

Pesticide Truths

Roundup Terrör Is Endless – Kangaroo-Trials In California – Sliding Towards Socialism – 2019 06 18

December 25, 2019 WILLIAM H GATHERCOLE AND NORAH G

Roundup Attacks

Roundup Jackpot-Justice

The **conspiracy** against Roundup is a coordinated & well-funded **attack** against the manufacturer Bayer/Monsanto, using **glyphosate-cancer litigation**, as well as social media, intimidation, & confrontation.

Jackpot-justice lawsuits against Roundup are the product of rampant collusion, misconduct, and even fraud and corruption.

Gullible & ignorant jurors have **awarded outrageous amounts** of \$80,000,000 or more.

The **Roundup-cancer litigations** have been textbook cases of **kangaroo-trials** (i.e. courts without good or valid evidence).

Roundup Kangaroo-Trials

With these **kangaroo-trials**, the legal system has been **irretrievably-corrupted**.

The **false-claim** that Roundup is carcinogenic should **never** be admitted as evidence in any trial.

Logic and data have been replaced by emotion & virtue signaling.

Roundup is **not** a carcinogen.

We must keep **fraudulent science** out of our courtrooms since Roundup has been **vindicated** again and again by national regulatory agencies and organizations.

Roundup Kangaroo-Trials In California

JOHNSON V MONSANTO –

- **\$289.2 Million** (reduced to **\$78.5 Million**) jackpot verdict against Monsanto, August 2018.
- Dewayne “Lee” Johnson V Monsanto Company.
- Plaintiff alleges suffering from Non-Hodgkin’s Lymphoma [**NHL**] after years of exposure to Roundup. [**?!?!**]
- Plaintiff’s team of jackpot-justice attorneys was Virginia-based Miller Firm, which included Timothy Litzeburg, who has been charged by federal prosecutors with **extortion**.
- Kangaroo-Trial Judge Vince Girdhari Chhabria, State Court, San Francisco, California.
- The verdict is under appeal by Bayer, which acquired Monsanto.
- Link – <https://wp.me/p1jq40-cmg>

PILLIOD V MONSANTO –

- **\$2.055 Billion** (reduced to **\$87 Million**) jackpot verdict against Monsanto, May 13th, 2019.
- Alva & Alberta Pilliod (2 plaintiffs) V Monsanto Company.
- Plaintiffs allege suffering from Non-Hodgkin’s Lymphoma [**NHL**] after years of exposure to Roundup. [**?!?!**]
- Kangaroo-Trial Judge Winifred Smith (Judge Ioana Petrou replaced), Judicial Council of California Proceedings.
- The verdict is under appeal by Bayer, which acquired Monsanto.

HARDEMAN V MONSANTO –

- **\$80 Million** jackpot verdict against Monsanto, December 19th, 2019.
- Edwin Hardeman V Monsanto Company.
- Plaintiff alleges suffering from Non-Hodgkin's Lymphoma [**NHL**] after years of exposure to Roundup. [**?!?!**]
- Kangaroo-Trial Judge Vince Girdhari Chhabria, Federal Court, California.
- The verdict is under appeal by Bayer, which acquired Monsanto.

Roundup Harm ?

Do all of these **kangaroo-trials** indicate that Roundup actually harms people **?!?!**

No !

Roundup represents **no risk** to public health.

Roundup will **not** cause cancer.

It is **biologically impossible** !

And yet, there are over 13,000 more **kangaroo-trials** that are pending nation-wide against Bayer/Monsanto in US courts, all without good or valid evidence against Roundup.

These trials are **attacks** against Roundup that are fueled by ...

- agendas against scientific innovation
- **lunatic doctrines** against pesticides
- cherry-picked studies
- fake news
- false-cancer-claims
- fraudulent science

- frivolous litigation
- imaginary danger
- motivations to impose socialism

Roundup Socialism

The Roundup kangaroo-trials are designed to impose socialism.

