The Modern Green Space Industry can be Described as the Planet's Great Conservationist with its Outstanding and Innovative Ideas

Day after day after day — written in the newspapers, heard on the radio, seen on the television, and displayed throughout cyberspace — the Environmental-Terror-Movement (a.k.a. the ecology or natural lawn care movement) is urging for measures to TERRORIZE and DESTROY the Modern Green Space Industry, with ideas that have little basis in fact or science.

Nonetheless, the Environmental-Terror-Movement has gained some powerful allies, such as law-makers and policy-makers who are spineless and naïve co-conspirators.

Many versions of the following phrase have been heard — the world would be a better place if lawns and golf courses were maintained more ecologically or more naturally.

If each of us received five cents every time we heard this phrase, we would be literally spitting gold ingots.

Let's think for a minute ! How does this phrase really apply to the Modern Green Space Industry ? It's not complicated.

The MODERN GREEN SPACE INDUSTRY CAN BE DESCRIBED AS THE PLANET'S GREAT CONSERVATIONIST.

For generations, the Modern Green Space Industry has been maintaining and conserving the world's largest ground cover vegetation, and has CONTRIBUTED EXTENSIVELY TO THE BEAUTIFICATION OF OUR URBAN LANDSCAPES, and THE PRESERVATION OF OUR ENVIRONMENT.

By contrast, Enviro-Maniac-Activists, and their Environmental-Terror-Organizations, can be more precisely identified as RADICAL PRESERVATIONISTS that could not care less about the beautification of our Urban Landscape.

Enviro-Maniac-Activists pretend that the use of pest control products is not compatible with natural settings.

Enviro-Maniacs prefer JUNK LAWNS and JUNK LANDSCAPES

Nonetheless, Environmental-Maniac-Activists have pretentiously proclaimed that the natural environment needs their stewardship.

Enviro-Maniac-Activists are obsessed with preserving our world with ANTI-MODERNIST and ANTI-TECHNOLOGY thinking. They thrive on JUNK SCIENCE, and resort to LIES rather than the truth.

It is a fact that Enviro-Maniac-Activists are inherently OPPOSED to the modern maintenance of turfgrasses and the beautification of the Urban Landscape. (One notable exception is Audubon International, but not Audubon state organizations.)

Enviro-Maniac-Activists PREFER JUNK LAWNS and JUNK LANDSCAPES that are unaltered by human activity, and are INFESTED with damaging weeds, insects, and disease ... just as the Enviro-Maniacs INFEST our society.

These ENVIRO-TERRORISTS particularly dislike the cosmetic standards used for the maintenance of golf courses, which are arbitrarily considered too lofty.

Enviro-Maniac-Activists are re-enacting the needless conspiracy against DDT. They are proceeding to TERRORIZE and ANNIHILATE the Modern Green Space Industry, just like they did with the makers of DDT !

Farmers Are Environmentalists Too

U.S. Alliance For Food and Farming

Retrieved from Web Site

September 23rd, 2010

American farmers have a vested interest in ensuring the SUSTAINABILITY OF THEIR FARMING OPERATIONS. Most farmers and their families have lived and worked on the land they farm for generations, which is strong motivation for using the most up-to-date and safest tools to control pests and diseases.

Pesticides are serious business and safety is the number one concern. Regulations governing the use of pesticides are prevalent at the federal, state and county levels. The State of California, where a large percentage of fresh fruits and vegetables are grown, has the STRICTEST LAWS IN THE NATION GOVERNING PESTICIDES. In fact, before farmers can apply a pesticide in California, they must comply with over seventy individual laws and regulations.

These days, farmers are INCREASINGLY USING FEWER PESTICIDES, and those they do use are SAFER AND MORE ENVIRONMENTALLY FRIENDLY. Most farmers incorporate farming practices known as Integrated Pest Management, or IPM, which involve NON-CHEMICAL MEANS OF CONTROLLING PESTS, along with careful use of pesticides. Meanwhile, government regulators work to: evaluate the safety of approved pesticides for each and every crop; continually monitor pesticide use; measure environmental impact; and conduct sampling of foods to ensure any residues present are at safe levels.

