Manitoba's Pesticide Ban

Manitoba's Prohibition Is Politically-Correct Rubbish

Provincial Prohibition Is Doomed-To-Fail

No One Wants This #@!!% Ban Nonsense

Government Will Inevitably Rescind Prohibition

Fiesta Herbicide Corruption In Manitoba Governments ?

Summary

Manitoba is a prairie province in Canada, with a population almost 1,400,000 people.

On April 22nd, 2014, Manitoba's pesticide-hating New-Democrat government announced its intent to legislate **reckless, arbitrary, & doomed-to-fail prohibition** against conventional pest control products used in the urban landscape.

This announcement came as **no surprise** since, on June 28th, 2013, Manitoba's pesticide-hating New-Democrat government had already announced that it sought to **impose prohibition**.

This announcement also came as **no surprise** since the New-Democrat government operated as the **political shield** for anti-pesticide and environmental-terrorist organizations that validate **politicized doctrines**, like prohibition, that are **politically-correct rubbish**.

New Democratic Party of Canada (NDP) is a subversive, dangerous, destructive, creepy, golf-hating, and anti-pesticide political party. It operates as the **political shield** for Canadian Cancer Society, Canadian Association of Physicians for the Environment (CAPE), and other environmental-terrorist organizations. NDP-operatives, known as New-Democrats, conspire to impose **provincial & national prohibitions** — this left-wing lunatic-doctrine will inflict catastrophic job-killing business and financial carnage nation-wide. New Democrats have been held accountable for destroying more lawn care businesses and killing more lawn care jobs than most other people on the planet ! A vote for NDP is a vote for further destruction of the lawn care industry. A vote for NDP is a vote for the destruction of the agriculture industry and the golf industry. Both federally and provincially, New Democratic Party conspires to **provincially & nationally prohibit** against conventional pest control products.

On April 24th, 2014 — a date which will live in infamy — Manitoba's *Environment Amendment Act (For Reducing Pesticide Exposure)* was legislated with the express purpose of **prohibiting** conventional pest control products used in the urban landscape (i.e. residential home properties). It came into force on May 1st, 2015.

On December 17th, 2014, Manitoba's pesticide-hating New-Democrat government registered the *Non-Essential Pesticide Use Regulation* under the *Environment Act* which further restricted the sale and use of conventional pest control products. It also came into force on May 1st, 2015.

Manitoba's 2015 provincial prohibition was **doomed-to-fail** since it has created **catastrophic ecological carnage** of uncontrolled, invasive, and destructive weeds. Without conventional pest control products, green spaces and hard-landscapes became **weed-infested and dangerous garbage dumps** because it is **impossible** to maintain them by relying upon so-called **alternatives**. Because of **reckless, arbitrary, & doomed-to-fail prohibition** against conventional products like Killlex and Par III herbicides, Manitobans are being arbitrarily forced to rely on **inferior & more hazardous green alternative pesticides** like Fiesta Herbicide.

No One Wants #@!!% Inferior Alternatives — Because Manitobans were forced to rely on green alternatives like Fiesta (a.k.a. Weed-B-Gon), their urban green spaces were destroyed with uncontrolled, invasive, and destructive weeds. Fiesta is **inferior** and **almost-totally-ineffective**. The vast majority of users **overwhelmingly condemn** Fiesta.

Corrupt Shilling Of Fiesta Herbicide By Government Officials — In order to validate Manitoba's prohibition, government officials have been perpetuating the **fake-news** that Fiesta Herbicide, an **inferior** green alternative pesticide, can successfully replace the single-application of conventional products such as Killlex and Par III. This is **wrong** ! In fact, Fiesta **cannot** be used to validate **any** prohibition. Fiesta is **inferior** ! In addition, these government officials have gone so far as to operate as **salesmen** for Fiesta Herbicide with **unauthorized covert & insincere promotion**. Are they **corrupt shills** for Fiesta ?!?!

