURF HERBICIDES ARE PRACTICALLY NON-TOXIC ! — Three-way turf herbicide products, like Killlex and Par III, (containing the ingredients 2,4-D, mecoprop, and dicamba) are used for the selective weed control in turf. Indisputable and conclusive risk assessments show that, as reported through Health Canada's vast toxicology database, NO harm will occur when these pest control products are used properly. EVEN IN THEIR CONCENTRATED FORMS (i.e. the product in its form prior to mixing with water), the risk assessment for Killlex and Par III is PRACTICALLY NON-TOXIC. In other words, these broad-leaved weed control products are NO MORE TOXIC than household items like TABLE SALT and even ASPIRIN. In fact, they are not only LESS TOXIC than Aspirin and table salt, but also baking soda, caffeine, cannabis, ethanol (beer, wine, and other intoxicating beverages), nicotine, Tylenol, and Vitamin C. By comparison, the risk assessment for Fiesta Herbicide is also PRACTICALLY NON-TOXIC.

According to Dr Denis Fortier, Vice-President of Medical Services for the new Southern Regional Health Authority —

*It [Par III] has certain chemicals that could potentially, with accumulated levels in one's body [**WRONG !**], cause some health related risks in the long term. [**WRONG !**]*

I'll say right off the bat, those risks are quite low for the average person.

BACKGROUND INFORMATION — THERE IS NO ACUMULATION IN THE HUMAN BODY ! — Pest control products, such as 2,4-D herbicide, is SCIENTIFICALLY SAFE and WILL CAUSE NO HARM. 2,4-D has EXTREMELY LOW MAMMALIAN TOXICITY, has SHORT PERSISTENCE IN HUMANS, and DOES NOT UNDERGO METABOLISM in the human body. 2,4-D is RAPIDLY EXCRETED IN URINE, and half of an absorbed dose is excreted in around two hours.

Dr Fortier is an award-winning physician, he was awarded the Queen Elizabeth II Diamond Jubilee Medal in 2012, and the Doctors Manitoba Health Physician of the Year Award in 2013.

RESPONSE TO FORTIER — Big Deal ! Fortier still knows NOTHING about pest control products. He is a mere family physician. Fortier has NO recognized expertise, NO training, and NO background in matters concerning pest control products or their use in the Urban Landscape. And Fortier is certainly NO expert on Green Alternative Pesticides like Fiesta Herbicide. Like ALL Anti-Pesticide Fanatics, Fortier compensates for his lack of expertise by resorting to MISINFORMATION about conventional pest control products. Nonetheless, these fanatics need to have their cravings satisfied as a UNSCRUPULOUS LUNATIC PSEUDO INTELLIGENTSIA.

Dr Fortier said that Fiesta Herbicide seemed to be a safer product overall [**WRONG !**], but ADMITTED THAT HE WAS NOT AN EXPERT ON CHEMICAL HERBICIDES.

According to Fortier —

The toxicology tests show [that Fiesta herbicide has] very low risks of health concern if used properly. [This is the case with ALL other conventional products as well.]

BACKGROUND INFORMATION — STUNNINGLY EXORBITANT COSTS INFLICTED AGAINST MANITOBANS BECAUSE OF INFERIOR AND HAZARDOUS ALTERNATIVES ! — In 2013, Manitoba's NDP Political Leaders, like Gord Mackintosh, ATTEMPTED TO FALSELY REASSURE THE PUBLIC that so-called safe and effective Green Alternative Pesticides were/are already available to replace conventional pest control products. [**WRONG !**] Mackintosh even had a bottle of Fiesta on the table in front of him during PRESS CONFERENCES. <http://wp.me/P1jq40-1JQ> By 2016, Manitobans have been FORCED TO RELY on Green Alternatives like Fiesta (a.k.a. Weed-B-Gon), and have LOST their Green Spaces. In fact, the vast majority of users OVERWHELMINGLY CONDEMN Fiesta. <http://wp.me/p1jq40-6ej> Because of Manitoba's 2013 Provincial Prohibition against conventional products like Killlex and Par III, Manitobans are being arbitrarily forced to rely on INFERIOR AND MORE HAZARDOUS Green Alternative Pesticides like Fiesta. Fiesta cannot be considered safer when compared to Killlex and Par III. Fiesta requires more personal protection, such as eye-wear, as well as waterproof gloves. By comparison, Killlex and Par III require coveralls over a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes, but NO eye-wear. The whole truth about Fiesta can be explored at the following links ... <http://wp.me/P1jq40-1JQ> <http://wp.me/P1jq40-41t> <http://wp.me/P1jq40-80R> <http://wp.me/p1jq40-6ej> Are Manitoba's municipal governments and home-owners now living in the 17-year NDP reign of anti-pesticide terrorism?!?! **YES !** OBSERVERS EXPECT THAT THE PALLISTER GOVERNMENT WILL RESCIND PROHIBITION IN MANITOBA !

