National Organization Developing Against Health's Empire to Destroy the Food, Water and other Industries (NORAHQ)

New Canaan

Officials Now Support The Use Of Pesticides On Sports Fields

Victory against anti-pesticide prohibition —

New Canaan is a town in the state of Connecticut, USA, with a population of almost 20,000. It is known for its vast urban green spaces such as Waveny Park. By prohibiting conventional pest control products, sports fields in New Canaan, had become pest-infested & dangerous garbage dumps because it was impossible to control weed invasions & insect infestations by using pesticide-free (a.k.a. organic) IPM doctrines that include inferior-green alternatives. Pesticide-treated sports fields are far superior to those that are pesticide-free.

Municipalities, like New Canaan, must be well-informed about the risks, benefits, & limitations of conventional pest control products, as well as inferior green alternative pesticides & IPM doctrines that **DO NOT** work. Fanatical pesticide-free doctrines of Integrated Pest Management (IPM) are based upon mere truth-challenged emotion & **NOT** science-based facts. The failed, futile, & ineffective IPM doctrines have unfairly allowed New Canaan to use pesticides when it suits its politically-correct agenda ! Unfortunately, IPM is #@!!% nonsense & **WILL NOT** work. IPM is inappropriate for the maintenance of turfgrasses. IPM **WILL NOT** control infestations of recurring invasive weeds & destructive insects. New Canaan's use of IPM is politically-correct rubbish.

The safety of players using sports fields is the most important aspect of maintaining turfgrass. Municipalities, like New Canaan, are expected to be really careful about risks when using their sports fields, especially about head injuries, because that can create a sense of liability that municipal officials must be concerned about. Sports fields that **DO NOT** receive treatments of conventional pest control products will have harder surfaces, predictably they are more likely to cause player injuries like concussions.

Officials in New Canaan have concluded that the use of conventional pest control products on sports fields has a positive effect on their quality, playability, & safety. Municipalities that are **NOT** using conventional pest control products on any of their sports fields are **NOT** maintaining them properly. Continuing to use

conventional pest control products on sports fields is healthier & safer for players. There should be **NO** harmful-prohibitions against conventional pest control products. They are simply reckless, arbitrary, & doomed-to-fail.

Science-based research indicates that the bigger safety risk is from player injuries on hard surfaces of sports fields — & **NOT** from the use of conventional pest control products. There is **NO** science-based information that has identified any adverse health concerns with the use conventional pest control products on sports fields. People are likely to be exposed to only very small amounts of pesticide residues, too small to pose a risk, at levels that are well below the **NO**-effect level. After a pest control product dries on the turfgrass leaf, it is difficult, if not impossible, to dislodge residues off the leaf surface.

Thinking twice in New Canaan —

When it comes to pesticide bans, government officials in New Canaan are thinking twice about banning pesticides by looking at the experience of those jurisdictions that have suffered pest-infested & dangerous garbage dumps & stunningly exorbitant costs of this #@!!% nonsense !

There are real trends against pesticide bans —

The following jurisdictions stopped or rescinded or limited or opposed harmful-prohibition or granted professional lawn care businesses with an exception status — • Charlottetown • Chicago • Coquitlam • Deer Lake • Delta • Durango • Edmonton • European Union • Everett • Gibsons • Golden • Guelph • Guelph-Eramosa • Hudson • Kamloops • Kaua'i County • Kelowna • Lawrence • Lincoln City • Maine • Manitoba • Merritt • New Brunswick • New Canaan • Newfoundland • Ontario • Parksville • Port Alberni • Portage La Prairie • Prince Edward Island • Qualicum Beach • Quebec • Regina • Revelstoke • Rossland • Saanich • Saint John's • Saint Josephine • Salmon Arm • Saskatchewan • Scarborough • Steinbach • Stratford • Stuartburn • Summerside • United Kingdom • USA Pre-Emptions • Vancouver • Vernon • Winkler. The real trends against pesticide bans continue.