Is There Fiesta Herbicide Corruption In Manitoba Governments ? — In the province of Manitoba, government officials may be **endorsing** Fiesta Herbicide in public forums under the pretense of sincerity, when in fact they may be simply paid as **salesmen**. Who has authorized these government officials to be **corrupt shills** for Fiesta Herbicide ?!?! Examples of Fiesta **shilling** have been found at both the provincial and the municipal levels of government. Why are provincial and municipal officials providing **unauthorized free promotion** for this commercial product ?!?! Why have these officials misappropriated tax-payer's money promoting Fiesta ?!?! Who is paying government officials to covertly operate as **shills** for Fiesta ?!?! It is common knowledge that Fiesta is supported by wealthy and prominent environmental-terrorist organizations. Is there **corruption** of government officials by these organizations ?!?! Do we want to live in a society where we are exposed to **unauthorized, covert, corrupt, & insincere shilling** by government officials.

Pesticide-hating New-Democrat government-leaders attempted to **falsely-reassure** the public that so-called safe and effective green alternatives were already available to replace conventional pest control products. [WRONG !]

They even **showcased** a bottle of Fiesta during a press conference.

By 2017, two years after the imposition of **reckless, arbitrary, & doomed-to-fail prohibition**, Manitobans were forced to rely on **inferior alternatives** like Fiesta (a.k.a. Weed-B-Gon), and had lost their green spaces because it is **almost-totally-ineffective**.

Fiesta Corruption In The Government Of Manitoba !?! — Mackintosh was an elected official and Manitoba cabinet minister with New Democratic Party (NDP). He conspired to prohibit against pest control products that are federally legal, scientifically safe, practically non-toxic, and will cause **no** harm. Sadly, he also operated as a mere sales representative for Fiesta Herbicide. Mackintosh attempted to falsely reassure the public that so-called safe and effective green alternative pesticides like Fiesta were already available to replace conventional pest control products. Mackintosh **covertly advertised** a bottle of Fiesta on the table in front of him during a press conference announcing the imposition of Manitoba's 2015 provincial prohibition. How much money was donated to NDP for the **unauthorized covert & insincere shilling** of Fiesta !?! Is this an example of **corruption** with a government official being supposedly remunerated by the manufacturer of Fiesta !?!

Manitoba's 2015 provincial prohibition has been a **dismal failure** since it has provided **inconsistent & unfair exception statuses** for certain uses against invasive & destructive weeds & insects —

- for forestry activities
- for golf course operations
- for high-risk noxious weeds & poisonous or invasive species [on government-owned properties only ?]
- for lawn bowling, tennis, or cricket
- for pest or nuisance insects
- for professional or internationally used sports fields
- for sod farms
- for vegetable, fruit, or ornamental garden beds
- **but NOT for lawn care businesses**

— in order to be consistent & fair, there should be **no #@!!%** exception statuses whatsoever in Manitoba.

Municipalities Do Not Want This #@!!% Ban Nonsense ! — Manitoba's 2015 provincial prohibition was arbitrarily imposed in **defiance** of municipalities that publicly **opposed** prohibition, such as —

- Altona
- Portage La Prairie
- Steinbach [See later segments.]
- Stuartburn
- Winkler.

This #@!!% Ban Nonsense Defies Science ! — Manitoba's prohibition was also imposed in **defiance** of Health Canada's science-based assessments that have demonstrated that pest control products are scientifically-safe and will cause **no** harm.

The Majority Does Not Want This #@!!% Ban Nonsense ! — The **majority** of Manitobans say **no**. The scientific evidence backing up Manitoba's **doomed-to-fail prohibition** just isn't there. The only people who want prohibition are a small minority of pesticide-hating fanatics with vested interests in concocting imaginary danger

against pest control products. We **know** the majority of Manitobans **do not** want prohibition, as confirmed by viewing the results of legitimate polls.

