

*Once upon a time ...*

*... enviro-maniacs would  
recommend organic food  
as a safer alternative to  
conventional food.*

**THE SCARE-MONGERING TACTICS EMPLOYED BY ENVIRO-MANIACS  
HAVE YET AGAIN BEEN PROVEN TO BE EXAGGERATIONS AND LIES.**

*We are expected to  
believe that maniacs  
are a credible group  
of environmentalists.  
They certainly cannot  
be trusted about  
organic food products.*

*Enviro-maniacs  
are not researchers.  
They are not scientists.  
They were totally wrong  
about organic food.  
To be blunt,  
enviro-maniacs cannot  
be trusted regarding  
pest control products !*