No one in New Canaan can afford this #@!!% nonsense —

Without conventional pest control products, playing surfaces become thin & yellow, & over-run with weeds & infested with insects, resulting in the dismal destruction of safe turf playing surfaces & turning them into garbage dumps. Who wants to live in #@!!% pest-infested garbage dumps in New Canaan just because a small group of fanabxcs seek to impose arbitrary pesticide bans?!?! Can municipalities & home-owners afford the hardship & cost of this #@!!% pesticide ban nonsense?!?! **NO !** Prohibitions are politically-correct rubbish. The public needs to know more about prohibition failures. It will continue to be impossible for municipal officials in New Canaan to keep its sports fields safe & attractive by using pesticide-free (a.k.a. organic) IPM doctrines that include inferior-green alternatives. No one in New Canaan can afford this #@!!% nonsense !

Voting Yes To Pesticides

Continuing To Use Conventional Pest Control Products On Sports Fields Is Healthier & Safer For Players

Saying it's HEALTHIER FOR ATHLETES, parks officials VOTED IN FAVOUR of a RECOMMENDATION TO KEEP USING PESTICIDES on New Canaan sports fields where it's legal to do so.

On December 9th, 2020, members of the « *Parks & Recreation Commission* » voted 7-1 during their regular meeting to recommend to the « *Board of Selectmen* » that New Canaan CONTINUE A MID-SUMMER APPLICATION OF PESTICIDES on fields at Conner, Mead Park, and Waveny.

Members of « *Parks & Recreation Commission* » VOTING IN FAVOUR of the RECOMMENDATION TO KEEP USING PESTICIDES included — Chair Rona Siegel, Carl Mason, Gene Goodman, Jack Hawkins, Steve Haberstroh, Laura Costigan, and Hank Green.

Pesticide-hating commissioner Francesca Segalas VOTED AGAINST the recommendation.

Matt Konspore and Jake Granito were absent.

Commission member Jack Hawkins said the RECOMMENDATION TO KEEP USING PESTICIDES by « *Parks & Recreation Commission* » relied on reports from both the « *New Canaan Fields Committee* » and Parks Superintendent John Howe.

[HOWEVER], in New Canaan, high school [SPORTS] fields [WILL REMAIN] PESTICIDE-FREE.

[AND], state law PROHIBITS the use of pesticides on school grounds through grade 8.

Athletes Need Pesticides

Science-Based Research Indicates That The Bigger Safety Risk Is From Player Injuries On Hard Surfaces Of Sports Fields — & Not From The Use Of Conventional Pest Control Products

The Safety Of Players Using Sports Fields Is The Most Important Aspect Of Maintaining Turfgrass

Sports Fields That Do Not Receive Treatments Of Conventional Pest Control Products Will Have Harder Surfaces, Predictably They Are More Likely To Cause Player Injuries Like Concussions

A consultant, « *Tom Irwin Advisors* » of Burlington, Massachusetts, created a report that compared the SURFACE HARDNESS of a grass [SPORTS] field treated with pesticides (Conner Field off of Farm Road) versus one that's pesticide-free (Saxe Middle Schools).

In making the RECOMMENDATION TO KEEP USING PESTICIDES, the « *Parks & Recreation Commission* » referred to a memo from the trio at the « *New Canaan Fields Committee* » —

- John Howe, Parks Superintendent
- Jay Egan, Athletic Director, New Canaan High School
- Steve Benko, Recreation Director

This trio said [SPORTS] FIELDS THAT DO NOT USE PESTICIDES ARE HARDER AND THEREFORE MORE LIKELY TO CAUSE CONCUSSIONS.

According to Jack Hawkins, member of the « *Parks & Recreation Commission* » who voted in favour of pesticides —

*Because what's, in my opinion, what's **MOST IMPORTANT** is the **SAFETY OF THE USERS** on those **[SPORTS]** fields.*

*And the research that we received, the research that we saw, indicates that the **BIGGER SAFETY RISK** is from sports injuries from a **HARD [SPORTS] FIELD** rather than from the use of pesticides.*

Positive Effects Of Pesticides

**Municipal Officials Have Concluded That
The Use Of Conventional Pest Control
Products On Sports Fields Has A Positive
Effect On Their Quality, Playability, & Safety**

**Pesticide-Treated Sports Fields Are Far
Superior To Those That Are Pesticide-Free**

The trio, identified as the « *New Canaan Fields Committee* », cited a 3000-dollar « *Core Performance Quality Standards Assessment* » of Conner and Saxe fields from consultant « *Tom Irwin Advisors* ».