The Public Everywhere Does Not Want This #@!!% Ban Nonsense ! — A Winnipeg Free Press poll showed that 60 per cent were **opposed** to prohibition. Yet another newspaper poll reported that a majority of Manitobans **do not** want prohibition. The majority rejection is not just confined to Manitoba. A BC poll conducted by Canadian Consumer Specialty Products Association (CCSPA) showed that the vast majority of residents are **opposed** to prohibition, and they actually favour the continued use of these products around their homes and in public green spaces. Moreover, an Ontario poll showed that the public **rejects** prohibition, and more than half of Ontario residents believes that the provincial government **did not** do the right thing by imposing an arbitrary prohibition in 2009. Ontario residents would rather have their provincial prohibition scrapped or modified. Finally, Canadian Association of Agri-Retailers (CAAR) says there is **questionable public support**.

Fortuitously, on April 19th, 2016, the Manitoba's pesticide-hating New-Democrat government was **defeated** by the Progressive Conservative Party of Manitoba, led by Mr Brian Pallister. This signaled the end of the 17-year New-Democrat reign of politicized anti-pesticide & environmental terrorism ! Observers expect that the Pallister Government will inevitably **rescind** Manitoba's 2015 provincial prohibition.

Steinbach's Opposition

First Call To End Provincial Prohibition

#@!!% Ban Nonsense Opposed Since 2012

Summary

Steinbach is a city located in the province of Manitoba, near Winnipeg, with a population of almost 16,000.

Since 2012, Steinbach's city council **joined other municipal councils** to publicly urge the government of Manitoba to **drop** its plans for a provincial prohibition against pest control products used in the urban landscape.

These city councils believe that **people should have the right to choose for themselves** how they best take care of their own residential properties, and the city should be able to choose how it takes care of its own city-owned properties.

Steinbach Renews Call To End Pesticide Ban

<http://pesticidetruths.com/wp-content/uploads/2019/12/Reference-Manitoba-Steinbach-2019-11-21-Steinbach-Renews-Call-To-End-Pesticide-Ban.pdf>

Steinbach's Resolution

Demands An End Provincial Prohibition

#@!!% Ban Nonsense Does Not Make Sense

[The city of Steinbach, located in the province of Manitoba,] has struggled to control weeds like dandelions under the pesticide ban [a.k.a. Manitoba's 2015 provincial prohibition] .

Steinbach city council has UNANIMOUSLY APPROVED A RESOLUTION that renews its call on the Manitoba government to END THE BAN against pesticides for cosmetic use.

Deputy Mayor Michael Zwaagstra introduced the RESOLUTION saying it is important for the city to reiterate this message ahead of the annual meeting of the Association of Manitoba Municipalities [in late November 2019].

He explains why the city WANTS THE RIGHT TO USE PESTICIDES as it did before the ban was introduced four year ago.

According to Mr Michael Zwaagstra, Deputy Mayor of Steinbach, Manitoba —

We see the effects of the pesticide ban, which has been in place since 2015.

[Steinbach's Catastrophic Ecological Carnage —]

The reality is, is that THERE ARE A LOT MORE WEEDS in city parks and sports fields than before, and that's because the replacement products are NOT AS EFFECTIVE as traditional products such as Par III.

As a city, we believe that municipalities should be able to DECIDE FOR THEMSELVES what type of weed control to use.

[Steinbach's Catastrophic Financial Carnage —]

The COSTS of the alternatives that we've had to use are more than DOUBLE, so we're paying more than DOUBLE for LESS EFFECTIVE weed control, and that's just simply NOT ACCEPTABLE.

[Manitoba's #@!!% Pesticide Ban Nonsense Has Inflicted Stunningly Exorbitant Costs On Steinbach. There Are No Viable Alternatives To Pesticides.]

We need to have the best weed control possible, and that requires a CHANGE TO THE CURRENT BAN that's in place.

Mr Zwaagstra adds, effective herbicides like Par III [a combination of 2,4-D, mecoprop, dicamba] have been approved by Health Canada as being SAFE, so the BAN DOES NOT MAKE SENSE.

According to Mr Zwaagstra —

They are SAFE for use when they are applied properly.

So, as long as the instructions are followed, Health Canada says these products can be USED SAFELY by people.