The conspiracy against Roundup is not only an attack against scientific innovation, it is also a means of imposing socialism.

In western countries, the slide towards socialism (a.k.a. wealth re-distribution) is taking root not only at the ballot box, but also from the jury box.

In essence, the Roundup kangaroo-trials are campaigns to re-distribute wealth from innovative companies, like Bayer/Monsanto, to sympathetic plaintiffs who allege suffering from cancer because of their exposure to Roundup — all while jackpot-justice plaintiff-attorneys are taking a healthy cut for themselves.

Polls indicate that 51 per cent of Americans think socialism would be a bad thing for the country.

Roundup Vindication

Roundup has been **vindicated** and continues to be registered as a successful and safe product.

4 decades and 3300 studies by respected agencies and organizations world-wide have concluded that Roundup is **safe & non-carcinogenic**, based on assessments of **actual risk**.

National regulatory agencies and organizations have **vindicated** Roundup with their safety findings, which include —

- US Environmental Protection Agency (US EPA)
- Health Canada
- European Food Safety Authority
- European Chemicals Agency
- UN Food & Agriculture Organization
- Germany's Institute for Risk Assessment
- Australia's Pesticides & Veterinary Medicines Authority, and others.

Furthermore, the US Environmental Protection Agency (US EPA) has evaluated this herbicide, and has re-affirmed that there is **no risk** to public health when used properly.

Additionally, a study conducted by US National Cancer Institute followed the health of 54,000 farmers and commercial pesticide applicators for over two decades, and found **no glyphosate-cancer link**.

They have all concluded that Roundup **does not** cause cancer.

Roundup & IARC

International Agency For Research On Cancer (IARC) is a corrupt, fraudulent, & politicized anti-glyphosate & environmental-terrorist organization.

It is the **only** major science body that attacks against Roundup & its imaginary cancer danger [?!?!].

In order to support its **false-cancer-claims** against Roundup, IARC has been caught ...

- cherry-picking low-value studies
- doctoring documents
- excluding relevant safety data
- manipulating evidence
- undermining the safety findings of every respected national regulatory agency and organization world-wide

IARC conducts bad & fraudulent science, which is, on occasion, promoted by its fanatical-officials who **receive pay-offs** to undermine Roundup.

Jackpot-justice plaintiff-attorneys use the IARC's false-cancer-claims to make bank with gullible juries in **kangaroo-trials** against Roundup.

Only one [?!?!] chemical has ever been evaluated by IARC as non-carcinogenic — this has proved that IARC is a corrupt, fraudulent, & politicized organization with ridiculously flawed evaluations.

We must keep IARC's fraudulent science out of our courtrooms !

These IARC claims should **never** be admitted as evidence in **any** trial, especially in **kangaroo-trials**, against glyphosate.

Roundup Terrör Will NEVER End

Can Bayer/Monsanto ever **appease** Roundup-hating fanatics and jackpot-justice plaintiff-attorneys ?!?!

No !

These fanatics, and attorneys will **never** be appeased and their environmental-terror against Bayer/Monsanto will **never** end !

Bayer, which acquired Monsanto, faces hostile **Roundup-hating lunatic-doctrines** that are fanatical in character, ruthless in purpose, and subversive in method.

In the 9|11 era of environmental-terror ... fanatical enviro-terrorist conspiracies have now spread against the hated agriculture and its use of Roundup.

Because of Roundup-cancer litigations & kangaroo-trials, Bayer's share price has **dropped** significantly.

Investors are concerned about the liability in the thousands of other upcoming cases of frivolous litigation.

Bayer will **strike back** against Roundup-hating fanatics, as well as jackpot-justice plaintiff-attorneys !

Bayer will also **strike back** by seeking to **repair its reputation**, and to somehow appease **some** fanatics, by announcing that it would invest **5,600,000,000 dollars US** in R&D research.