According to the memo by the « *New Canaan Fields Committee* » —

*Based on the information provided in the [TOM IRWIN ADVISORS] report, the data shows that **THE USE OF PESTICIDES** on Conner Field has had a **POSITIVE EFFECT** on the **QUALITY AND SAFETY** of that field for athletic contests.*

*The other Park facilities that receive a **ONCE-A-YEAR APPLICATION OF PESTICIDES** are located at Waveny Park and Mead Park.*

*While these [SPORTS] fields were not included in the study completed by Tom Irwin Associates, it is our opinion that the **QUALITY AND PLAYABILITY** of these natural grass fields are **FAR ABOVE** those at Saxe [MIDDLE SCHOOL].*

No Concerns With Pesticides

There Is No Science-Based Information That Has Identified Any Adverse Health Concerns With The Use Conventional Pest Control Products On Sports Fields

Parks Superintendent John Howe said during the meeting that he takes an « *environmental-sensitive approach* » to turf management —

[...] where we look at all the environmental factors and we use every single tool we can, from managing our water to checking life cycles of insects, so you are not just applying chemicals for the sake of applying chemicals.

You are applying them to just go after the target organism as a last resort.

You do everything else that's positive — fertilization, irrigation, aerification, over-seeding, even proper mowing with sharp blades, and keeping the height of cut adjusted depending on the time of year.

It was unclear whether consultant « *Tom Irwin Advisors* », « *Parks & Recreation Commission* », or « *New Canaan Fields Committee* » limited their reviews to [**SPORTS**] field conditions or whether they also included the health impacts of pesticide use. [**?!?!**]

Jack Hawkins, member of the « *Parks & Recreation Commission* » who voted in favour of pesticides, helped draft a memo that said —

*There was no material provided to us that identified any adverse health concerns [**?!?!**] of the Park Department's current [**FANATXJCAL DOCTRINES OF INTEGRATED PEST MANAGEMENT, IPM**] approach to their athletic fields.*

Though Recreation officials filed a public records request for the memo by the « *New Canaan Fields Committee* », they said they **DID NOT** have the report by Parks Superintendent Howe.

Integrated Pest Management (IPM)

The **FANATICAL PESTICIDE-FREE DOCTRINES** of IPM will **NEVER** reduce & **NEVER** eliminate the need for conventional pest control products in New Canaan, CT.

The **FAILED, FUTILE, & INEFFECTIVE** IPM doctrines are unfairly allowing New Canaan to use pesticides when it suit its **POLITICALLY-CORRECT AGENDA !**

Unfortunately, IPM is #@!%! nonsense & **WILL NOT WORK.**

IPM is inappropriate for the maintenance of turfgrasses.

The **FANATICAL PESTICIDE-FREE DOCTRINES** of IPM **WILL NOT** control infestations of recurring invasive weeds & destructive insects.

New Canaan's use of IPM is **POLITICALLY-CORRECT RUBBISH.**

Pesticide-Hating Approach

**Fanatical Pesticide-Free Doctrines Of Integrated
Pest Management (IPM) Are Based Upon Mere
Truth-Challenged Emotion & NOT Science-Based Facts**

According to the **RECOMMENDATION TO KEEP USING PESTICIDES** by
« *Parks & Recreation Commission* » —

John Howe Stated That The Adoption Of
Pesticide-Free Approach Seemed To Be
« *Based On Emotion And Not Science* »

Risk By Pesticides

People Are Likely To Be Exposed To Only Very Small Amounts Of Pesticide Residues, Too Small To Pose A Risk, At Levels That Are Well Below The No-Effect Level

After A Pest Control Product Dries On The Turfgrass Leaf, It Is Difficult, If Not Impossible, To Dislodge Residues Off The Leaf Surface

According to the US Environmental Protection Agency [US EPA], pesticides can pose risks to people — such as problems with the nervous, hormone or endocrine systems, and some pesticides may be carcinogens — though generally —

[...] people are likely to be EXPOSED to only VERY SMALL AMOUNTS of pesticides, TOO SMALL TO POSE A RISK.

