Overview

TERRЖR-Talk Campaign Against Glyphosate Herbicide In Chilliwack, British Columbia

Natalie Forstbauer is the lunatxc-leader of a small group of on-line pesticide-hating & truth-challenged fanatxcs in Chilliwack, BC.

Forstbauer and her TERRЖR-Talk spreads fear-mongering, coercion, intimidation, & terrжr against glyphosate herbicide.

She is demanding that municipal officials recklessly & arbitrarily prohibit glyphosate in the urban landscape & in the agriculture industry.

Glyphosate is a federally-registered conventional weed control product that has been extensively & scientifically-assessed by the 350 expert scientists at Health Canada.

Forstbauer has taken a leadership role by ridiculously implying that her non-expert & uneducated assessment on glyphosate is somehow valid & truthful.

She has implied that her assessment is somehow being withheld from Health Canada and every other science-based regulatory agency in the world.

Health Canada, and certainly NOT Forstbauer, has the essential expertise on the subject of pest control products.

Forstbauer's non-expert & uneducated assessment shows that she was not fit to provide ANY opinion concerning glyphosate!

Forstbauer knows NOTHING about glyphosate.

She is most certainly NOT a scientist and is NOT a researcher.

She has NO expertise whatsoever in matters concerning glyphosate.

It is a recognized fact that prohibition is unnecessary since glyphosate is scientifically-safe, practically-non-toxic, and will cause NO harm.

Glyphosate has been VINDICATED by Health Canada.

NO ONE should be listening to Forstbauer and her TERRЖR-Talk.

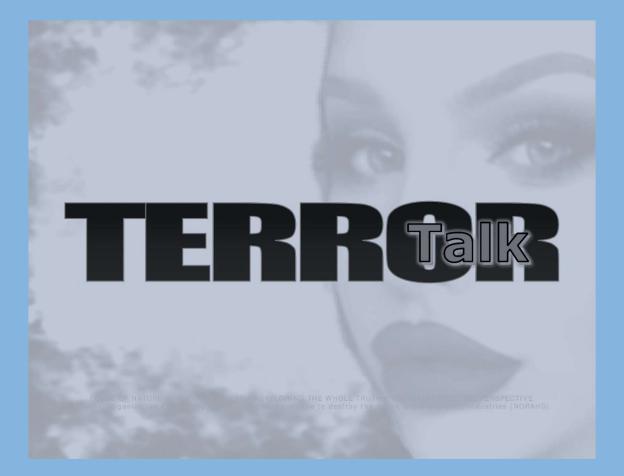

Moreover, Forstbauer's anti-pesticide campaign has placed her in severe conflict with her position as family member in a large, lucrative, & profitable organic pesticide-free farm business — Forstbauer Family Natural Food Farm.

She has huge vested interests in perpetuating imaginary dangers against conventional weed control products, such as glyphosate, because she has enormous financial interests with her family farm business that refuses to use these products.

Forstbauer conspires to wreak financial carnage & bankruptcy against her farm competitors by convincing municipal officials to impose the reckless, arbitrary, & unilateral removal of products that are desperately-needed by these businesses.

Forstbauer's conflict-of-interest clearly shows that she is not fit to make any demands concerning prohibitions against conventional weed control products like glyphosate!

NO ONE should be listening to Forstbauer and her TERRXR-Talk.

Glyphosate Does Not Belong In The Urban Environment & On Farms ?!?!

SUBVERSIVE COMMENTS BY TERRWR-TALKERS

TERRWR-Talker — Glyphosate Does Not Belong In The Urban Environment & On Farms ?!?!

ALLAN, Jenny —

This poison [WRONG!] doesn't belong anywhere in Canada [WRONG!], least of all on our food, « beautifying » our neighborhoods or anywhere near our children's schools or parks.

[Glyphosate will cause NO harm to children when used properly]

TERRXR-Talker — Glyphosate Does Not Belong In The Urban Environment & On Farms ?!?!

ARMSTRONG, Molly -

Protect our kids, the school district maintenance staff, and the environment.

And protect yourselves (and tax-payers) from legal liability \$\$ for knowing the dangers of Roundup as a carcinogen and still having staff use it on school grounds.

[Glyphosate will NOT cause cancer]

See the recent \$2 billion Monsanto/Bayer was ordered to pay in damages in California to a couple with non-Hodgkin's lymphoma linked to Roundup use ... these are in the news.