With this R&D investment, Bayer will aim at better understanding of how pesticide resistance develops, discovering new pesticides, and devising more precise application methods.

Observers have commented that Bayer is **diverting** R&D research from solving more pressing problems, such as, developing cures for cancer or controlling disease-carrying vermin in the tropics.

The cost to society for this attempted-appeasement will likely be more suffering in the world than there would otherwise have been.

Pilliod V Monsanto

NUMBERS –

\$2,055,000,000 (Reduced To \$87,000,000) Verdict Against Monsanto In Alva & Alberta Pilliod (2 Plaintiffs) V Monsanto Company — Kangaroo-Trial Judge Winifred Smith (Judge Ioana Petrou Replaced), Judicial Council of California Proceedings, May 13th, 2019 — The Verdict Is Under Appeal By Bayer

13,400 Similar Lawsuits Are Pending Nation-Wide Against Bayer/Monsanto In US Courts Without Good Or Valid Evidence

Consider the May 2019 **\$2,055,000,000 JURY VERDICT** against Bayer (which acquired Monsanto) for allegations that its Roundup herbicide, made with glyphosate, caused cancer in plaintiffs [!?!].

This was the third VERDICT for plaintiffs in California in the last year, with more than **13,400 CASES** [of frivolous litigation] pending nation-wide [all without good or valid evidence].

However, there are questions ...

Do all of these cases indicate that Roundup actually harms people !?! Or, are these cases merely fueled by agendas against scientific innovation, lunatic doctrines against pesticides, cherry-picked studies, fake news, false-cancer-claims, fraudulent science, frivolous litigation, & imaginary danger !?! Glyphosate will not cause cancer ! It is biologically impossible ! It is a false-cancer-claim !

Roundup Is Not A Carcinogen

STATEMENT –

Roundup Represents No Risk To Public Health

Yet, the US Environmental Protection Agency, under Democrat and Republican administrations alike, has thoroughly and repeatedly evaluated glyphosate and found that it is **NOT A CARCINOGEN** and it poses ...

***NO RISKS TO PUBLIC HEALTH** from the current registered uses of glyphosate.*

The risk-averse European Food Safety Authority (EFSA) similarly DOES NOT classify glyphosate as carcinogenic.

Australian and Canadian regulators reached the same conclusion.

Background Information

Glyphosate Is Vindicated

Summary

A small group of fanatical-activists alarm & enrage the public in order to advance the subversive conspiracy to prohibit against pest control products such as glyphosate herbicide.

Their politicized-lunatic-doctrines are also designed to coerce, intimidate, & terrify municipal officials into legislating reckless & arbitrary prohibition against glyphosate in the urban landscape & in the agriculture industry.

These fanatical-activists' doctrines are espoused in media reports, public forums, and on-line web-pages.

They do not know what they are talking about !

According to Health Canada's Pest Management Regulatory Agency (PMRA) —

Health Canada is confident that the pesticides approved for use in Canada, including lawn and garden products, can be used safely when label directions are followed.

[See link below.]

Glyphosate, as well as all pest control products, has been vindicated by Health Canada.

No one should be listening to fanatical-activists and their terrify-talk. [See links below.]

✓ **FACTS regarding glyphosate when it is used properly ...**

- ✓ **FACT** — Glyphosate Is Safe, Effective, Economical, & Low-Risk

PILLIOD V MONSANTO — The jackpot-justice plaintiff-attorneys are MAKING BANK on a controversial [**cherry-picked & politicized**] report issued by the [**corrupt & fraudulent**] International Agency For Research On Cancer (IARC), an affiliate of the SCANDAL-RIDDEN World Health Organization.

International Agency For Research On Cancer (IARC) — A corrupt & fraudulent anti-glyphosate & environmental-terrorist organization.

In **ALL BUT ONE** of its **900 EVALUATIONS**, IARC's flawed methodology led it to identify a chemical (caprolactam), as NOT CARCINOGENIC TO HUMANS.

