# Consequences.

## Part 1.

13/05/2009

*What follows is an example  
of the consequences resulting  
from the depraved indifference  
of the environmental movement.*

## Part 1.

13/05/2009

A small Ontario lawn care owner expects to be getting out of the Weed Control and Fertilizing business next year.

---

Dear Force of Nature

I have lost 70 percent of my customer base substituting organics where 2,4-D and Glyphosate products were used.

I have picked up a couple of new accounts for aerating and reseeding.

But as for customer base and total income ( relating specifically to organic fertilizing, weed control/suppression ), I will be happy if I break even.

Pesticide Insurance, Landscape Exterminator Licensing and not being able to use certain equipment doesn't help things.

My organic programs are too cost prohibitive on lawns over 2500 square feet.

The price increase on larger lots has been at least 3 times more with less than acceptable results.

# Consequences.

## Part 1.

13/05/2009

I have been using Corn Gluten for the past 3 years now on some smaller lots and although the product acts as a great fertilizer it does not deter weeds like they say. Even with soil samples, corrections aerating, power raking and over seeding. Don't get me wrong, the lawns that are maintained as just mentioned do look better than lawns with no maintenance at all. There is however several varieties of weeds still present and flourishing. Ground Ivy, Wild Violet, Thistle, Oxalis, Plantain, Bindweed, etc ... Crabgrass and Dandelion are slightly reduced with Corn Gluten.

Promoting the idea of a thicker and longer length grass on lawns is ignored by the majority. If we are cutting the customers lawn we can control the length, but most people hack it down to 2 inches or less.

4 of 9.

Several neighbors are spraying with Killex and Glyphosate with no regard to the new Ban.

Sarritor is not available at the moment for us smaller companies, although I hear the results are not that great and just too costly.

If we cannot use 2,4-D or a new alternative that is reasonable in price, especially on larger lots, I may be getting out of the Weed Control and Fertilizing end of the business next year.

# Consequences.

## Part 1.

13/05/2009

We ( my partner and I ) were attending one of our regular customers to apply Organic fertilizer and Soil corrections to their lawn that we have maintained for the last 4–5 years.

One of the neighbors with 2 young children has always greeted us when we show up by gathering her children together, running into the house, closing the garage door and all the windows.

I wanted to tell you about a reaction from one of our customers neighbors the other day.

5 of 9.

I thought that this year would be different, seeing as pesticides were banned. Well, I was wrong. She played out the same scenario (verbally and physically I may add) but instead of saying to the kids out loud as she usually did -- “ *They are spraying pesticides kids, time to go inside* ” she said “ *They are using fertilizer Kids, time to go inside* ”. We did not even apply any organic/synthetic pesticides at all.

I truly appreciate your efforts in making the public aware of the many falsities these Slacktivists are promoting.

# Consequences.

## Part 1.

13/05/2009

# Mission Accomplished for the Environmental Terrorists.

### *Elimination of employment.*

The destructive policies advocated by the environmental movement will lead to the needless elimination of tens of thousands of stable jobs.

**Tens of thousands unemployed!**

### *Annihilation of companies.*

The destructive policies advocated by the environmental movement will lead to the needless annihilation of thousands of stable businesses.

**Thousands of business failures.**

6 of 9.

### *Disruption of home life.*

The destructive policies advocated by the environmental movement will lead to the needless disruption of tens of thousands of stable homes.

**Tens of thousands homes lost.**

### *Destitution and despair.*

The destructive policies advocated by the environmental movement will lead to needless suffering and hardship for tens of thousands of professionals.

**Tens of thousands suffering.**

## Part 1.

13/05/2009

**FORCE OF NATURE** was launched for continuous transmission on the Internet on January 1<sup>st</sup>, 2009. It is a series of e-newsletters destined for the **GREEN SPACE INDUSTRY**, the **ENVIRONMENTAL MOVEMENT**, politicians, municipalities, and the media, nation-wide across Canada, and parts of the United States. **FORCE OF NATURE** is produced in two parts. First. The **MEDIA REPORT** itself that reports on the current events affecting the future of the **GREEN SPACE INDUSTRY**.. Second. **INDEPENDENT PERSPECTIVE**., which is a running commentary, sometimes also of a more technical in nature.

**FORCE OF NATURE** is the brainchild of William H. Gathercole and his entourage. The opinions expressed in these e-newsletters, even though from an independent perspective, may not reflect those of everyone in the **GREEN SPACE INDUSTRY**, or Mr. Gathercole's many associates. Be warned ! Mr. Gathercole and his team may sometimes be very irreverent and fearless with these e-newsletters.

William H. Gathercole holds a degree in Horticulture from the **UNIVERSITY OF GUELPH**, and another pure and applied science degree from **MCGILL UNIVERSITY**. He has worked in virtually all aspects of the **GREEN SPACE INDUSTRY**, including public affairs, personal safety, and environmental issues. Mr. Gathercole has been a consultant and instructor for decades. Mr. Gathercole has been following the evolution of **ENVIRONMENTAL TERRORISM** for over a quarter-century. His involvement in environmental issues reached a fevered pitch in the 1990s, when he orchestrated, with others, legal action against unethical and excessive municipal regulations restricting the use of pest control products. ( i.e. the Town of Hudson. ) Although he can be accused of being **ANTI-ENVIRONMENT-MOVEMENT**, he is, in fact, simply a strong advocate for the **GREEN SPACE INDUSTRY**. However, this position has not precluded him from criticizing the industry itself. Nonetheless, his vast knowledge of our long journey with environmental issues is **UNDENIABLE**. ( Hopefully ! ) For many years, Mr. Gathercole has been a contributing columnist for **TURF & RECREATION Magazine**, Canada's Turf and Grounds Maintenance Authority.