Continuing to have staff use it today in 2019 is willful negligence & unethical. [WRONG!]

BERNSTEIN, Miel —

It is time to get this poison out of our community.

[Glyphosate will cause NO harm to people and their environment when used properly]

TERRWR-Talker — Glyphosate Does Not Belong In The Urban Environment & On Farms ?!?!

BETTLES, Barbara —

I support the banning of glyphosate. [?!?!]

It does not belong in the school yards, parks, and farming fields. [?!?!]

Drastic global changes must be made. [?!?!]

VINDICATING GLYPHOSATE

There Are No Incidents Of Harm

Read the whole truth from an independent perspective ...

TERRXR-Talkers are WRONG!

Health Canada has found that glyphosate DOES NOT present risks of concern to human health or the environment when used according to label directions.

Observers have NO objection to some TERRXR-Talkers' choice of life-style, which, in this case, is a clear preference to live in an environment that looks like weed-infested garbage dumps (i.e. pesticide-free green spaces).

However, observers DO object to the imposition of this life-style choice on the majority of the community that DOES NOT want to live in this manner.

Moreover, there is NOT ONE KNOWN Incident Report of harm from the proper use of glyphosate used in the urban landscape.

Glyphosate is scientifically-safe, and will NOT cause harm to people, animals, or the environment.

NO ONE should be listening to Chilliwack's pesticide-hating fanatκcs and their TERRЖR-Talk.

TERRWR-TALKERS ARE WRONG

Residents Of Chilliwack Need To Know About Municipal Prohibition Failures In British Columbia

Read the whole truth from an independent perspective ...

The public must stop listening to TERRXR-Talkers!

Elsewhere in the province, British Columbia municipalities are apologizing that their prohibitions are DISMAL FAILURES because there is NO hope for controlling damaging pests.

In British Columbia, a MAJOR STUDY of anti-pesticide by-laws has concluded that municipal prohibitions are DISMAL FAILURES.

Without conventional pest control products, home properties have become pest-infested and dangerous garbage dumps because it is impossible to control invasive weeds and destructive insects by using so-called green alternative pesticides and practices.

Municipal prohibitions have led to catastrophic ecological carnage for tens of thousands of destroyed and ravaged properties every single year.

Municipalities CANNOT afford the hardship and cost of this #@!!% prohibition nonsense ?!?!

Prohibition by-laws are politically-correct rubbish.

Glyphosate BELONGS in maintenance programs for the urban environment.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

VINDICATING GLYPHOSATE

The Environment Will Not Be Harmed

Read the whole truth from an independent perspective ...

TERRWR-Talkers are WRONG!

Glyphosate products are NOT expected to pose risks of concern to the environment.

Health Canada has found that glyphosate DOES NOT present risks of concern to the environment when used according to label directions.

After concluding a 7 year evaluation of risks, Health Canada has granted the CONTINUED REGISTRATION of glyphosate with minor risk mitigation strategies.

Health Canada made the right decision, and deserves congratulations.

Health Canada has stated that it is confident that the pest control products that it approves for use in Canada can be used safely when label directions are followed.

Glyphosate products are NOT expected to pose risks of concern to the environment.

Incident Reports are monitored by Health Canada to identify any potential risks to the environment from the use of pest control products and to take corrective actions when necessary.

The evidence in favour of glyphosate is overwhelming.

Products containing glyphosate are UNLIKELY to affect your health.

Dietary risks from food and water are NOT of concern.

Glyphosate will cause NO harm to the environment when used properly.

The Health Of People Will Not Be Harmed

Read the whole truth from an independent perspective ...

TERRXR-Talkers are WRONG!

Products containing glyphosate are UNLIKELY to affect your health.

The evidence in favour of glyphosate is overwhelming.

Health Canada has found that glyphosate DOES NOT present risks of concern to human health when used according to label directions.

After concluding a 7 year evaluation of risks, Health Canada has granted the CONTINUED REGISTRATION of glyphosate with minor risk mitigation strategies.

Health Canada made the right decision, and deserves congratulations.

Health Canada has stated that it is confident that the pest control products that it approves for use in Canada can be used safely when label directions are followed.

Incident Reports are monitored by Health Canada to identify any potential risks to health from the use of pest control products and to take corrective actions when necessary.

There is NOT ONE KNOWN Incident Report of harm from the proper use of glyphosate in the urban landscape.

Glyphosate products are NOT expected to pose risks of concern to health.