Steinbach's Catastrophic Financial Carnage

The Stunningly Exorbitant Costs Of
The #@!!% Pesticide Ban Nonsense

Prohibition Cost Increase From \$16,000 To \$200,000
Annually To Maintain Pesticide-Free Green Space

Prohibition Expected To Inflict At Least A Ten-Fold Cost Increase

Summary

The city of Steinbach, located in the province of Manitoba, has faced a **huge increase** in the cost of weed control due to the province's **reckless, arbitrary, & doomed-to-fail prohibition** against conventional pest control products, which took effect in 2015.

Prior to 2016, Steinbach had spent approximately **\$16,000 per year** on weed control throughout the city.

In order to follow Manitoba's 2015 provincial prohibition, and using green alternative pesticides (i.e. Fiesta, an inferior green alternative herbicide) foolishly recommended by the province, Steinbach will be spending upwards of **\$200,000 per year**.

That's well over **ten times** the cost of what was done with safe and effective conventional products.

Who can afford this #@!!% ban nonsense !?!?

Steinbach's government officials think this is **unacceptable**.

They are frustrated with Manitoba's 2015 provincial prohibition because it is **not based on science**.

Nevertheless, as of 2019, Steinbach has given **public notice** that it intends to conduct pesticide control programs by using conventional products on road allowances, boulevards, in parks, green spaces, and cemeteries.

The conventional herbicides used included Par 3 and Roundup.

The conventional insecticides used included Deltagard, Malathion, Pyrate, or Pyrinex.

No one can afford this #@!!% ban nonsense ?!?!

Financial Carnage Inflicted By Prohibition

The Stunningly Exorbitant Costs Of
The #@!!% Pesticide Ban Nonsense

Summary

Pesticide-free maintenance practices (a.k.a. organic) are **stunningly expensive** and are **not economically viable**.

Reckless, arbitrary, & doomed-to-fail prohibitions have created **catastrophic pest problems** that have invaded city-owned & residential properties, have inflicted garbage dump green spaces, and have **cost stunningly exorbitant amounts of money !**

These problems have come as **no surprise** to observers who have repeatedly warned that it is impossible to keep pesticide-free green spaces from becoming **pest-infested & dangerous urban garbage dumps** unless conventional pest control products are allowed.

The **stunningly exorbitant costs** of pesticide-free (a.k.a. organic) maintenance practices are due to factors such as green alternative pesticides, manual labour for weed-picking, and re-construction once the properties have degraded into total garbage dumps.

No one living in prohibition-jurisdictions wants to live in #@!!% weed-infested, insect-damaged, and expensive garbage dumps !

Consequently, prohibitions have been **doomed-to-fail** for jurisdictions throughout North America !

Who can afford this #@!!% ban nonsense !?!?

Here are the facts ...

Pesticide-free (a.k.a. organic) maintenance practices are dismal failures because safe and effective conventional pest control products cannot be used — they are **recklessly and arbitrarily prohibited** by some local governments.

Prohibitions inflict the **catastrophic financial carnage with the stunningly exorbitant costs of pesticide-free maintenance.**

In all jurisdictions, prohibitions have inflicted hardship and unbelievable burdens to the tax-payers, with **hundreds of millions of dollars in needless costs** throughout North America.

No one, except pesticide-hating fanatical-activists, want the hardship and the cost of this #@!!% nonsense.

Prohibitions have cost municipalities tens-of-thousands, and even millions-of-dollars per year, in order to maintain green spaces and hard landscapes with pesticide-free practices.

A **Major Study of British Columbia's municipal by-laws** has concluded that municipal prohibitions inflict the **catastrophic financial carnage.** [See link below.]

The stunningly exorbitant costs when maintaining pesticide-free city-owned properties, or when relying on the **futile** practices of Integrated Pest Management (IPM) —

- For municipalities with 400,000 residents or more — \$1,000,000 or more per year.
- For municipalities with 250,000 residents or more — \$250,000 or more per year.
- For municipalities with 100,000 residents or more — \$100,000 or more per year.
- In the cases of **small municipalities**, with less than 50,000 residents, maintenance costs increase by \$30,000 or more per year.
- In the cases involving the maintenance a small number of **pesticide-free sport fields** has led to cost increases of \$30,000, or more, per year when relying on inferior **Fiesta** green alternative herbicide — a product that is **almost-totally-ineffective** unless multiple applications are used.