Commissioners asked Parks Superintendent Howe whether there are environmental or water table issues —

There Are No Water Issues Because The Chemicals Dry On The Leaf And Are Not Absorbed, They Also Are Not Applied Right Next To Ponds

What are Howe's credentials and how New Canaan ensures the quality of pesticide contractors —

They Are Given Instructions On Application & Accompanied By A Parks Worker

Pesticide Residues

No detectible residues —

Dr Keith R Solomon, a University of Guelph **CELEBRATED** toxicologist, published a **DEFINITIVE** study on human exposure to 2,4-D herbicide.

Solomon & Shelley Harris recruited 10 volunteers to sit, stand, & roll on a plot of grass 24 hours after a 2,4-D herbicide application.

5 volunteers wore long sleeves & pants & 5 volunteers wore shorts & bare feet.

According to Dr Solomon —

***NO DETECTIBLE RESIDUES WERE FOUND** in urine samples supplied by volunteers exposed to sprayed turf 24 hours following application.*

See links below.

No-effect level —

In the same experiment Solomon had volunteers go on the grass one hour after 2,4-D was applied.

Solomon detected 2,4-D in the urine of volunteers who were barefoot & wore shorts, but **THE LEVELS WERE WELL BELOW THE NO-EFFECT LEVEL** from rat experiments.

According to Dr James S Bus, a scientist in toxicology & mechanistic biology —

*The dose those individuals received [IN DR SOLOMON'S EXPERIMENT] was still **ONE-THOUSAND TIMES LOWER** than the five mg per kg of body weight.*

See links below.

Cancer —

According to Dr Bus, there is **NO EVIDENCE** that pest control products like 2,4-D cause cancer or any health problems in children.

See links below.

Dislodgeable residues —

Moreover, according to Dr Gerald R Stephenson & his research team, after a pest control product **DRIES ON THE TURFGRASS LEAF**, it is **DIFFICULT**, if not **IMPOSSIBLE**, to **DISLODGE RESIDUES** off the leaf surface.

According to Dr Stephenson, with Mark K Sears & Dean G Thompson —

*In field studies ... **LESS THAN FIVE PER CENT** of [2,4-D HERBICIDE] originally applied could be dislodged with a cheese-cloth wipe at day 0.*

DISAPPEARANCE OF DISLODGEABLE RESIDUES WAS VERY RAPID.

*Less than 0.01 per cent of the applied chemical was **DISLODGEABLE** after 1 day in turf that received 18 mm of rainfall 1 hour after spraying.*

Residues in turfgrass that received no rainfall required 7 days to dissipate to the same level.

*In a study in which the clippings were not removed, the disappearance of **DISLODGEABLE RESIDUES**, when the turf was mowed at 3, 7, & 11 days after application, was nearly as rapid as in unmowed turf.*

See links below.

Profiles —

Dr Gerald R Stephenson was a doctorate-level leading scientific expert & professor at the department of environmental biology, University of Guelph.

Dr Keith Ross Solomon is a doctorate-level leading scientific expert on the subject of regulatory affairs & pest control products at the University of Guelph as a

professor in the department of environmental biology. He is also director of the Centre for Toxicology.

Dr James S Bus is another doctorate-level leading scientific expert who has recognized expertise, training, & background in matters concerning pest control products. He is senior managing scientist, toxicology & mechanistic biology, at Exponent Engineering & Scientific Consulting.

Analysis Of Pesticides

Municipalities Must Be Well-Informed About The Risks, Benefits, & Limitations Of Conventional Pest Control Products, As Well As Inferior Green Alternative Pesticides & IPM Doctrines That Do Not Work

The **RECOMMENDATION TO KEEP USING PESTICIDES** by the « *Parks & Recreation Commission* » followed a request from Kathleen Corbet, member of the « *Board of Selectmen* », for New Canaan to fully **DISCLOSE AND REVIEW ANNUALLY ITS USE OF PESTICIDES** on the [**SPORTS**] fields.

