

Pesticide Truths

The Wisdom Of Health Canada – Incident Reports – 2019 08 24

August 24, 2019 WILLIAM H GATHERCOLE AND NORAH G

The wisdom of REAL experts –

Health Canada is confident that the pesticides approved for use in Canada, including lawn and garden products, can be used safely when label directions are followed.

REFERENCE

<http://pesticidetruths.com/2019/08/24/the-wisdom-of-health-canada-incident-reports-2019-08-24/reference/>

Background Information

Risk Assessments

Indisputable and conclusive science-based research shows that, as reported through Health Canada's Confidential Test Data, NO harm will occur when pest control products are used according to label directions. The Risk Assessments of pest control products indicates that they are practically-non-toxic. There is NOT ONE known Incident Report of harm from the proper use of pest control products used in the urban landscape. However, there are thousands of known deaths per year from known cancer-causing substances such as unhealthy diet, physical inactivity, excess body weight, alcohol consumption, and over-exposure to the sun. Pest control products are scientifically safe, will cause NO harm, and will NOT cause cancer.

Background Information

Incident Reports

Health Canada's current approach to the re-evaluation of pest control products favours receipt of new information, including Incident Reports, from any and all stake-holders, even where this material might arrive very late in the review process. Incident Reports can be sent to Health Canada to identify any potential risks to health or the environment from the use of pest control products and to take corrective actions when necessary. The Health Canada data-base is regularly searched for any type of pattern related to a specific pesticide. If the result of a search indicates that there is a trend, such as repeated effects or multiple incidents for a particular product, then Health Canada evaluates the information in conjunction with scientific literature. As well, the more serious individual Incident Reports are reviewed. Evaluation Reports summarizing these reviews are posted on the Health Canada web-site. If the evaluation of the information identifies a safety issue, appropriate action is taken. Such action can range from minor label changes, to the discontinuation of the product. Health Canada encourages persons who believe they are experiencing issues related to a pest control product to consult the instructions on the label and contact their health care provider or poison control center. For more information, explore the following link ... <http://wp.me/P1jq40-7AA>

Background Information

Inferior Alternatives With Higher Toxicities

Green Alternative Pesticides are bogus and dismal failures. They are incorporated into pest control programs — not because they work — but because of legislation that imposes reckless and arbitrary prohibition. Professionals, and even home-owners, are being prevented from using conventional products that are truly effective as well as scientifically-safe. By definition, alternatives are INFERIOR, which is why they DID NOT win the market-place originally. Overall, Green Alternative Pesticides are ineffective, inadequate, inferior, high-risk, stunningly expensive, and more toxic. When examining Health Canada's Incident Reports, there is overwhelming evidence that Green Alternative Pesticides are questionably higher in toxicity, and pose higher environmental risks. Here are some examples of serious issues —

- animal (dog) deaths ?!?! • attempted suicide ?!?! • child gastro-intestinal vomiting • diarrhea ?!?! • hands discolored black • itchy & red hands • major oral exposure • minor dermal irritation • minor dermal swelling • minor eye exposure • minor eye irritation • minor grass damage • minor oral exposure • minor skin exposure • pain in arm & hand • respiratory exposure • sickness ?!?! • transient dermal irritation.

For more information, explore the following links ... <https://wp.me/P1jq40-24g> <https://wp.me/p1jq40-5R8> <http://wp.me/P1jq40-7AA>

Background Information

No Harm, No Worries

Fortunately, the issues that affect our health have been SUCCESSFULLY RESOLVED ! For every conventional pest control product, manufacturers spend 250 million dollars in order to satisfy Health Canada's scientific Risk Assessments. Two-hundred separate Risk Assessments are performed by the 350 professional experts at Health Canada to ensure that these products are scientifically-safe, and will cause NO harm. Consequently, there is NOT ONE KNOWN Incident Report of harm from the proper use of conventional pest control products used in the urban landscape. Pest control products are scientifically-safe, and will NOT cause harm to people, animals, or the environment. For more information, explore the following links ...

<http://wp.me/p1jq40-7HR> <http://wp.me/P1jq40-2ha>
<http://wp.me/p1jq40-5ni>

Background Information

Children Are Not At Risk

Health Canada DOES consider children's physiology, behaviours, and habits while playing on treated grass, and has concluded that pest control products cause NO harm and are NO threat to children. In fact, there are NO valid Incident Reports of harm to children when products are used appropriately. For more information, explore the following links ... <http://wp.me/P1jq40-2ha> <http://wp.me/p1jq40-5ni>

All good experts must never come to an end

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUIE that conspire to destroy the Green space and other industries (NORAHG)

About NORAHG

We Speak The Whole Truth With The Wisdom Of Real Experts Like Health Canada

We are the **N**ational **O**rganization **R**esponding **A**gainst **H**UJE that conspire to destroy the **G**reen space & other industries (**NORAHG**). NORAHG is a non-profit & independent organization that reports on the work of several highly-rated leading experts who have recognized expertise, training, & background in matters concerning pest control products, & who promote environmental realism & pesticide truths. NORAHG produces THE WISDOM OF REAL EXPERTS, a series of reports & blogs providing SCIENTIFIC INFORMATION from several highly-rated leading experts, like the scientists at Health Canada, who have recognized expertise, training, and background in matters concerning pest control products, and who promote environmental realism and pesticide truths. **REAL EXPERTS** — Any prohibition against pest control products is not supported by any of North America's respected and highly rated experts health and policy experts. These real experts speak out against the conspiracy to impose legislation that recklessly and arbitrarily prohibit conventional pest control products. They have recognized expertise, training and background in matters concerning pest control products. And none have ever consulted by anti-pesticide & environmental-terrorist organizations. They promote environmental realism and pesticide truths. These experts have publicly stated, in one form or another, that pest control products are scientifically-safe. <http://wp.me/p1jq40-8DV> THE WISDOM OF REAL EXPERTS is destined for the green space industry, nation-wide across Canada, the United States, & overseas, & can be found on *The Pesticide Truths Web-Site* ... <http://pesticidetruths.com/> All information, excerpts, & pictures contained in THE WISDOM OF REAL EXPERTS were retrieved from the Internet, & may be considered in the public domain. The information presented in THE WISDOM OF REAL EXPERTS is for preliminary planning. Before making a final decision, the turf manager is expected to obtain trusted expert advice from extension specialists, local distributors and/or agronomists. All products mentioned in THE WISDOM OF REAL EXPERTS should be used in accordance with the manufacturer's directions, & according to provincial, state, or federal law. For the official advantages, benefits, features, precautions, & restrictions concerning any product, the turf manager must rely only on the information furnished by the manufacturer. The mention of trade names does not constitute a guarantee or a warranty. We dare to defy by exploring the whole truth from an

independent perspective on *The Pesticide Truths Web-Site* ...