- In the case of **Delta, British Columbia**, a municipal **lawn bowling club** spent a stunningly exorbitant \$400,000 for the installation of artificial grass, because of prohibition.
- In the case of **Kamloops, British Columbia**, maintaining pesticide-free hard-surfaces and infra-structures, requiring a two-man crew for manual weed picking, has cost at least \$60,000 per year, because of prohibition.
- In the case of **Steinbach, Manitoba**, with a population of 15,000, prohibition costs increased from \$16,000 to \$200,000 annually in order to maintain pesticide-free green space. That's well over 10 times the cost of what was done with safe and effective conventional products, because of prohibition.

Municipalities are not able to afford the high cost of labour needed to manually remove millions of pests.

The **catastrophic financial carnage** is high — in the hundreds of millions of dollars.

Municipalities cannot afford this #@!!% ban nonsense ?!?!

Green Alternatives

There Are No Viable Alternatives To Pesticides

There Are Only Inferior Alternatives
That Are Almost-Totally-Ineffective

Summary

According to Mr Paul Visentin —

*I wouldn't be as concerned about [pesticide bans] if there were any **alternatives** available for us to use commercially—or for the home-owner to use for that matter.*

*These are **alternatives** that Health Canada has to approve, not the **alternatives** * that [...] are cooked up in the kitchen and thrown out on the yard.*

[* a.k.a. illegal home-made concoctions – see later segment for more details.]

*These are **alternatives** that Health Canada actually does testing on to ensure that they're safe for people and the environment.*

*There just **aren't** any **alternatives** out there that **work**.*

*They're **ineffective**.*

*They're **costly**.*

You have to use them in two, three, four times the amounts that they say to get any results out of them.

*When we go in a yard to do some treatments on a commercial basis, we just **don't use alternative processes** — other than some cultural issues in the pesticide ban areas.*

[See later Note regarding Mr Visentin.]

Prohibitions are **reckless, arbitrary, & doomed-to-fail** because they have created self-inflicted **catastrophic ecological carnage** caused by uncontrolled, invasive, and destructive pests.

Alternatives are **almost-totally-ineffective** to adequately control these pests.

Green alternative pesticides are **bogus, inferior, & dismal failures**.

Because of municipal prohibitions, city-owned green spaces and residential properties have been **severely damaged & destroyed**, and have been turned into **pest-infested & dangerous garbage dumps**.

Without conventional pest control products, city-owned green spaces and residential properties have become **pest-infested & dangerous garbage dumps** because it is **impossible** to control invasive weeds and destructive insects by using pesticide-free (a.k.a. organic) maintenance practices that include green alternatives.

Municipal prohibitions have led to **catastrophic pest carnage** for tens of thousands of destroyed and ravaged properties every single year.

This is because there are **no** viable, **no** efficacious, **no** economical, and **no** low-risk alternatives to replace conventional pest control products.

Because of municipal prohibitions, inferior green alternatives are incorporated into pesticide-free (a.k.a. organic) maintenance practices — not because they work — but because of legislation that **overwhelmingly & unfairly favours** these alternatives.

Professionals, and even home-owners, are being prevented from using conventional products that are truly effective as well as scientifically safe.

By definition, alternatives are **inferior**, which is why they **did not** win the market-place originally.

Overall, green alternative pesticides are **almost-totally-ineffective, inadequate, inferior, high-risk, more toxic, & stunningly expensive**.

Pesticide-free (a.k.a. organic) maintenance practices — that are — have created self-inflicted **catastrophic financial carnage** because green alternatives that have cost **stunningly exorbitant amounts of money** — tens and tens of millions of dollars.

European chafer insects, Japanese knotweed, and Japanese beetle insects, and others, have become uncontrolled, invasive, and destructive pests — **because** of prohibition.