Fiesta is an iron-based herbicide that WILL REQUIRE MORE FREQUENT APPLICATION, which adds to the INCREASED COST to the city. [**Fiesta must be used more frequently, hence exposing the public to unnecessary risks !**]

Dr Fortier emphasized that, in general herbicides are considerably less concerning to a human's health than pesticides. [**?!?!**]

BACKGROUND INFORMATION — **MANITOBA MUST JOIN THE REAL TRENDS AGAINST PROHIBITION !** — Do Manitobans deserve to have PROHIBITION RESCINDED ?!?! **YES !** There are dozens of jurisdictions that have STOPPED or RESCINDED or LIMITED or BEGUN TO REPEAL PROHIBITIONS and RESTRICTIONS, or granted Professional Lawn Care businesses with an EXCEPTION STATUS. Here are examples where there are REAL TRENDS AGAINST Anti-Pesticide PROHIBITION — • Alberta (Province) • Altona (Manitoba) • Ashland (Oregon) • Beaumont (Alberta) • Belleville (Ontario) • British Columbia (Province) • Calgary (Alberta) • Campbell River (British Columbia) • Chicago (Illinois) • Deer Lake (Newfoundland) • Durango (Colorado) • Edmonton (Alberta) • Everett (Washington) • Guelph (Ontario) • Guelph-Eramosa (Ontario) • Hudson (Quebec — Existing Prohibition Morally Invalidated Since Several Government Officials Who Were Responsible For Prohibition Are Now Facing Charges Of Fraud, Corruption, & Tax-Evasion) • Kamloops (British Columbia) • Kaua'i County (Hawai'i) • Kelowna (British Columbia) • Merritt (British Columbia) • New Brunswick (Province) • Newfoundland (Province) • Ogunquit (Maine) • Ontario (Proposed Provincial Prohibition Against Neonicotinoid Insecticides Stopped) • Ontario (Province, Proposed Amendment To Ontario Pesticide Ban, Beginning To Repeal Ontario Anti-Pesticide Prohibition) • Parksville (British Columbia) • Port Alberni (British Columbia) • Portage La Prairie (Manitoba) • Quebec (Imposed Provincial Prohibition Limited With Permitted Active Ingredients, And Also Invalidated Because Ban Defeated By Lawsuit) • Regina (Saskatchewan) • Rossland (British Columbia) • Saint John's (Newfoundland & Labrador) • Saint Josephine (Oregon) • Salmon Arm (British Columbia) • Scarborough (Maine) • Steinbach (Manitoba) • Stratford (Prince Edward Island) • Stuartburn (Manitoba) • Summerside (Prince Edward Island) • Vernon (British Columbia) • Winkler (Manitoba) • United Kingdom (Suspended Fanatical European Union Prohibition Against Neonicotinoid Insecticides) • USA (A Vast Majority Of States Have Legislated Pre-Emption Laws, Virtually All Proposed Prohibitions Stopped). The trends against prohibitions continue. No one can afford this #@!!% nonsense ! The public does not want prohibitions. <http://wp.me/P1jq40-2rr> <http://wp.me/P1jq40-2bo> OBSERVERS EXPECT THAT THE PALLISTER GOVERNMENT WILL RESCIND PROHIBITION IN MANITOBA !