Corbet questioned why New Canaan continued using the chemicals on some [**SPORTS**] fields used by local kids, and said the town should figure out how much it would cost to **MAINTAIN CONSISTENTLY PESTICIDE-FREE FIELDS THROUGH OVER-SEEDING [WHICH DOES NOT WORK]**.

Kathleen Corbet, member of the « *Board of Selectmen* », said in a draft memo from September 2020 —

Once further study and review of pesticide usage is engaged, consider public hearings, surveys, or other means by which community input is garnered.

*In the last 12 years, new health studies, legislation, alternative products and applications have been developed, and it is appropriate for the [t]own bodies and our community to be well-informed about the risks, benefits, and limitations of pesticides and [**INFERIOR**] organic alternatives [**THAT DO NOT WORK**].*

Yet the « *Parks & Recreation Commission* » pushed back on Selectman Corbet's recommendation for a budget analysis.

Commission member Jack Hawkins, who helped author the **RECOMMENDATION TO KEEP USING PESTICIDES** adopted by the « *Parks & Recreation Commission* », said —

*Because of our conclusion, we really didn't think it was necessary to go any further into looking at the budget at this time, the **BUDGET IMPACT** of **SWITCHING** the [**SPORTS**] fields from a pesticide use field to a pesticide-free field.*

Surrounding Jurisdictions

Municipalities That Are Not Using Conventional Pest Control Products On Any Of Their Sports Fields Are Not Maintaining Them Properly

Pesticide-hating commissioner Francesca Segalas asked about surrounding towns' use of pesticides.

Parks Superintendent John Howe said —

*Other towns that are not using pesticides on any of their [SPORTS] fields — in my opinion, their condition shows that they're **NOT MAINTAINING PROPERLY.***

Evaluation Of Pesticides

Municipalities Are Expected To Be Really Careful About Risks When Using Their Sports Fields, Especially About Head Injuries, Because That Can Create A Sense Of Liability That Municipal Officials Must Be Concerned About

The « *Parks & Recreation Commission* », in its **RECOMMENDATION TO KEEP USING PESTICIDES**, did agree with Selectman Kathleen Corbet's suggestion that New Canaan should **DISCLOSE ITS USE OF PESTICIDES** on some athletic fields on the town web-site.

To Corbet's suggestion that New Canaan establish a panel to regularly review the chemicals' application here and seek public input on their use, the « *Parks & Recreation Commission* » finds in its **RECOMMENDATION TO KEEP USING PESTICIDES** —

[...] *that this committee already exist in the form of the « New Canaan Fields Committee ».*

— a reference to Parks Superintendent John Howe, New Canaan High School Athletic Director Jay Egan, and Recreation Director Steve Benko.

It's unclear whether, when or how often the « *New Canaan Fields Committee* » meets — the town web-site has no listing for « *New Canaan Fields Committee* » and there is **NO** record of any past agendas or minutes at the Town Clerk's office.

Parks Superintendent John Howe, New Canaan High School Athletic Director Jay Egan, and Recreation Director Steve Benko **DID** serve as ex-officio, non-voting members of group called the « *Fields Building Committee* » that helped oversee creation of the new turf facilities and track at NCHS.

« *Fields Building Committee* » met more than one dozen times between 2017 and 2019, according to town records.

The « *Board of Selectmen* » is scheduled to dissolve the « *Fields Building Committee* » on December 15th, 2020.

The **RECOMMENDATION TO KEEP USING PESTICIDES** by « *Parks & Recreation Commission* » also includes an outside review of the town's use of pesticides, though qualified.

According to Jack Hawkins, member of the « *Parks & Recreation Commission* » who voted in favour of pesticides —

*We recommend that the « **Board of Selectmen** » or a town body help identify either an individual or a party to contribute that input, and most specifically, we believe that input should be from somebody who has the ability to provide some kind of commentary on health issues — the health of the pesticide use and the health risk to players on the [**SPORTS**] field.*

Kathleen Corbet herself, member of the « *Board of Selectmen* », a guest at the meeting, cautioned the « *New Canaan Fields Committee* » in its « *use of terminology that was used in terms of Saxe field* », which she described as « *very actively used* »

We bring in outside towns and organizations come in and play all kinds of sports and so forth.