It is **impossible** for professionals, and even home-owners, to protect their properties by using so-called green alternative pesticides.

Hence, municipal prohibitions have been created with so-called **exception statuses**.

In order to be consistent & fair, there should be **no** **exception statuses** whatsoever in Manitoba.

A **Major Study of British Columbia's municipal by-laws** has concluded that municipal prohibitions are **doomed-to-fail**. [See link below.]

This is because municipal officials are known to **circumvent** their own prohibitions by allowing thousands and thousands of inconsistent and unfair **exception statuses** that they have been conveniently inserted in their by-laws **to avoid the use of green alternatives**.

In many cases, these alternatives are questionably higher in toxicity, and pose higher environmental risks.

Note. Mr Paul Visentin has been Director of Integrated Environmental Plant Management Association of Western Canada (IEPMA), and Owner of a Professional Lawn Care business in Cranbrook, East Kootenays, British Columbia.

Fiesta Green Alternative

Fiesta Herbicide Is A Fake-News Myth

Fiesta Corruption In Manitoba Governments ?

Unauthorized, Covert, Corrupt, & Insincere Shilling
Of Fiesta Herbicide By Government Officials

Summary

Fiesta Herbicide (a.k.a. Scotts EcoSense and Weed-B-Gon) is a primary reason for the repeated failures of provincial & municipal prohibitions imposed against conventional pest control products used in the urban landscape.

With the adoption of these **reckless, arbitrary, & doomed-to-fail prohibitions**, professionals and residents are being forced to rely on this inferior green alternative herbicide.

In fact, Fiesta is **almost-totally-ineffective** as a single-application weed control product.

The vast majority of Fiesta users **overwhelmingly condemn** it.

In order to validate anti-pesticide prohibition, government officials have been perpetuating the fake-news myth that a single application of Fiesta Herbicide, an **inferior** green alternative pesticide, can successfully replace conventional products such as Killex and Par III.

This is **wrong** !

In fact, Fiesta **cannot** be used to validate **any** prohibition.

Fiesta is **inferior** !

In addition, these government officials have gone so far as to operate as salesmen for Fiesta Herbicide with **unauthorized covert & insincere shilling**.

Are they **corrupt shills** ?!?!

Are they salesmen **shilling** for the manufacturer of Fiesta ?!?!

Are they being **remunerated** by the manufacturer of Fiesta ?!?!

Is there Fiesta **corruption** in Manitoba governments ?

Do they realize that Fiesta Herbicide is **inferior** and a **dismal failure** ?!?!

Sadly, Fiesta is **almost-totally-ineffective** when compared to single-applications of conventional products like Killex, Par III, and other so-called three-way herbicides.

In fact, quite often, it would be better to do **nothing** rather than use Fiesta Herbicide.

Unfortunately, government officials have failed to admit that Fiesta is **almost-totally-ineffective, higher-risk, inadequate, more toxic, overwhelmingly condemned, and stunningly expensive**.

Instead of admitting that #@!!% Fiesta sucks, they prefer living in the world of fake-news.

Government officials who operate as **corrupt shills** may be attempting to spread buzz by personally endorsing Fiesta Herbicide in public forums under the pretense of sincerity, when in fact they are being paid as salesmen.

Who has **authorized** government officials to be **shills** for Fiesta Herbicide ?!?!

Examples of **corrupt Fiesta shilling** have been found at both the provincial and municipal levels of government.

Why are provincial and municipal officials providing unauthorized free **shilling** for this commercial product ?!?!

Why are they misappropriating tax-payer's money promoting this product ?!?!

Who is paying government officials to **covertly operate as unauthorized shills** for Fiesta Herbicide ?!?!

Fiesta Herbicide is supported by wealthy and prominent environmental-terrorist organizations.

Is there Fiesta Herbicide **corruption** in Manitoba governments initiated by these organizations ?!?!

Do we want to live in a society where we are exposed to **a conspiracy of unauthorized covert & insincere promotions** by government officials who operate as **shills** ?!?!

Is There Fiesta
CORRUPTION
In Manitoba
Governments?

Municipal Prohibition Failures

Major Study Shows Expect Dismal Failures

Summary

Manitoba's prohibition laws are **politically-correct rubbish**.

Manitobans need to know more about **municipal prohibition failures**.

A **Major Study of British Columbia's municipal by-laws** has concluded that municipal prohibitions against pest control products are DISMAL FAILURES.

This is because municipal officials are now **circumventing** their own doomed-to-fail prohibitions by taking advantage of exception statuses that they have **conveniently inserted** in their by-laws.

Municipal prohibitions have provided inconsistent & unfair exception statuses for invasive weeds & destructive insects — for municipal properties — but **not** for lawn care businesses and even residential homes.

In order to be consistent & fair, there should be **no** exception statuses whatsoever, either in British Columbia or in Manitoba.

Consequently, municipal prohibitions have annihilated legitimate & tax-paying businesses that operate in the professional lawn care industry.

These businesses **cannot** afford the hardship & the cost of this prohibition nonsense !

Once any prohibition is adopted, local lawn care businesses are expected to disappear into oblivion within 2 or 3 years, and vast numbers of professional workers are expected to become unemployed.

Additionally, for those residents with the same pest problems on their home properties, they may be shxt-outta-luck relying on **any** exception.

Without conventional pest control products, home properties have become pest-infested & dangerous **garbage dumps** because it is impossible to control invasive weeds & destructive insects by using pesticide-free (a.k.a. organic) maintenance practices that include green alternatives.

Municipal prohibitions have led to **catastrophic ecological carnage** for tens of thousands of destroyed & ravaged properties every single year.

British Columbia's municipal exception statuses represent the best examples of the failures, the ridiculousness, and the destructiveness of their anti-pesticide prohibitions.

Municipal prohibitions have been **disgustingly arbitrary** in their flagrant discrimination against professional lawn care businesses and home properties !

In order to be consistent & fair, there should be **no #@!!%** exception statuses whatsoever !

Illegal Home-Made Concoctions

Violators Must Be Ratted-Out

Summary

Illegal home-made concoctions are **almost-totally-ineffective**, and all are potentially harmful and possibly fatal.

Their use, as well as recommendations for their use, represent a **danger** to our children, a **danger** to adults, and a **danger** to the environment.

It is abhorrent that a violator even recommends (and perhaps sells) these concoctions for mere publicity and profit.

These concoctions may cause **harm** and may cause **death** !

These concoctions **fail** to be government-approved, **fail** to be federally-legal, **fail** to be scientifically-safe, and **fail** to be anything other than potentially harmful and fatal.

Why would a violator be even remotely interested in recommending and selling harmful and fatal concoctions ?!?!

Why would a violator ridiculously imply that he/she somehow has any expertise on pest control products ?!?!

Only the EPA, and its counterpart Health Canada, has the essential expertise on pest control products, and certainly **not** any violator.

Why bother with national regulatory agencies since all of their decisions are being reversed by a violator ?!?!

His/her activities are **intolerable** and **dangerous** !

If a violator can't be a good example, then he/she will just have to serve as a horrible warning.

A violator deserves the spotlight of **scrutiny** and the terrxr of the **courts**.

The REAL Trends

There Are REAL Trends Against Reckless, Arbitrary, & Doomed-To-Fail Prohibitions

Summary

Government officials are no longer readily jumping in favour of **reckless, arbitrary, & doomed-to-fail prohibitions**.

It is clear that pesticide-hating fanatics conspire to impose prohibition in order to destroy our green space environments.

Unfortunately, it is **impossible** to keep green space environments well-maintained, safe, and attractive without conventional pest control products.

Playing surfaces become thin and yellow, and over-run with weeds and infested with insects, resulting in the dismal destruction of turf playing surfaces.

Children are at high risk of slipping and tripping and becoming **seriously hurt**.

In essence, pest control products prevent injuries and keep children safe.

There are over **sixty** jurisdictions that have **stopped** or **rescinded** or **limited** or have begun to **repeal** doomed-to-fail prohibitions, or have granted commercial businesses with an **exception status**.

The following jurisdictions have joined the REAL trends against reckless, arbitrary, & doomed-to-fail prohibitions ...

- Alberta (Province)
- Altona (Manitoba)
- Anne Arundel County (Maryland)
- Ashland (Oregon)
- Beaumont (Alberta)
- Belleville (Ontario)
- Brazil (see notes below)
- British Columbia (BC, Province)
- Burnaby (BC)
- Calgary (Alberta)
- California (State – see notes below)
- Campbell River (BC)
- Charlottetown (Prince Edward Island)
- Chicago (Illinois)
- Coquitlam (BC)
- Deer Lake (Newfoundland)
- Delta (BC)
- Durango (Colorado)
- Edmonton (Alberta)
- European Union (EU, nations of – see notes below)
- Everett (Washington)
- Gibsons (BC)
- Golden (BC)
- Guelph (Ontario)
- Guelph-Eramosa (Ontario)
- Hudson (Quebec – see notes below)
- Kamloops (BC)
- Kaua'i County (Hawai'i)
- Kelowna (BC)
- Lawrence (Kansas)
- Lincoln City (Oregon)
- Maine (State)
- **Manitoba** (Province – see notes below)
- Merritt (BC)
- New Brunswick (Province)
- Newfoundland (Province)
- Ontario (Province – see notes below)
- Parksville (BC)
- Port Alberni (BC)
- Portage La Prairie (Manitoba)
- Prince Edward Island (Province)
- Qualicum Beach (BC)
- Quebec (Province – see notes below)
- Regina (Saskatchewan)
- Revelstoke (BC)
- Rossland (BC)
- Saanich (District of, BC)
- Saint John's (Newfoundland)
- Saint Josephine (Oregon)
- Salmon Arm (BC)
- Saskatchewan (Province)
- Scarborough (Maine)
- Steinbach (Manitoba)
- Stratford (Prince Edward Island)
- Stuartburn (Manitoba)
- Summerside (Prince Edward Island)
- United Kingdom (UK – see notes below)
- USA (see notes below)
- Vancouver (BC)
- Vernon (BC)
- Winkler (Manitoba)

Read the following notes ...

- Brazil — Brazil's Anvisa Health Agency Says That Glyphosate Does Not Pose A Hazard To The Average Person
- California — Golf Course Saved After A Federal Judge Dismissed A Legal Challenge
- European Union — Glyphosate Re-Approved For Several Years
- Hudson (Quebec) — Existing Prohibition Morally Invalidated Since Several Government Officials Who Were Responsible For Prohibition Are Now Facing Charges Of Fraud, Corruption, & Tax-Evasion
- Manitoba — Observers Expect That the Pallister Government Will Rescind Provincial Prohibition
- Ontario — Proposed Amendment To Provincial Pesticide Ban Has Begun The Process To Repeal Provincial Prohibition
- Quebec — Provincial Prohibition Has Been Limited With Permitted Active Ingredients, & Also Invalidated Because Ban Has Been Defeated By Lawsuit
- United Kingdom — Suspended European Union Prohibition Against Neonicotinoid Insecticides
- USA — A Vast Majority Of States Have Legislated Pre-Emption Laws, Virtually All Proposed Prohibitions Stopped

Norah GFON

All bad prohibitions must come to an end

FORCE OF NATURE | DARING TO DEFEY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Depending Against BLUE that compete to occupy the Green space and other important resources

About NORAHG

We Speak The Whole Truth About Doomed-To-Fail Prohibitions From An Independent Perspective

We are the National Organization Responding Against HUIE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating fanatics (HUIE) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths. <https://wp.me/p1jq40-8DV>

Not surprisingly, enviro-fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brain-child of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the pesticide-hating fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORAHG

A woman with long blonde hair, wearing a dark cowboy hat and a black bikini, stands in a field of daisies. The background is a dark, textured wall with a repeating pattern of the word 'FAILURE' in red and white. The text 'Prohibition' is overlaid on the image in a large, white, serif font.