US Farmers Are Environmentalists Too

American farmers have a vested interest in ensuring the sustainability of their farming operations. Most farmers and their families have lived and worked on the land they farm for generations, which is strong motivation for using the most up-to-date and safest tools to control pests and diseases.

Pesticides are serious business and safety is the number one concern. Regulations governing the use of pesticides are prevalent at the federal, state and county levels. The state of California, where a large percentage of fresh fruits and vegetables are grown, has the strictest laws in the nation governing pesticides. In fact, before farmers can apply a pesticide in California, they must comply with over 70 individual laws and regulations.

These days, farmers are increasingly using fewer pesticides and those they do use are safer and more environmentally friendly. Most farmers incorporate farming practices known as Integrated Pest Management, or IPM, which involve non-chemical means of controlling pests along with careful use of pesticides. Meanwhile, government regulators work to: evaluate the safety of approved pesticides for each and every crop; continually monitor pesticide use; measure environmental impact ; and conduct sampling of foods to ensure any residues present are at safe levels.

This section of our website covers many areas of pesticide concern including residues on food, the environment and problems associated with pesticide drift.

We hope you will find this information valuable and reassuring.

Pesticide Industry to Use Tax Dollars to Attack Critics

Environmental Working Group

[U.S. Environmental-Terror-Organization]

September 21st, 2010

Selected and adapted excerpts

The California Department of Food and Agriculture has awarded one-hundred-and-eighty thousand dollars in federal funds to finance an agri-business-chemical industry plan to COMBAT ITS CRITICS — Environmental Working Group [and other Environmental-Terror-Organizations].

California officials announced that the Alliance for Food and Farming would receive one-hundred-and-eighty thousand dollars to ...

<< [...] correct the misconception that some fresh produce items contain excessive amounts of pesticide residues. >>

The state press release added that the grant would go to REBUT ...

<< [...] claims by activist groups about unsafe levels of pesticides [that] have been widely reported in the media for many years, but have largely gone uncontested. [...] The goal is to generate more balanced media reporting and change public perception about the safety of produce when it comes to pesticide residues . >>

Positive Waves

Interesting and Innovative Ideas that could be adopted by the Green Space Industry

According to Environmental Working Group, a U.S. Environmental-Terror-Organization –

<< *This grant is a slap in the face of California's rapidly-advancing organic agriculture sector. While conventional produce has seen demand STAGNATE, [?!?!] organics are enjoying dynamic growth. The state should think twice about using U.S. taxpayers' money to attempt to give CHEMICAL-DEPENDENT [?!?!] industrial farming a competitive edge over organics.* >>

According to the Pesticide Action Network of North America, another U.S. Environmental-Terror-Organization, in 2008, California growers deployed 161 million pounds of pesticides on all crops. [So what ?] They used 53 million pounds of pesticides on crops whose growers comprise the Alliance for Food and Farming – head lettuce, leaf lettuce, celery, spinach, tomatoes, avocados, table and raisin grapes, wine grapes, peaches and strawberries. [Again ... so what ?]

According to public records examined by Environmental Working Group, Alliance For Food and Farming is chaired by Matt McInerney, executive vice president of Western Growers Association, an organization of large California and Arizona farmers.

California officials last week awarded the Western Growers Association two grants totalling almost one-million-dollars to create a website and other communications activities to promote specialty crops.

Last July, Alliance For Food and Farming set up a web site and press webinar to attack Environmental Working Group's Pesticide Guide, contending that there is « *no scientific evidence* » that a SMALL AMOUNT of pesticide residue on food « *represents any health risk* ».

NORAHG

Force Of Nature presents THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE from National Organization Responding Against HUJE that seek to harm the Green Space Industry (NORAHG). It is a series of Reports destined for the Green Space Industry, the Environmental Terror Movement, Governments, and the Media, nationwide across Canada, the United States, and overseas. The information presented in Force Of Nature has been developed for the education and entertainment of the reader by providing a sequence of historical events WITH COMMENTARY. The neutrality of these Reports might be disputed. Don't thank us. It's a public service. And we are glad to do it.

HUJE are identified on the basis of their statements, activities, affiliations, and whereabouts. Even though each Enviro Maniac Culprit is a misguided adversary, each still deserves our respect. The use of the terms Maniac, Culprit, Terrorist, or Basterd are not accusations of any legal wrong doing. Force Of Nature is simply holding Enviro Maniac Activists accountable for conspiring to change public policies that TERRORIZE, HARM, and THREATEN the Green Space Industry.

HUJE is a term used to describe Enviro Maniac Activists that routinely concoct FEAR MONGERING, FRAUDULENT LIES, MISCONCEPTIONS, COERCION, THREATS, DECEPTIONS, TERROR, and PARANOID CONSPIRACIES that are DESIGNED to SCAM and DECEIVE the public into believing there is some NON-EXISTENT danger with conventional pest control products. HUJE also SCAM and DECEIVE Government Officials into the NEEDLESS, SENSELESS, and MALICIOUS CONSPIRACY to PROHIBIT conventional pest control products that are FEDERALLY LEGAL, SCIENTIFICALLY SAFE, TOTALLY IRREPLACEABLE, and ABSOLUTELY INDISPENSABLE.

HUJE have created LOSS OF REVENUES, BUSINESS FAILURES, BANKRUPTCY, and UNEMPLOYMENT, inflicting DESPAIR and DESTITUTION for THOUSANDS of hapless victims throughout the Green Space Industry. The DEPRAVED INDIFFERENCE of Maniac Culprit Terrorist Basterd HUJE is viewed as a form of TERROR, HARM, and THREAT against the Green Space Industry.

This Report provides NO guarantee regarding accuracy or completeness. In no event shall Force Of Nature be liable for any incidental or consequential damages, lost profits, or any indirect damages. Force Of Nature is TOTALLY INDEPENDENT of any trade association or business operating within the Green Space Industry. The events, characters, companies, and organizations, depicted in this Report are not always fictitious. Any similarity to actual persons, living or dead, may not be coincidental. All information, excerpts, and pictures contained in this Report were found somewhere on the Internet, and may be considered in the public domain, serving one of the following purposes — archive, education, promotion, publicity, or press release.

Force Of Nature, and its various incarnations, is the brainchild of William H. Gathercole and his colleagues. Mr. Gathercole is a principal FOUNDER of the Modern Professional Lawn Care Industry in BOTH Ontario and Quebec. He holds a degree in Horticulture from the UNIVERSITY OF GUELPH, and another pure and applied science degree from MCGILL UNIVERSITY. He has worked in virtually all aspects of the Green Space Industry, including GOLF, PROFESSIONAL LAWN CARE, and CHEMICAL INDUSTRY, and has served in environmental compliance, government negotiations, public affairs, and workplace safety. Mr. Gathercole has supervised, consulted, programmed, and/or overseen the successful and safe execution of HUNDREDS OF THOUSANDS of pest control applications in the urban landscape. He has trained, instructed, and consulted with THOUSANDS of turf managers and technicians. Mr. Gathercole has also been an agricultural agronomist. For many years, Mr. Gathercole was a contributing columnist for TURF & Recreation Magazine, Canada's Turf and Grounds Maintenance Authority.

Mr. Gathercole and his colleagues have followed the evolution of ENVIRONMENTAL TERRORISM for over a quarter century. For FIFTEEN YEARS, the strategies designed and implemented by Mr. Gathercole and his colleagues guaranteed the control of the VERMIN OF ENVIRONMENTAL TERROR for the entire Modern Green Space Industry across Canada. Their involvement in Environmental Issues reached a fevered pitch in the 1990s, when he orchestrated, with his colleagues, legal action against the Forces of Environmental Evil in the Town of Hudson, Quebec.

Today, Mr. Gathercole is the ONLY TRUE RELIABLE WITNESS of the Hudson Affair. Mr. Gathercole is personally credited for crafting the Golf Industry Exception Status that endures to this day. He is also the creator of the signs that are now used for posting after application. His vast knowledge of our long journey with Environmental Issues is UNDENIABLE — hopefully ! Mr. Gathercole is now retired, although his name continues to appear as FOUNDER of Force Of Nature.