Glyphosate will cause NO harm to people when used properly.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

TERRЖR-Talkers are WRONG!

Glyphosate will cause NO harm to children when used properly.

Glyphosate will cause NO harm to people and their environment when used properly.

Children are NOT at risk from pesticides like glyphosate, but they are at high-risk of exploitation & abuse by fanatxcal-adults.

For years, left-wing pesticide-hating fanatxcs have been despicable in their outrageous exploitation & abuse of children as dramatic weapons of coercion & ultimate environmental-terrxr!

These fanatxcs EXPLOIT & ABUSE children in order to promote prohibition against pest control products.

They exploit children to alarm and intimidate the public into believing that anti-pesticide prohibition is somehow necessary.

Even babies have been used to coerce, influence, stifle, and intimidate politicians.

Babies have been forced to function as weapons of coercion & terrxr.

No one wants #@!!% fanatxcs who exploit & abuse children and babies as lobbyists!

They have been clearly exposed to some form of fanatxcal-abuse which is reckless and unnecessary.

Prohibition that is imposed under the pretext of protecting children's health is wrong!

Pest control products are scientifically-safe, and will cause NO harm, and represent NO threat to children and babies.

VINDICATING GLYPHOSATE

Cancer Is Not An Issue

Read the whole truth from an independent perspective ...

TERRЖR-Talkers are WRONG!

Glyphosate will cause NO harm because of cancer.

Glyphosate has been VINDICATED by research conducted by US National Cancer Institute (NCI)!

The NCI researchers concluded that — glyphosate was NOT statistically significantly associated with cancer.

This large long-term research was published in the Journal of the National Cancer Institute (JNCI) on November 9th, 2017.

NCI was the largest research study of agricultural workers in history, a gold standard, over the longest period of time.

NCI definitively demonstrated in a real-world environment that glyphosate DOES NOT cause cancer.

International Agency for Research on Cancer (IARC) has operated as an anti-glyphosate & environmental-terrxrist organization.

IARC, the ONLY major science body to have insisted that glyphosate causes cancer [?!?!], has been caught doctoring documents and manipulating evidence to support its false-conclusion.

IARC has conducted bad science.

Occasionally, bad science has been promoted by IARC-fanatxcs who have received pay-offs and have practiced scientific fraud.

The IARC motivation for its conduct seems to have been financial.

A key IARC fanatxcal-advisor who lobbied against glyphosate had, reportedly, received a pay-off of 160,000 dollars.

He was bribed by lawyers who stand to profit from potential lawsuits involving glyphosate.

This is a truly gigantic scandal that has (predictably) received scant press coverage.

IARC has severely and perhaps irreparably damaged the reputation of its parent, the World Health Organization (WHO).

IARC-fanatxcs are glyphosate-hating crooks and lying-sacks-of-cxp!

Health Canada has found that glyphosate DOES NOT present risks of concern to human health or the environment when used according to label directions.

As of 2017, Health Canada is granting CONTINUED REGISTRATION of products containing glyphosate for sale and use in Canada.

The evidence in favour of glyphosate is overwhelming.

Products containing glyphosate are UNLIKELY to affect your health.

Overall, there are currently NO environmental Incident Reports involving glyphosate in Canada.

Health Canada, as well as all other national regulatory agencies world-wide, have VINDICATED glyphosate!

These agencies include those within the European Union, the United States, and the United Nations.

Glyphosate will NOT cause cancer when used appropriately.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

Europe Has Legislated Re-Approval

Read the whole truth from an independent perspective ...

TERRXR-Talkers are WRONG!

The majority of European Union nations DO NOT WANT anti-glyphosate prohibition.

On November 27th, 2017, the European Union (EU) voted to EXTEND its RE-APPROVAL of glyphosate for a period of 5 YEARS.

Glyphosate was NOT approved for the typical 10 or 15-years because the EU review process was driven more by politics than science.

Nonetheless, the European Union has VINDICATED glyphosate.

With the EU RE-APPROVAL, the International Agency for Research on Cancer (IARC) has been DISCREDITED, again, and forever.

The IARC's hazard report has been disputed by EVERY science-based national regulatory agency in the world, including two in Europe — the European Food Safety Authority and the European Chemicals Agency.

At major study, published in November 2017 by National Cancer Institute researchers concluded that ... glyphosate was NOT statistically significantly associated with cancer.