*I want to be really careful about our usage of **RISKS** and about **HEAD INJURIES** and so forth because that can create a sense of **LIABILITY** that we want to be concerned about.*

A woman with blonde hair, wearing a white lace bikini top and white bikini bottoms, is sitting on a white, fluffy rug. She is looking directly at the camera with a slight smile. The background is a plain, light-colored wall.

Thank You New Canaan

No One In New Canaan Wants This #@!!% Ban Nonsense

Urban garbage dumps in New Canaan —

By PROHIBITING conventional pest control products, SPORTS FIELDS in New Canaan, CT, have become pest-infested & dangerous GARBAGE DUMPS because it is IMPOSSIBLE to control weed invasions & insect infestations by using pesticide-free (a.k.a. organic) maintenance practices that include INFERIOR-green alternatives.

There should be NO HARMFUL-PROHIBITIONS which are simply RECKLESS, ARBITRARY, & DOOMED-TO-FAIL.

Inferior-green alternatives —

There are NO viable alternatives to conventional pesticides.

There are only INFERIOR- GREEN ALTERNATIVES ARE MORE HAZARDOUS & WILL NOT WORK.

For the maintenance of turfgrasses, there are NO alternatives that work.

There are NO viable, NO efficacious, NO economical, & NO low-risk alternatives to replace conventional pest control products.

Green alternative pesticides are BOGUS, INFERIOR, & DISMAL FAILURES.

They are sold at STUNNINGLY EXORBITANT COSTS.

Example in Montgomery County —

In the state of Maryland, Montgomery County's HARMFUL-PROHIBITION was STUNNINGLY COSTLY.

Its parks department has been forced to use some INFERIOR-GREEN ALTERNATIVES THAT WILL NEVER WORK.

According to Montgomery County's truth-challenged officials, green spaces will TAKE THREE TO FIVE YEARS TO TRANSITION to green alternatives [???].

However, these same officials allege that these alternatives will make green spaces AESTHETICALLY DIFFERENT.

In other words, residents had better get used to living in an urban landscape that LOOKS LIKE A PEST-INFESTED & DANGEROUS GARBAGE DUMP.

In essence, residents have been told to PUT-UP-&-SHUT-UP !

Montgomery County's HARMFUL-PROHIBITION is a dismal & ridiculous failure because INFERIOR-green alternative pesticides WILL NOT WORK.

The public must be told why these doctrines are NOT a better choice.

There are NO alternatives to get rid of weeds & insects.

Green alternatives are MORE expensive & MORE work with NO benefits whatsoever.

Montgomery County's green alternatives are INFERIOR, more hazardous, & WILL NOT WORK.

Example in Edmonton —

In the province of Alberta, the city of Edmonton announced that it has CEASED the use of the INFERIOR-Fiesta green alternative herbicide to control dandelions that have invaded, choked, & destroyed community PLAYING SURFACES.

Edmonton could no longer afford the INFERIOR-Fiesta weed management program, which has burdened the city with a STUNNING COST of 3,000,000-dollars per year.

Fiesta was almost-TOTALLY-INEFFECTIVE, as well as higher-risk, inadequate, inferior, more toxic, overwhelmingly condemned, & STUNNINGLY EXPENSIVE.

Example in British Columbia —

PROHIBITIONS are POLITICALLY-CORRECT RUBBISH.

The public needs to know more about PROHIBITION FAILURES.

For example, A MAJOR STUDY OF BRITISH COLUMBIA'S MUNICIPAL BY-LAWS has concluded that PROHIBITIONS against conventional pest control products have been RECKLESS, ARBITRARY, & DOOMED-TO-FAIL.

This is because municipal officials are now CIRCUMVENTING their own PROHIBITIONS by taking advantage of EXCEPTION STATUSES that they have COVERTLY INSERTED in their by-laws.

Furthermore, PROHIBITIONS have led to CATASTROPHIC ECOLOGICAL CARNAGE for tens of thousands of destroyed & ravaged properties every single year.