See link below entitled IARC's Scientific Fraud — Glyphosate-Gate — Lies, Scientific Fraud, Pays-Off, Bribery, & Conspiracy.

[**The corrupt & fraudulent**] IARC's [**cherry-picked**] conclusion that glyphosate is « probably » carcinogenic to humans was particularly TAINTED.

International Agency For Research On Cancer (IARC) — Peddles in false-cancer-claims. See later segment for more details.

Christopher Portier, a [**corrupt glyphosate-hating**] consultant for jackpot-justice plaintiff-attorneys SUING on behalf of « victims » of Roundup, and a part-time employee of Environmental Defense Fund [**an anti-pesticide & environmental terrorist organization**], was behind the initiation of International Agency For Research On Cancer's evaluation glyphosate.

He then served as an « invited specialist » for IARC, despite having NO background in chemical research.

Not surprisingly, IARC relied on CHERRY-PICKED low-value studies and excluded relevant safety data.

The [**cherry-picked & politicized**] IARC-report then became the center-piece of an anti-glyphosate campaign that was led by [**corrupt glyphosate-hating**] Portier in order to UNDERMINE the safety findings of every major government evaluation of the herbicide.

See link below entitled IARC's Scientific Fraud — Glyphosate-Gate — Lies, Scientific Fraud, Pays-Off, Bribery, & Conspiracy.

The outlier report and the political campaign to leverage it prompted the Executive Director of European Food Safety Authority (EFSA), Bernhard Url, to offer dramatic testimony before the European Parliament's environment committee, LAMBASTING IARC'S POLITICIZED WORK and how far it strayed from EFSA's transparent peer-reviewed scientific work.

Url pointed out that the activism and the turmoil it caused by undermining legitimate studies suggested we have entered the « *Facebook Age Of Science* », where you post a report you like « *and you count how many people like it. For us this is no way forward* ».

In this environment, it is easy to see how a group of [gullible & ignorant] jurors, asked to evaluate « *conflicting studies* », could side with sympathetic plaintiffs over a big chemical company.

I could imagine [gullible] jurors in the **\$2,055,000,000 VERDICT** thinking, « *I do not really know whether this product caused Alva and Alberta Pilliod's Non-Hodgkin's Lymphoma [NHL], but a big verdict in their favor will help them more than it'll hurt Bayer* ».

Bayer's share price fell **6 PER CENT** on news of the verdict, reflecting investor concern about liability in the thousands of other cases.

Background Information

The IARC Glyphosate-Gate

Summary – Bad Science & Corruption

International Agency for Research on Cancer (IARC) is an anti-glyphosate & environmental-terrorist organization.

IARC, the ONLY major science body to insist that glyphosate causes cancer [!?!], has been caught doctoring documents and manipulating evidence to support its conclusion.

IARC conducts **bad & fraudulent science**.

Occasionally, **bad science** is promoted by lunatics who receive pay-offs and practice scientific fraud.

The motivation seems to be financial.

A key IARC **lunatic**-advisor who lobbied against glyphosate has, in essence, received a **pay-off** of \$160,000.

He was bribed by jackpot-justice plaintiff-attorneys who stand to profit from potential lawsuits involving glyphosate.

This is a truly gigantic scandal that has (predictably) received scant press coverage.

IARC has severely and perhaps irreparably damaged the reputation of its parent, the World Health Organization (WHO).

Anti-glyphosate **lunatics** are **crooks** and **lying sacks of crap** !

Summary – False-Cancer-Claims

International Agency for Research on Cancer (IARC) has **not** proven that glyphosate causes cancer.

IARC has **NOT** classified glyphosate as **IARC's Group 1 – Carcinogenic To Humans**.

Additionally, IARC arbitrarily classified the glyphosate as **Group 1** on the basis of « **limited evidence** » of cancer.

Unfortunately, glyphosate-hating fanatics have implied that IARC's « **limited evidence** » has somehow been withheld from EVERY science-based national regulatory agency in the world.

Nonetheless, IARC has **NOT** classified glyphosate as **Group 1 – Carcinogenic To Humans**.

In other words, according to IARC, glyphosate **WILL NOT** cause cancer !

And we repeat, IARC has **NOT** classified glyphosate as **Group 1 – Carcinogenic To Humans**.

Glyphosate **will not** cause cancer !

The **false-cancer-claims** by the glyphosate-hating International Agency for Research on Cancer (IARC) are **secretive, sloppy, bungled** — and perhaps even systematically and deliberately **fraudulent**.

Any of IARC's **false-cancer-claims** against glyphosate are — • such an outlier • so beneath scientific norms • so tainted by conflicts-of-interest and misconduct • so unrelated to actual chemical risks, and • so deceptive and border-line fraudulent.

These claims should never be admitted as evidence in any trial.

According to US Environmental Protection Agency (US EPA), German Federal Institute For Risk Assessment, Health Canada, and **every** other science-based national regulatory agency in the world, the weight of evidence is **against** carcinogenicity.

In other words, according to these agencies, glyphosate **will not** cause cancer.

The **IARC hazard report did not** indicate the **risk** of getting cancer.

On the other hand, national regulatory agencies, like US EPA and Health Canada, **do** evaluate **risks**.

IARC merely looked at what is called hazard, and **not risk**.

IARC **did not** take into consideration how much of, or how commonly, a risk glyphosate poses in the real world.

IARC failed to provide any new research concerning glyphosate.

If the IARC hazard report against glyphosate was truly valid, then why hasn't WHO itself demand more government regulation ?!?!

Why should national regulatory agencies listen to IARC when it continues to be ignored by World Health Organization (WHO) ?!?!

Why ?!?!

Because, glyphosate **will not** cause harm and **will not** cause cancer !

The World Health Organization (WHO) and the Food & Agriculture Organization (FAO), both agencies of the United Nations, have stated that glyphosate is **unlikely** to pose a carcinogenic risk to humans.

On May 16th, 2016, the World Health Organization (WHO) and the Food and Agriculture Organization (FAO), both agencies of the United Nations, stated that ... « **glyphosate is unlikely to pose a carcinogenic risk to humans** ».

The United Nations announced its assessment that glyphosate is **unlikely** to cause cancer in people and that it is **unlikely** to pose a carcinogenic risk to humans exposed to it through food !

The United Nations' Food and Agriculture Organization (FAO) and World Health Organization (WHO) looked at all pertinent published and un-published studies to assess the health risk to consumers from dietary exposure to glyphosate residues in food.

Glyphosate **will not** cause cancer !

False & Frivolous Lawsuits Are Attacking Innovative Products Like Roundup

STATEMENT –

Attacking & Prohibiting Innovative Products, Like Roundup, Will Damage & Destroy Agricultural Food Production, Resulting In Human Starvations & Deaths

Put aside the cost to a typical investor's retirement account and consider the costs to society in a world where INNOVATIVE scientists have to answer the following questions from potential investors ...

Let's say your product actually does the wonderful things you are developing it to do.

Let's also say that regulators around the world repeatedly vouch for the safety of its proper use.

QUESTIONS –

- What's to stop plaintiffs from ginning up enough high-dose animal studies to get **IARC** to study it, leading to an almost certain cancer warning ?!?!

International Agency For Research On Cancer (IARC) — A corrupt, fraudulent, & politicized anti-glyphosate & environmental-terrxxrist organization.

- What's to stop those jackpot-justice plaintiff-attorneys from using that report to canvas for cancer patients who used the product ?!?!
- Won't this be another glyphosate ?!?!

There are NO good answers to these questions.

However, there is one TRUE fact ... Undermining and prohibiting innovative products, like glyphosate, will damage and destroy food production, resulting in human starvations and even deaths.

These types of cases represent A SERIOUS ATTACK ON PROGRESS.

We are all beneficiaries of technology.

Whether it is lower-cost food and reduced soil erosion because of glyphosate, or critical components of computers, cell phones, and aircraft, INNOVATION MAKES LIFE BETTER FOR EVERYONE.

That's why they are so widely used.

Sadly, if not ironically, it is also why enterprising jackpot-justice plaintiff-attorneys are seeking to capitalize on sympathy towards SOCIALISM, both abroad at [**the corrupt, fraudulent, & politicized**] IARC, and at home in the jury pool.

For them, it is a solid investment.

Do not look to Congress to fix the problem anytime soon.

Educating The Population

« *The Frank R Lautenberg Chemical Safety For The 21st Century Act* », passed in 2016, made it clear that the legislation would NOT pre-empt TOXIC TORT LITIGATION.

TOXIC TORT LITIGATION — A specific type of personal injury lawsuit in which the plaintiff claims that exposure to a chemical, or dangerous substance, has caused the plaintiff's injury or disease.

The best we can hope for is a MORE SCIENTIFICALLY LITERATE POPULACE who, as [gullible] jurors, are less likely to be DUPED by those who game the system.

We should also be cautious about what we share on social media.

As Smokey Bear said, « *Only YOU Can Stop Forest Fires* ».

And only YOU can tamp down the « *Facebook Age Of Science* ».

Sliding Towards Socialism

STATEMENTS –

Frivolous Lawsuits Against Scientific Innovation
Are Just Another Form Of Socialism

In America, The Slide Towards Socialism Is Taking Root
Not Only At The Ballot Box, But Also From The Jury Box

Left-Wing Glyphosate-Hating Fanatics Conspire To
Impose Socialism Through Agendas Against Scientific
Innovation, Lunatic Doctrines Against Pesticides,
Cherry-Picked Studies, Fake News, False-Cancer-Claims,
Fraudulent Science, Frivolous Litigation, & Imaginary Danger

Jackpot-Justice Plaintiff-Attorneys Are Having Wild Success
In Their Campaign To Redistribute Wealth From Innovative
Companies, Like Bayer/Monsanto, To Sympathetic Clients —
All While Taking A Healthy Cut For Themselves

NUMBERS –

51 Per Cent Of Americans Think Socialism

At a time when nearly half of Americans do not seem to understand the threat of CREEPING **SOCIALISM**, it is time for those of us who do to be on guard on all fronts.

Only **51 PER CENT** of Americans think **SOCIALISM** would be a bad thing for the country, according to a Gallup poll released in May 2019.

Although the 2020 election will be a big test for whether **SOCIALISM** gains a foot-hold, freedom-lovers should be worried more broadly than at the polls.

The SLIDE TOWARDS **SOCIALISM** is taking root not only at the BALLOT BOX, but also from the JURY BOX.

Discouraging Investment

STATEMENT –

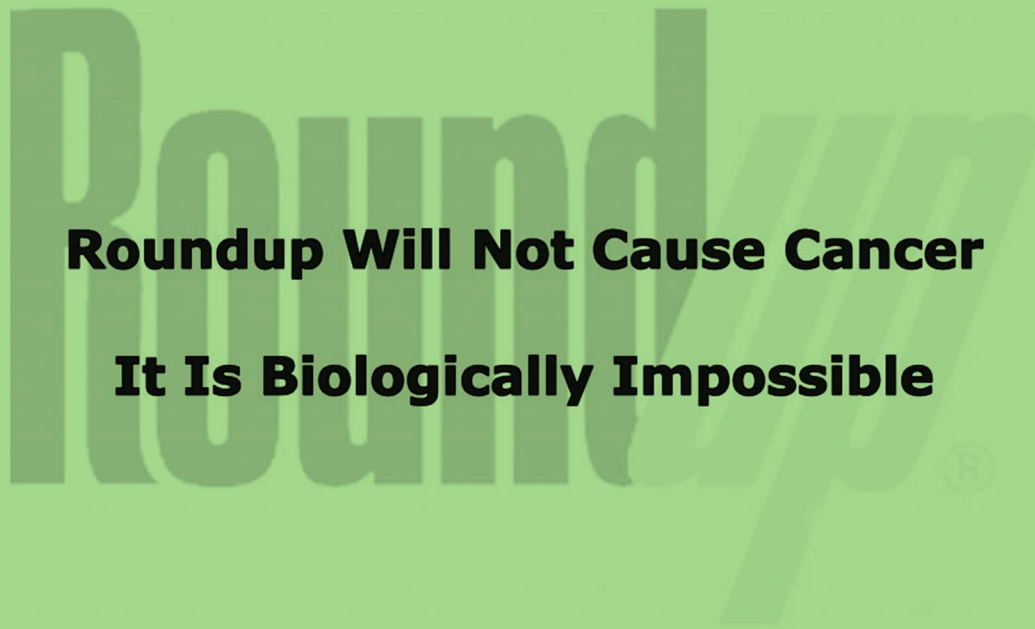

Unjustified & Outsized Verdicts Harm
Society By Discouraging Investment In
Innovative Products Like Roundup

NUMBERS –

\$1,100,000 Each Year Is The Cost Of Frivolous
Lawsuits For The Average Defendant, Mostly Highly
Innovative Businesses — According To An Examination
Of 40,000 Lawsuits Filed Between 1996 & 2011

Researchers at the University of Chicago Booth School of Business and Tilburg University recently aggregated data from more than **40,000 LAWSUITS** filed between 1996 and 2011, and found that « *FRIVOLOUS LAWSUITS TENDED TO FOCUS ON HIGHLY **INNOVATIVE** BUSINESSES* », costing the average defendants **\$1,100,000 EACH YEAR**.

They found that the cases were, in effect, a disproportionate tax on **INNOVATION**.

Roundup Will Not Cause Cancer
It Is Biologically Impossible

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against GMOs that conspire to destroy the Green space and other industries (NORARG)

Background Information

Johnson V Monsanto Company

\$289.2 Million (Reduced To \$78.5 Million) Jackpot Verdict

The First Roundup Kangaroo-Trial In California

Does Glyphosate Really Harm People !?!?

Summary – Biologically Impossible

In California, a plaintiff alleged that his cancer was due to exposure to glyphosate, even though that is **biologically impossible**.

During the kangaroo-trial, the plaintiff's team of attorneys manipulated the jury's emotions by using **fake-news & false-cancer-claims** about glyphosate in order to score a \$289,999,000 jackpot verdict. [See link below.]

The credibility of one of these attorneys have now been put into serious question, with accusations of **extortion and shaking down companies**. [See section below.]

Their legal argument trumped scientific evidence and fooled a jury into believing that glyphosate causes harm with non-Hodgkin's lymphoma — which is **false**.

Even the judge acknowledged that there was **no evidence of harm**.

The reason that the **jackpot-justice plaintiff-attorneys'** legal arguments can trump scientific evidence is because we live in a thoroughly post-modern world.

Logic and data have been replaced by emotion and virtue signaling.

The **glyphosate-cancer trials** have been textbook cases of kangaroo court justice.

With these kangaroo-trials, the legal system will be **irretrievably-corrupted** by this coordinated, well-funded attack by fanatics, using glyphosate-cancer litigation, as well as social media, intimidation, and confrontation.

The false-claim that glyphosate is carcinogenic should **never** be admitted as evidence in **any** trial.

We must keep **fraudulent science** out of our courtrooms !

Summary – Vindication

According to the scientific evidence, and because it is an herbicide, glyphosate is **only** toxic to plants.

There is no known biological mechanism by which glyphosate could cause cancer, therefore its carcinogenicity is **not even** theoretically possible.

America will not remain #1 in the world for scientific research if society allows **jackpot-justice plaintiff-attorneys** to bleed companies dry over crimes they never committed.

World-wide, national regulatory agencies and leading experts have been siding with the overwhelming scientific evidence demonstrating that glyphosate **will not** cause cancer — there is **no** bio-medical and **no** epidemiological evidence to support the claim that glyphosate causes cancer.

Do pesticides like glyphosate harm people ?!?!

NO !

Pesticides like glyphosate have been vindicated. [[See links below.](#)]

Pesticides like glyphosate must **not** be banned.

What about pesticide bans ?!?!

Do pesticide bans kill people ?!?!

YES !

A man has **died** because of prohibition. [[See next segment.](#)]

Summary – Attorney Charged With Extortion

A jackpot-justice plaintiff-attorney, Timothy Litzeburg, has been **charged** by federal prosecutors with **extortion**.

Litzeburg worked for the Virginia-based Miller Firm, that represented the plaintiff in the **first lawsuit against glyphosate**, Johnson V Monsanto Company.

Litzenburg was part of the team of attorneys who successfully convinced a California jury that the plaintiff's cancer was somehow caused by Roundup. [?!?!]

Litzenburg has been **accused** of plotting to **extort** a \$5,000,000 settlement, in addition to \$200 million in consulting fees paid to him and his two partners from Amsterdam-based chemicals maker Nouryon, in exchange for the attorneys **making a liability lawsuit go away**.

If successful, Litzenburg would have been able to **shift litigation to focus on chemical suppliers** who provide materials to produce herbicides, such as glyphosate.

Despite his claims that Litzenburg states that he enjoys holding uncaring companies accountable for the reckless products they release that can leave consumers vulnerable, in reality he and his associates are **con artists attempting to shake down companies**, like Bayer/Monsanto and Nouryon, in order to achieve **financial gain**.

Glyphosate and other herbicides and pesticides are used to kill insects in order to help farmers and agriculture companies defend their crops.

Undermining and prohibiting **innovative** products, like glyphosate, will damage and destroy food production, resulting in human starvations and even deaths.

If they can't win electorally, the left-wing glyphosate-hating fanatics conspire to impose **socialism** through **frivolous litigation**.

The end result of Litzenburg's alleged **corruption** is something considered very desirable by environmentalists.

Background Information

Man Dies Because Of Prohibition

Summary

The government of Ontario has imposed its **Cosmetic Pesticides Ban Act**, which is considered as the most extreme ban ever. [[See link below.](#)]

The ban is not only **hugely unpopular** with Ontario home-owners, it has also proven to be **fatal**.

An Ontario resident did not realize that hand-weeding a toxic noxious weed on his property would contribute to his **death**. [[See links below.](#)]

This Ontario resident was ultimately **doomed** by **Ontario's Cosmetic Pesticides Ban Act** since the safest and most effective method of controlling toxic noxious weeds was arbitrarily and needlessly prohibited by the province.

Skin contact with this toxic noxious weed resulted in severe burns to his hands and arms, eventually forcing him to be hospitalized — ultimately, he **died**.

Unfortunately, since the government **imposed** its **Cosmetic Pesticides Ban Act**, the **death was Ontario's fault** !

The hands of the prohibition merchants of death are soaked in blood.

About NORAHG

We Speak The Whole Truth About Roundup From An Independent Perspective

We are the National Organization Responding Against HUIE that conspire to destroy the Green space and other industries (NORAHG). As a non-profit and independent organization, we are environmentalists who are dedicated to reporting about truth-challenged Roundup-hating fanatics (HUIE) who conspire to destroy businesses that are dependent on the use of safe and effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths. <https://wp.me/p1jq40-8DV>

Not surprisingly, enviro-fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, and attempt to impose their politicized-doctrines and twisted life-style choices against our society ?!?!

NORAHG was the brain-child of Mr William H Gathercole and his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the Roundup-hating fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORAH G