Nonetheless, the EU may still be able to prohibit glyphosate's use after the 5-year re-approval period.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

TERRЖR-Talker - Glyphosate Can Be Replaced With Effective Alternatives ?!?!

COTE, Johanna —

Our grand-children attend Chilliwack school district 33 and the use of pesticides may have a dramatic effect on their future well-being.

[Glyphosate will cause NO harm to children when used properly]

Please find alternate avenues and protect our future.

[There are NO alternatives that are safe and effective]

TERRЖR-Talker - Glyphosate Can Be Replaced With Effective Alternatives ?!?!!

HOLKHAM, Jennie -

Please stop this use of this chemical it damages our children, us, and our planet, our wildlife, and everything we need for a healthy environment. [WRONG!WRONG!]

We do not need to keep destroying our world.

Please stop using all chemicals.

There is always an alternative, so many natural safe remedies.

[There are NO alternatives that are safe and effective]

A lot of our so called weeds feed our bees and other wildlife, also us, some are medicinal.

Wake up and use these things please.

[There are NO alternatives that work]

TERRЖR-Talker — Glyphosate Can Be Replaced With Effective Alternatives ?!?!

RYCKELYNCK, Christina —

My grass with weeds is 15 com high, but I leave it as it is : once the heat diminishes, I drive everything off, and if about five kinds of weeds grow in it, I sprinkle salt on it.

[There are NO alternatives that are safe and effective]

Weeds are also a kind plant that we unfortunately do not want in our beautiful lawn: I still wonder: why ? [?!?!]

TERRWR-Talker – Glyphosate Can Be Replaced With Effective Alternatives 2121

STEERNBERG, Patricia —

Why poison our environment ... manually [i.e. manual weed picking] is the best, not pesticides. [WRONG!]

URSEL, Alyssa —

I'm signing because the health of my children is important. [?!?!]

It is up to us as adults to use safe alternatives for weed control.

[There are NO alternatives that are safe and effective]

I am shocked that this product is still being used to carelessly.

We have the proof and research that this product is extremely harmful to adults (can you imagine the damage it is doing to our children?) [WRONG!]

How about white vinegar — a very effective alternative. [WRONG!]

Or what if we didn't have grass, but clover instead.

[Clover attracts deadly stinging swarms of bees]

Much more hearty than grass to stand up to kids and sports [WRONG!], drought resistant [WRONG!], and tiny flowers to help with our struggling pollinators [WRONG!].

Know better, do better!

[Glyphosate will cause NO harm to children when used properly]

Alternatives Are Not Effective

Read the whole truth from an independent perspective ...

TERRXR-Talkers are WRONG!

There are NO low-risk, NO viable, NO efficacious, NO economical alternatives to replace conventional pest control products.

There are NO alternatives that work.

Green alternative pesticides are bogus and dismal failures.

Green alternatives are incorporated into pest control programs — not because they work — but because of legislation that imposes reckless and arbitrary prohibition.

Professionals, and even home-owners, are being prevented from using conventional products that are truly effective as well as scientifically safe.

By definition, alternatives are INFERIOR, which is why they DID NOT win the market-place originally.

Overall, green alternative pesticides are ineffective, inadequate, inferior, high-risk, more toxic, and stunningly expensive.

In many cases, these alternatives are questionably higher in toxicity, and pose higher environmental risks.

Prohibitions have created self-inflicted catastrophic ecological carnage caused by uncontrolled, invasive, and destructive pests.

Because of failed prohibitions, city-owned green spaces and residential properties have been severely damaged and destroyed, and have been turned into dangerous, pest-infested, & high-risk garbage dumps.

These prohibitions have cost stunningly exorbitant amounts of money — tens and tens of millions of dollars.

European chafer insects, Japanese knotweed, and Japanese beetle insects, and others, have become uncontrolled, invasive, and destructive pests — BECAUSE of prohibition.

It is impossible for professionals, and even home-owners, to protect their properties by using so-called green alternative pesticides. Hence, municipal prohibitions have been created with so-called EXCEPTION STATUSES.

A major study of British Columbia's anti-pesticide by-laws has concluded that municipal prohibitions are dismal failures.

This is because municipal officials are known to circumvent their own prohibitions by allowing thousands and thousands of inconsistent and unfair exception statuses that they have been conveniently inserted in their by-laws to avoid the use of green alternatives.

Without conventional pest control products, city-owned green spaces and residential properties have become dangerous, pest-infested, & high-risk garbage dumps because it is impossible to control weed invasions & insect infestations by using so-called green alternative pesticides and practices.

Municipal prohibitions have led to catastrophic pest carnage for tens of thousands of destroyed and ravaged properties every single year.

There are REAL trends against the conspiracy to impose prohibition against pest control products used in the urban landscape.

There are dozens and dozens of jurisdictions that have stopped or rescinded or limited or invalidated or beginning to repeal anti-pesticide prohibitions and restrictions, or granted professional lawn care businesses with an exception status.

No one wants this #@!!% nonsense!

The green alternative pesticides and practices used for controlling pests and fertilizing turf and ornamental plants are almost totally ineffective and will require frequent rescue treatments with conventional pest control products.

In many cases, green alternative pesticides are questionably higher in toxicity, pose higher environmental risks, and may be deemed unsafe for children, adults, and the environment.

Many green alternative pesticides are not even federally-registered and tested for the safety of human health and the environment.

Many green alternative pesticides have not been tested by Good Laboratory Practice (GLP) qualified laboratories, as is the case with conventional pest control products registered by the federal government.

Many green alternative pesticides are NOT proven to be scientifically safe!

In many cases, these alternatives should NOT be allowed anywhere near children!

In some cases, they may be considered as unsafe as using Agent Orange, DDT, and other banned products.

Green alternatives must be avoided.

Fortunately, conventional pest control products, such as glyphosate, are safe, effective, economical, and low-risk.

Manual Weed Picking Is Not Effective

Read the whole truth from an independent perspective ...

The public must stop listening to TERRXR-Talkers!

If someone arbitrarily dislikes conventional pest control products, that is THEIR choice. Observers have NO objection to THEIR choice of life-style, which, in this case, is a clear preference for the back-breaking practice of Manual Weed Picking.

But, no one, except for THEM, wants this #@!!% nonsense of Manual Weed Picking, even though this practice DOES NOT WORK!

Moreover, observers DO object to the imposition of THEIR choice on the majority of the community that DOES NOT want to perform lawn maintenance like COTTON-PICKERS.

If a small minority of highly-motivated fanatxcs want to spend 30 hours or more per week pulling weeds from their properties, that's their prerogative.

IMPOSING that life-style on everyone else for NO good reason IS UNFAIR.

Besides, Manual Weed Picking is TOTALLY INEFFECTIVE.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

Glyphosate Can Be Compared With Cigarettes

FORSTBAUER, Natalie —
Lunatжc-Leader Of Pesticide-Hating Fanatжcs In Chilliwack, BC
We were told cigarettes were safe, too. [?!?!]

Background Information

TERRWR-TALKERS ARE WRONG

Comparing Cigarettes To Glyphosate Is Pitifully Ridiculous, As Well As Laughably Stupid

Read the whole truth from an independent perspective ...

The public must stop listening to TERRXR-Talkers!

Comparing cigarettes to pesticides is PITIFULLY RIDICULOUS, as well as LAUGHABLY STUPID!

As we all know, GOVERNMENTS DON'T WANT PEOPLE TO SMOKE CIGARETTES, without doubt, a wise view.

And yet, while they have bombarded cigarette packages with disturbing pictures of rotting teeth, oral cancer, mouth sores, and people breathing through tubes, THEY HAVE NOT BANNED CIGARETTES.

However, several jurisdictions have RECKLESSLY & ARBITRARILY BANNED PESTICIDES.

Yet many of these BANNED PESTICIDES are APPROVED FOR USE BY HEALTH CANADA and the WORLD HEALTH ORGANIZATION.

They are also ALLOWED FOR USE IN AGRICULTURE.

Wherever these BANS occur, the government's position is that it is UNSAFE TO WALK ON OR LIE ON GRASS that's been sprayed with PESTICIDES, but safe to eat the FOOD it's been treated with.

Cigarettes have NOTHING IN COMMON with conventional pest control products.

Pesticide-hating fanatxcs use this NONSENSICAL COMPARISON purely as a means of ALARMING and ENRAGINGING the public into believing that it is necessary to PROHIBIT pest control products, despite the fact that they are GOVERNMENT-APPROVED, FEDERALLY-REGULATED, SCIENTIFICALLY-SAFE, PRACTICALLY-NON-TOXIC, and WILL CAUSE NO HARM.

There is NO FEDERAL REGULATION of tobacco products.

By comparison, there ARE national regulatory agencies that REGULATE pest control products — Health Canada.

There is NO agency that regulates tobacco, except perhaps for restricting access to young people.

By comparison, there IS an agency that REGULATES pest control products — Health Canada.

Moreover, cigarettes are ABOVE THE LAW because our governments have chosen to shield them from the regulatory process.

Cigarettes are NOT BANNED by governments because, for all their health warnings, THEY PROVIDE A LUCRATIVE SOURCE OF TAX REVENUE.

Instead, governments force retailers to HIDE CIGARETTE PACKAGES FROM VIEW, even though everyone knows they are for sale in the store.

Otherwise, CIGARETTES ARE NOT REGULATED.

This is NOT the case with pest control products.

Our governments have chosen to HEAVILY REGULATE pest control products.

Pest control products are STRINGENTLY TESTED and REGULATED in order to ensure that they are SCIENTIFICALLY SAFE and WILL CAUSE NO HARM.

NO ONE should be listening to Chilliwack's pesticide-hating fanatxcs and their TERRXR-Talk.

Read the whole truth from an independent perspective ...

The public must stop listening to TERRXR-Talkers!

Bayer (a.k.a. Monsanto) plans to STRIKE BACK against these glyphosate-hating fanatxcs!

Bayer has said that it was appealing recent jury-verdicts since it was confident that glyphosate WILL NOT cause cancer when used appropriately.

Glyphosate is the active ingredient in Roundup herbicide, which has been manufactured by Bayer since June 7th 2018, when the Monsanto brand was discontinued.

Bayer has faced LAWSUITS against glyphosate.

A California jury mandated an UNJUSTIFIED JACKPOT AWARD to a school grounds-keeper who falsely-alleged that he was dying of non-Hodgkin lymphoma because of his exposure to Roundup.

Another California jury mandated an UNJUSTIFIED JACKPOT AWARD to a couple who falsely-argued that Roundup caused their cancers.

Bayer has said that it was appealing the jury-verdicts since it was confident that glyphosate WILL NOT cause cancer when used appropriately.

In April 2019, Bayer announced that over 13,000 lawsuits [?!?!] related to Roundup had been launched in the US.

UNJUSTIFIED JACKPOT AWARDS will NEVER end!

During the California trials, the plaintiffs' profit-seeking, political, & subversive lawyers had manipulated the juries' emotions by using fake-news about glyphosate in order to obtain verdicts that led to UNJUSTIFIED JACKPOT AWARDS.

Their legal arguments trumped scientific evidence and manipulated these juries into falsely-believing that glyphosate causes harm — the logic of science-based evidence has been replaced with emotion and virtue signaling.

According to science-based evidence, glyphosate is ONLY toxic to plants because it is an herbicide.

There is no known biological mechanism by which glyphosate could cause cancer, therefore its carcinogenicity is NOT EVEN theoretically possible.

World-wide, science-based national regulatory agencies and leading experts have been siding with the overwhelming scientific evidence demonstrating that glyphosate WILL NOT cause cancer — there is NO bio-medical and NO epidemiological evidence to support the false-claim that glyphosate causes cancer.

Bayer plans to STRIKE BACK against glyphosate-hating fanatxcs!

Bayer has sought to REPAIR ITS REPUTATION, and to somehow appease glyphosate-hating fanatxcs, by announcing that it would invest 5,600,000,000 dollars US in R&D research.

With this R&D investment, Bayer will aim at better understanding of how pesticide resistance develops, discovering new pesticides, and devising more precise application methods.

Can Bayer ever appease glyphosate-hating fanatxcs ?!?!

No!

And there is a cost to society for this attempted-appearement.

Observers have commented that Bayer is DIVERTING R&D research from solving more pressing problems, such as, developing cures for cancer or controlling disease-carrying vermin in the tropics.

The cost to society for this attempted-appearement will likely be more suffering in the world than there would otherwise have been.

Glyphosate-hating fanat κ cs will NEVER be appeased and their environmental-terr κ r will NEVER end I

Bayer faces hostile glyphosate-hating activists with lunatxc-doctrines that are fanatxcal in character, ruthless in purpose, and subversive in method.

In the 9|11 era of environmental-terrxr ... fanatxcal enviro-terrxrist conspiracies have now spread against agriculture.

These conspiracies will attempt to prohibit glyphosate from the hated agriculture industry.

Bayer will STRIKE BACK against glyphosate-hating fanatxcs!

Glyphosate is safe, effective, economical, and low-risk.