By PROHIBITING conventional pest control products, PLAYING SURFACES in British Columbia have become pest-infested & dangerous GARBAGE DUMPS because it is IMPOSSIBLE to control weed invasions & insect infestations by using pesticide-free (a.k.a. organic) maintenance practices that include INFERIOR-green alternatives.

The REAL Trends

There Are REAL Trends Against Reckless, Arbitrary, & Doomed-To-Fail Prohibitions

Summary —

Government officials are no longer readily jumping in favour of RECKLESS, ARBITRARY, & DOOMED-TO-FAIL PROHIBITIONS.

It is clear that pesticide-hating fanatics conspire to impose PROHIBITIONS in order to DESTROY our urban green space environments, such as PLAYING SURFACES used by CHILDREN.

Unfortunately, it is IMPOSSIBLE to keep PLAYING SURFACES well-maintained, safe, & attractive without conventional pest control products.

Without these products, PLAYING SURFACES are DESTROYED — they become thin & yellow, invaded by weeds, & infested with insects.

With PROHIBITIONS, the safety & appearance of PLAYING SURFACES are jeopardized with ECOLOGICAL DISASTERS from uncontrolled & dangerous insects like white grubs, & from invasive & dangerous weeds like dandelions.

With weed invasions & insect infestations, safe turf PLAYING SURFACES are DESTROYED — CHILDREN are at HIGH-RISK of slipping & tripping & becoming seriously hurt.

In essence, pest control products prevent harm & keep CHILDREN safe from injuries.

There are over SIXTY jurisdictions that have STOPPED or RESCINDED or LIMITED or have begun to REPEAL HARMFUL-PROHIBITIONS, or have granted commercial businesses with an EXCEPTION STATUS.

There are real trends against pesticide bans —

The following jurisdictions have joined the REAL trends against RECKLESS, ARBITRARY, & DOOMED-TO-FAIL PROHIBITIONS —

- ALBERTA — Proposed Provincial Prohibition Stopped

<http://pesticidetruths.com/wp-content/uploads/2011/11/Force-Of-Nature-VICTORY-AGAINST-TERRORISTS-Alberta-2011-08-09-Provincial-Prohibition-TERMINATED-pdf-300-dpi.pdf>

<http://pesticidetruths.com/toc/province-of-alberta/>

- ALTONA — Municipal Government Has Opposed Manitoba's Provincial Prohibition

<http://pesticidetruths.com/2012/10/16/winkler-altona-pesticide-bans-manitoba-victory-against-terrorists-prohibition-opposed-real-trends-against-pesticide-bans-2012-10-09/>

<http://pesticidetruths.com/wp-content/uploads/2011/11/Force-Of-Nature-VICTORY-AGAINST-TERRORISTS-Altona-Winkler-Manitoba-2012-10-09-Prohibition-Opposed-pdf.pdf>

- ANN ARUNDEL COUNTY — Proposed Self-Imposed Prohibition On County-Owned Playgrounds Rejected

<http://pesticidetruths.com/2016/12/20/in-anne-arundel-county-maryland-proposed-prohibition-rejected-victory-against-terrorists-real-trends-against-pesticide-bans-2016-11-22/>

- ASHLAND — Existing Prohibition Rescinded

<http://pesticidetruths.com/2014/05/02/hand-weeding-adopt-a-park-failure-sierra-club-clueless-ashland-workers-seek-loosening-citywide-ban-on-use-of-herbicides-mailtribune-com/>

About NORAHG

We Speak The Whole Truth When We Take A Look At NEW CANAAN, CT From An Independent Perspective

We are the National Organization Responding Against HUJE that conspire to destroy the Green space & other industries (NORAHG). As a non-profit & independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating-fanatics (HUJE) who conspire to destroy businesses that are dependent on the use of safe & effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, & background in matters concerning pest control products, & who promote environmental realism & pesticide truths.

Not surprisingly, fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, & attempt to impose their politicized-doctrines & twisted life-style choices against our society !?!

NORAHG was the brain-child of Mr William H Gathercole & his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORAHG
