

U.S.A. – The Era Of Trump – FIFRA & Pesticides Attacked By Proposed National Prohibitions – It Was More Important Than Ever To Have Re-Elected President Donald J Trump For A Second Term In Office – 4 More Years Of Trump In 2024 – 2020 09 00

November 5, 2020 WILLIAM H GATHERCOLE AND NORAH G

Ending America's Enviro-Terrörism

**It Was More Important Than Ever To
Have Re-Elected President Donald J
Trump For A Second Term In Office**

4 More Years Of Trump In 2024

SUMMARY —

In the Era Of President Donald J Trump, America's enviro-terrörism & chemical alarmism has come to an end.

Trump replaced the worst president in modern history, & has been draining the swamp in Washington DC.

The Trump Administration has saved thousands of businesses & millions of jobs in the oil & gas, manufacturing, golf, & agriculture industries.

President Trump's top environmental adviser says pesticides are not bad for you.

The Trump Administration has **STOPPED** the US Environmental Protection Agency's (US EPA's) picking of political goals first, & gathering data later.

With its budget cuts, the Trump Administration has **ENDED** the US EPA's anti-chemical scare-mongering reign of terrör, with fake-news about supposed cancer-causing chemicals, cancer clusters, endocrine disruptors, & toxic dioxins !

Furthermore, the Trump Administration has ensured that the US EPA's science advisory committees must be balanced & un-biased.

The independence of the US EPA's science advisory committees has been re-affirmed.

The Trump Administration continues to be needed to **STOP** the fanatxcal Democrat socialist politician & activist Alexandra Ocasio-Cortez, who has proposed the lunatxkc resolution called Green New Deal which advocates for the United States to —

- end the use of fossil fuels within 10 years [?!?!]
- retro-fit, upgrade, or replace every building in America with state-of-the-art energy efficiency [?!?!]
- totally overhaul transportation by massively expanding electric vehicle manufacturing, build charging stations everywhere, create affordable public transit available to all, with the goal to replace every combustion-engine vehicle [?!?!]
- work with farmers & ranchers to create a sustainable [I.E. **ARBITRARILY PESTICIDE-FREE**], pollution- & greenhouse-gas-free, food system that ensures universal access to healthy food & expands independent family farming. [?!?!]

Inevitably, Ocasio-Cortez will demand **HARMFUL NATIONAL PROHIBITIONS** against pest control products. [?!?!]

President Trump has stated that the lunatxkc Green New Deal will be stunningly-expensive since it will cost an estimated 2,500,000,000-dollars per year.

Additionally, the Trump Administration will continue to be needed to **STOP** the fanatxcal US Congress that has **PROPOSED NATIONAL PROHIBITIONS** that would impose an unscientific, unbalanced, politically-driven process which would unnecessarily **REMOVE** pest control products.

These **PROPOSED NATIONAL PROHIBITIONS** would harm the golf & agriculture industries.

They would also significantly undermine the work of the US EPA.

Only the US EPA should be allowed to **PROHIBIT** pest control products, & **NOT** the US Congress.

In the Era Of Trump, agriculture & golf industries **WILL NOT** suffer **HARMFUL-PROHIBITIONS** against pest control products.

In fact, the Republicans in the US House are planning to **BAN-ALL-PESTICIDE-BANS**.

In the Era Of Trump, the swamp would have continued to be drained in Washington.

It will be more important than ever to have **RE-ELECTED** President Donald J Trump for a second term in office — 4 more years in 2024.

US Congress Has Proposed National Prohibitions That Would Impose An Unscientific, Unbalanced, Politically-Driven Process Which Would Unnecessarily Remove Pest Control Products

It Was More Important Than Ever To Have Re-Elected President Donald J Trump For A Second Term In Office

4 More Years Of Trump In 2024

Undermining 70 Years Of Regulatory Advancement

HR 7940 and S 4406 have recently been introduced in the US Congress and would **JEOPARDIZE** the continued innovation and availability of pesticide products.

These bills [I.E. **PROPOSED NATIONAL PROHIBITIONS**] impose an unscientific, unbalanced, politically driven process which would unnecessarily remove [I.E. **PROHIBIT**] pest control options from those who need them to ...

- safely grow crops
- perform golf course management
- protect schools & hospitals
- control pathogens & disease vectors

GCSAA and over 70 of its affiliated chapters has joined the members of the *Pesticide Policy Coalition* to officially **OPPOSE** the *Protect America's Children from Toxic Pesticides Act* of 2020 in a formal letter to members of Congress.

These **PROPOSED NATIONAL PROHIBITION** undermines 70 years of regulatory advancement based on best available science.

Specific provisions in the bills [I.E. **PROPOSED NATIONAL PROHIBITIONS**] include —

- **IMPLIES THAT FIFRA * IS INSUFFICIENT [?!?!]** , and this bill [**FALSELY**] attempts to « **BETTER PROTECT PEOPLE AND THE ENVIRONMENT FROM THE HARMS [?!?!] CAUSED BY DANGEROUS PESTICIDES [?!?!]** ».

* *Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA)*

- **SUSPENDS THE USE OF PESTICIDES DEEMED [ARBITRARILY] UNSAFE** by the European Union or Canada until they are thoroughly reviewed by the EPA. [?!?!]
- **CREATES A PETITION PROCESS** to enable **INDIVIDUAL CITIZENS** to **PETITION** the EPA to identify [**SUPPOSEDLY**] dangerous pesticides [?!?!] so that the EPA would no longer be able to indefinitely allow them to remain on the market. [?!?!]

- ENABLES LOCAL COMMUNITIES TO ENACT [UNNECESSARY] PROTECTIVE LEGISLATION and other policies without being vetoed or PRE-EMPTED by state law. [?!?!]
- CLOSES [SUPPOSEDLY] DANGEROUS LOOP-HOLES that have allowed the EPA to issue emergency exemptions and conditional registrations to use pesticides before they have gone through full health and safety review by the agency. [?!?!]
- BANS [I.E. NATIONALLY PROHIBITS] some of the [SUPPOSEDLY] most damaging pesticides which are scientifically known to cause significant harm [?!?!] to people and the environment, including neonicotinoid insecticides [?!?!] , which have contributed to pollinator collapse around the world [?!?!?!?!?!] , and have recently been shown to cause developmental defects [?!?!] , heart deformations [?!?!] , and muscle tremors [?!?!] in unborn children. [?!?!?!?!?!]
- BANNING [I.E. NATIONALLY PROHIBITING] some of the [SUPPOSEDLY] most damaging pesticides which are scientifically known to cause significant harm [?!?!] to people and the environment. [?!?!?!?!?!]

About The Golf Course Superintendents Association Of America

GCSAA's Government Affairs team will be doing direct outreach to members of Congress in the months ahead to talk to them about the importance of the *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA), the most important federal environmental law regulating the registration and use of pesticides in the country.

Pesticides are among the most highly-regulated products in the United States through FIFRA, and the US Environmental Protection Agency, with over 600 career employees dedicated to pesticide review, is assigned authority for registering, or re-registering, pesticides under FIFRA which governs the sale, distribution, and use of pesticides.

GCSAA's Government Affairs team will also be working with GCSAA members on direct outreach to Congress to explain what professional land management entails.

FIFRA !

The *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA) is a United States federal law that set up the basic system of pesticide regulation to protect applicators, consumers, & the environment. FIFRA is administered & regulated by the US Environmental Protection Agency (US EPA) & the appropriate state environmental agencies.

**Proposed National Prohibitions Have
Been Introduced In The US Congress That
Would Harm The Golf Course Industry**

**It Was More Important Than Ever To
Have Re-Elected President Donald J
Trump For A Second Term In Office**

4 More Years Of Trump In 2024

In a recent letter to members, the government affairs department of the Golf Course Superintendents Association of America [[GCSAA](#)] urged its members to tell Congress to oppose S 4406 / HR 7940 —

The Golf Industry Must Oppose Anti-Pesticide Bills In The US Congress

GCSAA Letter Concerning FIFRA

GCSAA members and friends —

Bills [[I.E. PROPOSED NATIONAL PROHIBITIONS](#)] have been introduced in Congress that would drastically change the way golf courses are managed by [BANNING](#) [[I.E. NATIONALLY PROHIBITING](#)] , eliminating or restricting many pesticide products superintendents rely on to maintain healthy turfgrass, trees, and ornamental plants.

The safe and responsible use of pesticides and the continued availability of effective products is a top priority for GCSAA and its members.

For decades, the *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA) has provided for the federal regulation of pesticide labeling, distribution, sale, and use with stringent safety standards and oversight at its core.

FIFRA's foundational, science-based safety standards have successfully provided the regulatory certainty golf course superintendents have long relied upon to manage invasive plants and pests on their golf courses.

But now, FIFRA is under attack.

S 4406, introduced by Senator Tom Udall (D-NM), and HR 7940, introduced Representative Joe Neguse (D-CO), would undermine the science-based standards contained within our nation's pesticide laws in many ways.

These bills [[I.E. PROPOSED NATIONAL PROHIBITIONS](#)] would —

- Immediately [BAN](#) [[I.E. NATIONALLY PROHIBIT](#)] several classes of pesticides, including organophosphates and neonicotinoids.
- [BAN](#) any product currently [BANNED](#) or otherwise prohibited by Canada, the European Union, or any one country in the European Union.
- Eliminate pesticide [PRE-EMPTION LAWS](#) in every state by allowing local governments to restrict pesticide products, thereby creating a patchwork of differing regulations from town to town.

This legislation is [NOT](#) likely to pass this Congress, but these bills [[I.E. PROPOSED NATIONAL PROHIBITIONS](#)] clearly represent a blueprint of how anti-pesticide groups want to amend pesticide laws in 2021 to significantly restrict [[I.E. PROHIBIT](#)] your access to these products.

Sending a letter now will not only show your opposition to the bill, it will also help prevent the bills [[I.E. PROPOSED NATIONAL PROHIBITIONS](#)] from gaining traction in the next Congress.

If you haven't already, please take a moment to send a message to your House and Senate members in support of FIFRA and in opposition to S 4406 / HR 7940.

Thank you for your support.

FIFRA !

The *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA) is a United States federal law that set up the basic system of pesticide regulation to protect applicators, consumers, & the environment. FIFRA is administered & regulated by the US Environmental Protection Agency (US EPA) & the appropriate state environmental agencies.

4 More Years Of Trump In 2024

Raising Concerns About National Prohibitions

New PROPOSED PROHIBITIONS introduced earlier in 2020 in the [DEMOCRAT-DOMINATED] US House of Representatives and Senate would make COMPREHENSIVE UPDATES to the *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA), the 1996 law governing pesticide use in the United States.

While unlikely to get serious consideration in Congress [BEFORE A TRUMP RE-ELECTION ON NOVEMBER 3RD, 2020], many in agricultural circles are RAISING CONCERNS about what's included in the PROPOSED PROHIBITIONS.

The *Protect America's Children From Toxic Pesticides Act* of 2020 (PACTPA) [?!?!] was introduced on August 4th, 2020, by the following [PESTICIDE-HATING DEMOCRATS] —

- Senator Tom Udall (D-NM), ranking member of the Senate appropriations subcommittee on interior, environment, and related agencies.
- Representative Joe Neguse (D-CO).

FIFRA !

The *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA) is a United States federal law that set up the basic system of pesticide regulation to protect applicators, consumers, & the environment. FIFRA is administered & regulated by the US Environmental Protection Agency (US EPA) & the appropriate state environmental agencies.

Nationally Prohibiting Pesticides

Their proposal would PROHIBIT the following pest control products —

- Neonicotinoid insecticides.
- Organophosphate insecticides.
- Paraquat herbicide.

PROHIBITION is being proposed under the FALSE-PRETEXT that they are supposedly PROHIBITED in 32 countries, including the European Union. [?!?!]

Neonicotinoids have been blamed for pollinator deaths. [?!?!]

The PROPOSED PROHIBITION also creates a PETITION PROCESS to the US Environmental Protection Agency [US EPA] for individual citizens and alters the process for emergency exemptions, among other changes.

The Weed Science Society of America (WSSA), and its national and regional affiliates, have joined with more than 300 agricultural and conservation organizations to PROTEST THE PROPOSED PROHIBITION as they believe it will significantly change the current science-based pesticide laws.

Currently, pesticides are regulated by the *Federal Insecticide, Fungicide, & Rodenticide Act* [FIFRA].

Placing Science In The Back-Seat

FIFRA specifies that US EPA career scientists are responsible for determining whether a given pesticide is safe, whether it should be registered, and how it should be used.

The **PROPOSED PROHIBITIONS** introduced in the House (HR 7940) and the Senate (S 4406) would put « *SCIENCE IN THE BACK-SEAT AND LET POLITICS DRIVE SUCH DECISIONS* », WSSA said.

For example, the **PROPOSED PROHIBITION** would allow **ANY** interested person [*I.E. INDIVIDUAL*] to submit a petition to designate an active ingredient or pesticide product as **DANGEROUS** [*?!?!*] regardless of —

- The individual's [*NON-SCIENTIFIC*] background. [*?!?!*]
- The individual's [*SUBVERSIVE*] motives. [*?!?!*]
- The scientific data supporting the product's safe use.

In addition, **ANY** pesticide **PROHIBITED** from use in the European Union or Canada **FOR ANY REASON** would be immediately **PROHIBITED** within the United States, even if extensive EPA scientific reviews have determined that it is safe to use. [*?!?!*]

US EPA's risk / benefit assessments of pesticides are widely recognized as the « *GOLD STANDARD* ».

In fact, many countries align with, or defer to, US EPA's regulatory decisions because of its scientific rigor.

Yet, the **PROPOSED PROHIBITION** would allow these science-based decisions to be **OVERTHROWN** [*?!?!*] by less comprehensive analyses.

Gutting Decades Of Federal Regulations

WSSA said decades of federal regulation and scientific progress will be **GUTTED** if the **PROPOSED PROHIBITION** passes.

According to WSSA executive director of science policy Lee Van Wychen —

These bills [I.E. PROPOSED NATIONAL PROHIBITIONS] would SIGNIFICANTLY UNDERMINE the work of the EPA.

They would impose an UNSCIENTIFIC AND UNBALANCED PROCESS that would JEOPARDIZE the continued availability of herbicides and would DETER companies from investing in new innovations.

Ultimately, the United States could LOSE the pest control options we need to grow crops safely, protect our homes and infra-structure, control pathogens and diseases, and maintain parks, golf courses and natural areas.

A letter to members of the Senate and House opposing this **PROPOSED PROHIBITION** was endorsed by —

- Aquatic Plant Management Society.
- North Central Weed Science Society.
- Northeastern Weed Science Society.
- Southern Weed Science Society.
- Weed Science Society of America.
- Western Society of Weed Science.

According to the letter sent to Senate and House —

The legislation, as introduced, would GUT decades of federal regulation and scientific progress, UNDERMINING the work of EPA's career scientists in the evaluation of pesticide safety and oversight of pesticide registration and use.

The bills [I.E. PROPOSED NATIONAL PROHIBITIONS] would JEOPARDIZE the continued availability and innovation of pesticide products by IMPOSING an unscientific and unbalanced process that could UNNECESSARILY REMOVE [I.E. NATIONALLY PROHIBIT] pest control options from those who need them to safely grow crops, protect homes and infra-structure, control pathogens and disease vectors and maintain green spaces such as parks and golf courses.

[DEMOCRAT-SENATOR] Tom Udall (D–NM), who is set to retire after this expiring term in fall 2020, said chemical safety has been an area of bi-partisan cooperation before.

Udall said this has the opportunity to be similar to the last major reform bill seen 25 years ago, with a strong bill that brought the industry to the table and galvanized efforts for reform, where different view-points were negotiated and all stakeholders ended up agreeing.

Changing Science-Based Pesticide Laws

The Weed Science Society of America (WSSA), and its national and regional affiliates, have joined with more than 300 agriculture and conservation organizations to **PROTEST PROPOSED PROHIBITION** that would change our science-based pesticide laws.

Currently, pesticides are regulated by the *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA).

FIFRA specifies that career scientists in the US Environmental Protection Agency (EPA) are responsible for determining whether a given pesticide is safe, whether it should be registered and how it should be used.

PROPOSED PROHIBITIONS introduced in the House (HR 7940) and the Senate (S 4406) would put science in the back-seat and let politics drive such decisions, WSSA says.

For example, a **PROPOSED PROHIBITION** would allow **ANY INTERESTED PERSON** [I.E. **INDIVIDUAL**] to submit a petition to designate an active ingredient or pesticide product as **DANGEROUS** [**?!?!**] regardless of —

- The individual's [**INADEQUATE**] background. [**?!?!**]
- The individual's [**ULTERIOR**] motives. [**?!?!**]
- The scientific data supporting the safe use of [**NO-RISK**] pesticides.

In addition, **ANY** pesticide **PROHIBITED** for use in the European Union or Canada, for **ANY** reason [**?!?!**] , would be immediately **PROHIBITED** within the United States [**?!?!**] , even if extensive EPA scientific reviews have determined it is safe to use.

The US EPA's risk-benefit assessments are widely recognized as the « **GOLD STANDARD** ».

In fact, many countries align with or defer to the US EPA's regulatory decisions because of their scientific rigor.

Yet, the **PROPOSED PROHIBITION** would allow these science-based decisions to be overthrown by less comprehensive [**AMATEUR & NON-SCIENTIFIC**] analyses.

WSSA says decades of federal regulation and scientific progress will be **GUTTED** if the **PROPOSED PROHIBITION** passes.

According to Lee Van Wychen, executive director of science policy for Weed Science Society of America —

These bills [I.E. PROPOSED NATIONAL PROHIBITIONS] would significantly UNDERMINE the work of the US EPA.

They would IMPOSE an unscientific and unbalanced process that would JEOPARDIZE the continued availability of herbicides, and would DETER companies from investing in new innovations.

Ultimately, the United States could LOSE the pest control options we need to grow crops safely, protect our homes and infra-structure, control pathogens and diseases, and maintain parks, golf courses, and natural areas.

A letter to members of the Senate and House of Representatives **OPPOSING** this **PROPOSED PROHIBITION** was endorsed by —

- Aquatic Plant Management Society.
- North Central Weed Science Society.
- Northeastern Weed Science Society.
- Southern Weed Science Society.
- Weed Science Society of America.
- Western Society of Weed Science.

About The Weed Science Society Of America

The Weed Science Society of America, a non-profit scientific society, was founded in 1956 to encourage and promote the development of knowledge concerning weeds and their impact on the environment.

The Society promotes research, education and extension outreach activities related to weeds, provides science-based information to the public and policy makers, fosters awareness of weeds and their impact on managed and natural ecosystems, and promotes cooperation among weed science organizations across the nation and around the world.

While Pest Control Operators Are Understandably Interested In The November 3rd General Election & How The US Congress Make-Up Will Change, They Also Need To Keep Tabs On Proposals To Impose National Prohibitions Against Pesticides

It Was More Important Than Ever To Have Re-Elected President Donald J Trump For A Second Term In Office

4 More Years Of Trump In 2024

Message From Bayer

While PCOs [PEST CONTROL OPERATORS A.K.A. INDOOR EXTERMINATORS] have been understandably interested in the November 3rd General Election and how the US Congress make-up will change, they also need to keep tabs on PROPOSED PROHIBITIONS, local and state, that impact pesticide use.

That was the message from Mr Dave Tierney, director of government affairs at Bayer CropScience, who shared several regulatory trends the pest control industry will be following in 2020-2021.

Mr Tierney worked in government affairs 15 years ago for Monsanto (which was purchased by Bayer) when Monsanto was defending itself against those opposed to GMOs (genetically modified organisms).

Proposed National Prohibitions

Mr Tierney recalled that about 35 states had PROPOSED PROHIBITIONS around Genetically-Modified Organisms [GMOs] in place at one point, but that ...

... federally things were pretty much in place.

We're a highly regulated industry, which is a good thing.

And so not much really happened.

But a lot of those same individuals that we maybe had some challenges with then ... have moved over to pesticides now.

Mr Tierney said that this past year has seen ...

... a record amount of bills [I.E. PROPOSED NATIONAL PROHIBITIONS] introduced in state legislative bodies that would PROHIBIT or somehow limit our ability and our customers' ability to use some of these highly regulated [NO-RISK] products.

Upwards of 300 different pieces of PROPOSED PROHIBITION have been introduced, Mr Tierney said.

In early October 2020, California initiated a review of 22 different pesticides under Prop 65 for potential labeling of different claims.

As Mr Tierney noted —

That is a great example of where we would see that as an OVER-REACH and we will do what we can.

Mr Tierney said he expects PESTICIDE PRE-EMPTION to continue to be challenged in 2020-2021.

National Pest Management Association (NPMA), and others, have long supported PESTICIDE PRE-EMPTION, the belief that state lead agency PRE-EMPTS local government when it comes to determining how pest control products and services are employed.

America's Pre-Emption Laws

Mr Dave Tierney, director of government affairs, Bayer CropScience, explained the importance of PRE-EMPTION.

I think local control is important for many, many things but for the products we use not so much.

I really think the scientific expertise, the regulatory framework that's in place, and the resources that are required, are there at the state level and at the federal level [WITH PRE-EMPTION].

Mr Tierney warned that he is seeing PRE-EMPTION CHALLENGED more and more.

Mr Tierney cited recent efforts by the Minneapolis Park and Recreation Board to PROHIBIT the use of [NO-RISK] GLYPHOSATE on Minneapolis parkland, as well as other efforts in New Jersey and California.

We'll continue to engage [WITH PRE-EMPTION] as well.

And again, try to work with others to keep some of those kind of laws in place.

AMERICA'S PRE-EMPTION LAWS !

Under the *Federal Insecticide, Fungicide, & Rodenticide Act* (FIFRA), states are allowed to develop their own regulations that are more comprehensive and stringent than federal regulations.

State regulatory offices typically license professional lawn care businesses and other users of pest control products, certify individual applicators, investigate violators, and enforce laws in conjunction with the US EPA and other agencies.

The MAJORITY of states have LEGISLATED PRE-EMPTION LAWS in order to STOP PROPOSED PROHIBITIONS against safe, effective, and no-risk pest control products.

In general terms, PRE-EMPTION refers to the ability of one level of state or federal government to over-ride the laws of a lower municipal level.

PRE-EMPTION LAWS have effectively stopped the possibility of RECKLESS & ARBITRARY PROHIBITIONS against pest control products, and even against fertilizers, used in the urban landscape and used by the agriculture industry.

However, with the support of anti-pesticide organizations, several states and municipalities are fighting to OVER-TURN PRE-EMPTION LAWS in order to IMPOSE the needless, senseless, and malicious PROHIBITION of products that are, otherwise, EPA-approved, federally-legal, scientifically-safe, practically-non-toxic, and will cause NO harm.

Roundup Litigation

Mr Dave Tierney, director of government affairs, Bayer CropScience, also discussed LITIGATION.

Mr Tierney said he expects the specialty chemical industry will continue to be challenged in court, citing recently SETTLED ROUNDUP LITIGATION.

I think the great news is everyone here who was used glyphosate [I.E. ROUNDUP] in the past will continue to do so the way they always have.

Mr Tierney added that there are three big Roundup cases in California that Bayer has APPEALED, and that these cases will likely end up in the [CONSERVATIVE-MAJORITY] US Supreme Court.

ROUNDUP LITIGATION & VINDICATION !

The lawsuits have gone wild with **JACKPOT-JUSTICE** against no-risk Roundup & manufacturer Bayer. Consequently, Bayer has settled thousands of Roundup lawsuits based on false-cancer-claims as part of an 11,000,000,000-dollar settlement plan.

In the meantime, a kangaroo-trial-lawyer behind a major Roundup lawsuit has been **JAILED FOR AN EXTORTION SCHEME** against Bayer. Everyone must be reminded that Roundup-hating subversive-fanatixcs & kangaroo-trial-lawyers may be acting like crooks & lying sacks of crxp.

Terrxr **NEVER** ends with the conspiracies against the manufacturer of Roundup are launching frivolous cancer-litigations & kangaroo-trials, as well as attacking through social media, intimidation, & confrontation. These conspiracies are coordinated & well-funded. **JACKPOT-JUSTICE** lawsuits against no-risk Roundup are the product of rampant collusion, misconduct, & even fraud & corruption. Gullible & ignorant juries have awarded **JACKPOT-JUSTICE** amounts of 80,000,000-dollars or more. The Roundup-cancer litigations have been textbook cases of kangaroo-trials, all without real science-based evidence against no-risk Roundup. Roundup-terrxxr **MUST** end !

Terrxr **NEVER** ends with kangaroo-trials that attack Bayer, the Roundup manufacturer. With these trials, the legal system has been irretrievably-corrupted. The false-cancer-claims against Roundup should have **NEVER** been admitted as evidence in these trials. Real science-based evidence & relevant safety data have been replaced by emotion & virtue signaling. Roundup **WILL NEVER CAUSE CANCER**. We must keep bad & fraudulent science out of our courtrooms since no-risk Roundup has been **VINDICATED** again & again by the safety findings of every respected national regulatory agency & expert organization world-wide. Roundup-terrxxr **MUST** end !

About The National Pest Management Association

The National Pest Management Association (NPMA), a non-profit organization with nearly 5,000 members from around the world, was established in 1933 to support the pest management industry's commitment to the protection of public health, food and property.

This commitment is reflected both in the continuing education of pest management professionals and the dissemination of timely information to homeowners and businesses.

Mr Jake Plevelich, Director of Public Policy at National Pest Management Association (NPMA), has recognized Super SPARs (NPMA State Policy Affairs Representatives) for their efforts in 2020.

SPARs are NPMA members who work to better coordinate federal and state advocacy between NPMA and the state associations.

Plevelich recognized the following State Policy Affairs Representatives —

- Arizona — Stu Keenan, KY-KO Pest Prevention, Mesa AZ
- California — Darren Van Steenwyk, Clark Pest Control, Lodi CA
- California — Jim Steed, Neighborly Pest Management, Roseville CA
- Colorado — Kevin Lemasters, EnviroPest, Windsor CO
- Maryland — Andrea Brubaker, American Pest, Fulton MD
- Maryland — Brian Schoonmaker, Capitol Pest, Bethesda MD
- Michigan — Bill Welsh, Rose Pest Solutions, Troy MI
- New England — Ted Brayton, Griggs & Browne Co, Providence RI
- North Carolina — Marty Roberts, Rid-a-Bug Exterminating, Hamptonville NC

- Pennsylvania — Marty Overline, Aardvark Pest Management, Philadelphia PA

NPMA is the most credible and tireless advocate for the pest management industry in Congress, before federal agencies, the administration, and in the courts.

We also work with our state partners to ensure the industry's voice and representation is as clear in state capitals throughout the country as it is in Washington DC.

**The Republicans In The US House
Plan To Ban-All-Pesticide-Bans**

**It Was More Important Than Ever To
Have Re-Elected President Donald J
Trump For A Second Term In Office**

4 More Years Of Trump In 2024

Banning Harmful National Prohibitions

As someone who has spent a couple of decades trying to educate people about the health and environmental dangers of pesticides and the importance of **BANNING** [I.E. **NATIONALLY PROHIBITING**] them, you can imagine my surprise at discovering the current administration's plan to prevent pesticides from being **BANNED**.

Yes, you read that right — the Republicans in the US House plan to **BAN-PESTICIDE-BANS**.

Why would anyone try to stop the **BANNING** of toxic, and frequently cancer-causing, pesticides ?

The short answer is — money. [?!?!]

According to Farm Journal's AgPro, the pesticide industry is expected to be worth 81,000,000,000-dollars by 2020, but pesticide **BANS** [I.E. **NATIONAL PROHIBITIONS**] stop the chemical giants from selling their products in areas where these **BANS** are passed. [?!?!]

But, there's more to the story.

Montgomery County's Harmful-Prohibition

In 2015, Montgomery County, Maryland, decided to pass a BAN [I.E. PROHIBITION] on pesticides within their borders.

The pesticide industry sued the county and won. While the county was able to BAN [I.E. PROHIBIT] the use of pesticides on public land, the judge stopped them from BANNING them altogether in their region.

The pesticide manufacturers did not stop there. [?!?!?!?]

MONTGOMERY COUNTY PROHIBITION !

Government officials in Montgomery County are part of a pesticide-hating left-wing enviro-fanatical regime. They subversively conspire to impose reckless, arbitrary, harmful, & doomed-to-fail prohibition against pest control products used in the urban landscape.

Montgomery County is a county in the US State of Maryland with a population of over one million residents. It is one of the 10 richest counties in the United States, & it is also the **ONLY** county in the country to impose harmful-prohibition.

Montgomery County's prohibition is a dismal & ridiculous failure. Its fanatical doctrines of pesticide-free maintenance are politically-correct rubbish. Officials who decided to impose prohibition know nothing about pest control products. Montgomery County's green spaces will inevitably need to be treated with safe & effective conventional pest control products, otherwise, they will become pest-infested & dangerous garbage dumps.

Not surprisingly, unjustified exception statuses by Montgomery County allow the use conventional pest control products despite its claims of pesticide-free green spaces. The county defiantly allows these products in order to avoid catastrophic ecological pest disasters. Officials know full well that their prohibition is harmful & **DOES NOT** protect the county green space investments from invasive weeds & damaging insects. Montgomery County **CANNOT**, ever, be pesticide-free.

Overall, Montgomery County's use of Integrated Pest Management (IPM) is also rubbish because it **CANNOT** control damaging pest populations to an acceptable level in established turf. IPM relies upon green alternative pesticides that are inferior, more hazardous, & will not work. IPM is #@!!% futile nonsense, & can only lead to garbage dump green spaces.

Montgomery County's officials know nothing about pest control products. And they arbitrarily ignore that conventional pest control products **ARE** scientifically-safe, & will **NOT** cause harm to children, adults, & the environment. Montgomery County's fanatical-doctrine of prohibition against these products is **NOT** necessary.

A bold, vigorous assault is necessary against the mis-information concocted by officials in Montgomery County. We will not be beaten by these pesticide-hating fanatics. We must take action to strike back & respond against Montgomery County's anti-pesticide & environmental terrorism !

Federal Farm Bill

Only The US EPA Should Be Allowed To Prohibit Pest Control Products

Somehow, language was added to the federal Farm Bill that would PROHIBIT local county or town governments from RESTRICTING the use of pesticides — a BAN-ON-PESTICIDE-BANS.

If this version of the federal Farm Bill passes by the US Senate this fall, all local governments across the United States will LOSE THEIR RIGHT TO BAN [I.E. PROHIBIT] pesticides in their communities.

While some people claim that only the federal US Environmental Protection Agency (US EPA) should be allowed to BAN [I.E. PROHIBIT] pesticides, the reality is that the US EPA has been doing anything but protecting American citizens [?!?!?!] , or fulfilling their mandate involving environmental protection [?!?!?!] .

Instead, the US EPA has been going in a different direction.

Recently, the US EPA was sued and lost.

As a result, the government agency was forced to BAN [I.E. PROHIBIT] the pesticide chlorpyrifos, but why does it take lawsuits for the agency to BAN these toxic [?!?!] substances ?

That remains unclear but the US EPA has a lengthy history of not looking out for the health of Americans and their environment. [?!?!?!]

That's because the US EPA classified Roundup as a carcinogen 30 years ago ... but mysteriously reversed decision. [?!?!?!?!]

So, it's not a logical position for anyone to try to pass the Farm Bill as it stands, declaring that only the US EPA should be able to BAN [I.E. PROHIBIT] pesticides.

After all, the US EPA has proven itself unconcerned [?!?!?!] about the rampant [?!?!?!] use of pesticides and their effects on human health and the environment [?!?!?!] .

ROUNDUP WILL NEVER CAUSE CANCER !

Roundup has been **VINDICATED** & continues to be registered as a successful, safe, & no-risk product. The safety findings of every respected national regulatory agency & expert organization world-wide, with 4 decades & 3300 studies, have concluded that no-risk Roundup **WILL NEVER CAUSE CANCER**. There is **NO** bio-medical & **NO** epidemiological & **NO** real science-based evidence to support the perpetuation of false-cancer-claims against Roundup, based on assessments of actual risk.

National regulatory agencies & expert organizations have **VINDICATED** Roundup with their relevant safety data, which include — • US Environmental Protection Agency (US EPA) • Health Canada • European Food Safety Authority • European Chemicals Agency • UN Food & Agriculture Organization • Germany's Institute for Risk Assessment • Australia's Pesticides & Veterinary Medicines Authority • & others.

Furthermore, the US Environmental Protection Agency (US EPA) has evaluated Roundup, & has re-affirmed that there is **NO RISK** to public health when used properly. Additionally, a study conducted by US National Cancer Institute followed the health of 54,000 farmers & commercial pesticide applicators for over two decades, & **NEVER FOUND VALID CANCER-CLAIMS** against Roundup. They have all concluded that Roundup **WILL NEVER CAUSE CANCER**. Roundup has been **VINDICATED**.

Roundup Kangaroo-Trials

The revised Farm Bill wording to [BAN-PESTICIDE-BANS](#) follows on the heels of a landmark court case against Monsanto [[A.K.A. BAYER](#)], in which the manufacturer of the glyphosate-based pesticide Roundup, lost and was ordered to pay 289,000,000-dollars to Dewayne Lee Johnson.

Sadly, Johnson initiated the lawsuit because he was diagnosed with terminal non-Hodgkin's Lymphoma [[UNRELATED TO THE USE OF NO-RISK ROUNDUP](#)].

Johnson sustained lesions on over 80 per cent of his body, even though he routinely wore protective clothing when he sprayed Roundup. [[?!?!?!?!](#)]

Monsanto appealed the verdict and, just days ago, lost again.

While Johnson was victorious in his lawsuit, he has been given only months to live.

The pesticide, glyphosate, has been linked in many scientific studies to non-Hodgkin's lymphoma — cancer of the lymphatic system — the same kind of cancer Dewayne Lee Johnson is currently suffering from [[?!?!?!?!](#)], as well as genetic damage to humans [[?!?!?!?!](#)] .

Additionally, it has also been linked to Alzheimer's [[?!?!?!?!](#)], Parkinson's [[?!?!?!?!](#)], autism [[?!?!?!?!](#)], infertility [[?!?!?!?!](#)], miscarriages [[?!?!?!?!](#)], birth defects [[?!?!?!?!](#)], chronic kidney and liver diseases [[?!?!?!?!](#)], diabetes [[?!?!?!?!](#)], heart disease [[?!?!?!?!](#)], and hypothyroidism [[?!?!?!?!](#)] .

The World Health Organization (WHO) reviewed around 1000 studies before concluding that this pesticide is a probable carcinogen in 2015. [[?!?!?!?!](#)]

Yet, the US EPA continues to allow the rampant use of this toxic [[?!?!](#)] pesticide.

Harmful-Prohibitions Are An Abuse Of Power

**It Was More Important Than Ever To
Have Re-Elected President Donald J
Trump For A Second Term In Office**

4 More Years Of Trump In 2024

If this new bill passes we can expect to see sky-rocketing rates of cancer [?!?!] , infertility [?!?!] , depression [?!?!] , Alzheimer's [?!?!] , birth defects [?!?!] , and many other serious health conditions that have been linked to pesticide use because they will likely be sprayed in even higher amounts than in the amounts they are currently used. [?!?!?!?!?!?!?!]

Perhaps more than ever, people need to get out and vote against this **ABUSE OF POWER** [?!?!] before the current administration passes legislation to prevent any future **BANS** [I.E. **NATIONAL PROHIBITIONS**] on toxic and dangerous pesticides [?!?!] .

The future health of all Americans depends on it.

NO-RISK PESTICIDES !

NO harm will occur when conventional weed control products are used according to Health Canada's Approved Pesticide Product Labels.

The risk assessments of these products indicate that they are practically-non-toxic.

There is **NOT ONE** known incident report of harm from the proper use of weed control products used in the urban landscape.

These products are scientifically safe, will cause **NO** harm, & will **NOT** be toxic, & will **NOT** dangerous. [See link below.]

The instruction & safety precautions that appear on Health Canada's Approved Pesticide Product Labels are there to protect you & the environment.

Read Health Canada's Approved Pesticide Product Labels. [See link below.]

Read the Re-Entry Intervals on these Product Labels. [See link below.]

These are necessary to ensure that any pest control product residues on the treated turfgrass surfaces **DO NOT** pose an unacceptable risk to human health.

TERROR AGAINST ROUNDUP IS ENDLESS !

We face hostile politicized lunatic doctrines that are fanatical in character, ruthless in purpose, & subversive in method. In the 9|11 era of environmental-terror, harmful anti-pesticide prohibition commenced against the urban use of pest control products. These activities have now spread against fertilizers. These acts of subversion will next eliminate pest control products from the hated golf industry. And then, nursery plant production. And then, the agriculture industry. And finally, harmful & fanatical prohibition will spread nationally, & even internationally, against all pest control products & even fertilizers. Anti-pesticide & environmental-terrorism will **NEVER** end !

The conspiracies against the manufacturer of Roundup, Bayer, have been coordinated & well-funded. These conspiracies have been launching frivolous cancer-litigations & kangaroo-trials, as well as attacking through social media, intimidation, & confrontation against the scientifically-innovative Bayer.

Jackpot-justice lawsuits against no-risk Roundup have been based upon rampant collusion, misconduct, & even fraud & corruption. Gullible & ignorant juries have awarded outrageous amounts of 80,000,000-dollars or more. As of February 6th, 2020, litigations from approximately 48,600 plaintiffs with false-cancer-claims against Roundup had been served in the United States.

Meanwhile, Bayer continued to constructively engage in the confidential court-ordered mediation proceedings to explore whether a settlement could be reached on reasonable terms that would be structured in a way that would bring the Roundup cancer-litigations & kangaroo-trials to a reasonable conclusion. In June 2020, Bayer surrendered to kangaroo-trial-lawyer extortion over the perpetuation of false-cancer-claims against Roundup. [?!?!]

The conspiracies against no-risk Roundup are designed to impose Marxist socialism. In essence, the frivolous cancer-litigations & kangaroo-trials against Roundup are conspiracies that are designed to re-distribute wealth from innovative companies, like Bayer, to undeserving plaintiffs with false-cancer-claims against Roundup — all while kangaroo-trial-lawyers are taking a healthy cut for themselves.

Can Bayer ever appease Roundup-hating subversive-fanatics & kangaroo-trial-lawyers ?!?! **NO !** These fanatics & lawyers will **NEVER** be appeased, & their environmental-terror against Bayer will **NEVER** end ! They harm scientifically-innovative businesses like Bayer. They will **NEVER** serve **ANY** useful purpose to society. Nonetheless, Roundup will **NEVER** cause cancer because it is biologically impossible.

<http://pesticidetruths.com/wp-content/uploads/2020/11/Reference-USA-2017-07-17-A-Step-Toward-Scientific-Integrity-At-The-EPA-Milloy.pdf>

**The US EPA'S Science Advisory Committees
Must Be Balanced & Un-Biased**

The Wisdom Of Juris Dr Steven J Milloy

**In The Era Of Trump, The Swamp
Was Being Drained In Washington**

War On Science ?

In May 2017, the Trump administration began the process of **REPLACING** the small army of **OUTSIDE SCIENCE ADVISERS** at the US Environmental Protection Agency [**US EPA**].

In June 2017, 38 additional **US EPA SCIENCE ADVISERS** were notified that their appointments would **NOT BE RENEWED** in August.

To President Trump's critics, this is another manifestation of his administration's « **WAR ON SCIENCE** ». [**?!?!**]

Histrionics aside, the administration's actions are long overdue.

The most prominent of the US EPA's myriad boards of **OUTSIDE SCIENCE ADVISERS** are the *Science Advisory Board* [**SAB**] and the *Clean Air Scientific Advisory Committee* [**CASAC**].

Mostly made up of university professors, these boards also frequently draw members from consulting firms and activist groups.

Only **RARELY** do members have backgrounds in **INDUSTRY**.

All US EPA boards are governed by the *Federal Advisory Committee Act*, which requires that they be **BALANCED & UN-BIASED**.

While the US Environmental Protection Agency is required by law to convene the SAB and CASAC, the agency is **NOT** bound by law to heed their advice.

War On Coal & Fine-Particles

The US EPA's Obama-era « *WAR ON COAL* » rules and its standards for ground-level ozone — possibly the most expensive US EPA rule ever issued — depend on the same scientifically **UNSUPPORTED NOTION** that the **FINE-PARTICLES** of soot emitted by smoke-stacks and tail-pipes are **LETHAL**.
[?!?!]

The US EPA claims that **FINE-PARTICLES** kill hundreds of thousands of Americans annually. [?!?!]

The US EPA first considered regulating **FINE-PARTICLES** in the mid-1990s.

But when the US Environmental Protection Agency [**US EPA**] ran its claims past the *Clean Air Scientific Advisory Committee* [**CASAC**] in 1996, it concluded that the scientific evidence **DID NOT** support the agency's regulatory conclusion.

Ignoring the panel's advice, the US EPA's leadership chose to regulate **FINE-PARTICLES** anyway, and resolved to figure out a way to avoid future troublesome opposition from CASAC.

FINE-PARTICLES – PM_{2.5} PARTICLES !

It has been speculated that PM_{2.5} particles produce respiratory and cardiovascular illness. Short for Particulate Matter, 2.5 micrometers or less, PM_{2.5} particles are considered as air pollutants with a diameter of 2.5 micrometers or less, small enough to invade even the smallest airways.

EPA Grantees & Fine-Particles

In 1996, two-thirds of the CASAC panel had **NO** financial connection to the US EPA.

By the mid-2000s, the US Environmental Protection Agency [**US EPA**] had entirely flipped the composition of the *Clean Air Scientific Advisory Committee* [**CASAC**] so two-thirds of its members were **US EPA GRANTEES**.

Lo and behold, CASAC suddenly agreed with the US EPA's leadership that **FINE-PARTICLES** in outdoor air **KILL**. [**?!?!**]

During the Obama era, the US EPA packed the CASAC panel.

Twenty-four of its 26 members are now **US EPA GRANTEES**, with some listed as principal investigators on US EPA research grants worth more than 220,000,000-dollars.

Although the scientific case against **FINE-PARTICLES** has **NOT** improved since the 1990s, the US EPA has tightened its grip on CASAC.

In effect, US EPA-funded researchers are empowered to review and approve their own work in order to **RUBBER-STAMP** the US EPA's regulatory agenda.

This is all done under the guise of « **INDEPENDENCE** ».

Another « **INDEPENDENT** » CASAC committee conducted the most recent review of the Obama US EPA's **GROUND-LEVEL OZONE STANDARDS**.

Of that panel's 20 members, 70 per cent were **EPA GRANTEES** who had hauled in more than 192,000,000-dollars from the US Environmental Protection Agency over the years.

These US EPA panels make decisions by consensus, which has lately been easy enough to achieve considering they are usually chaired by an **EPA GRANTEE**.

Litigation Against EPA

Would-be reformers have so far had **NO LUCK** changing the culture at these US EPA advisory committees.

In 2016, the *Energy & Environment Legal Institute*, where I am a senior fellow, **SUED** the US Environmental Protection Agency [[EPA](#)].

We alleged that the **CASAC FINE-PARTICLE SUB-COMMITTEE** was **BIASED** — a clear **VIOLATION** of the *Federal Advisory Committee Act*.

We found a plaintiff who had been refused CASAC membership because of his beliefs about **FINE-PARTICLES**.

Unfortunately, that individual was not willing to take a hostile public stand against the US EPA for fear of professional retribution.

We ultimately withdrew the suit.

Selection Process For Membership On EPA Advisory Boards

The US Environmental Protection Agency's opaque selection process for membership on its advisory boards has opened the agency to **CHARGES OF BIAS**.

In 2016, Michael Honeycutt, Chief Toxicologist of the *Texas Commission On Environmental Quality*, was recommended in 60 of the 83 nominations to the US EPA for CASAC membership.

The US EPA instead selected Donna Kenski of the *Lake Michigan Air Directors Consortium*.

Ms Kenski received **ONLY ONE** of the 83 recommendations.

While **NO ONE** objected to Mr Honeycutt's nomination, Senator James Inhofe (R-OK) lodged an objection to Ms Kenski's nomination, claiming she had **EXHIBITED PARTISANSHIP** during an earlier term on the committee.

Congressional Reform

Attempts To Provide Explicit Conflict-Of-Interest Rules For US EPA Science Advisers

Congress has also tried to [REFORM](#) the US EPA's science advisory process.

During the three most recent Congresses, the House has passed bills to [PROVIDE EXPLICIT CONFLICT-OF-INTEREST RULES](#) for [US EPA SCIENCE ADVISERS](#), including bans on receiving US EPA grants for three years before and after service on an advisory panel.

The bills went nowhere in the Senate, where the threat of a Democrat-led filibuster loomed.

Had they passed, President Obama surely would have vetoed them.

Peer Reviews & Not Pal Review

Re-Affirming The Independence Of The US Environmental Protection Agency's Science Advisory Committees

President Trump and his US EPA administrator, Mr Pruitt, have ample statutory authority to rectify the problem.

As Oklahoma's attorney general, Mr Scott Pruitt spent years familiarizing himself with the US EPA's [UNLAWFUL WAYS](#).

Mr Pruitt is in the process of [RE-AFFIRMING THE INDEPENDENCE OF THE AGENCY'S SCIENCE ADVISORY COMMITTEES](#).

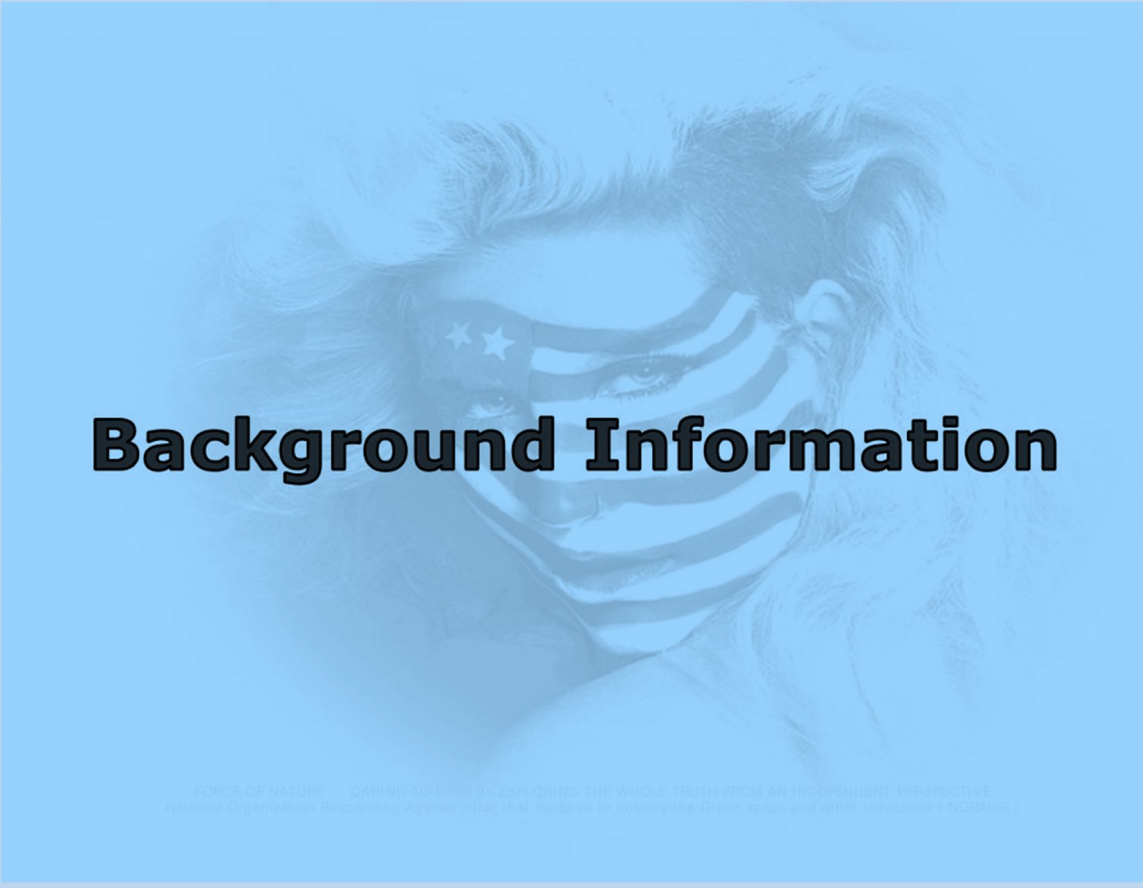

This will not mean that committee members cannot have a point of view.

But a committee as a whole must be [BALANCED](#) and [UN-BIASED](#).

Mr Pruitt's goal is the one intended by Congress — [PEER REVIEW, NOT PAL REVIEW](#).

**It Was More Important
Than Ever To Have Re-
Elected President Donald
J Trump For A Second
Term In Office — 4 More
Years Of Trump In 2024**

FORCE OF NATURE | DARENS TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against AGUAs that conspire to destroy the Green space and other Industries (NORAND)

A woman with long, wavy hair has her face painted with the American flag. The stars are on her forehead and the stripes run across her cheeks and chin. She is looking directly at the camera with a slight smile.

Background Information

FORCE OF NATURE : DARING TO DISSEY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE

The Era Of Trump

STATEMENTS —

In The Era Of Trump, Agriculture & Golf Industries No Longer Feared Harmful-Prohibitions Against Pest Control Products

The President Has Been Draining The Swamp

President Trump's Top Environmental Adviser Says Pesticides Are Not Bad For You

Donald J Trump Replaced The Worst President In Modern History

SUMMARIES —

THE ERA OF TRUMP !

President Trump is good news not only for the golf industry, but also for oil & gas, manufacturing, & agriculture industries. President Trump will save thousands of businesses & millions of jobs in the oil & gas, manufacturing, golf, & agriculture industries. The US Environmental Protection Agency (US EPA) has been picking political goals first, & gathering data later. <http://wp.me/p1jq40-a2t> With his budget cuts, President Trump will end the US EPA's, & its anti-chemical scare-mongering followers', reign of terror, with fake-news about cancer-causing chemicals, cancer clusters, endocrine disruptors, & toxic dioxins !

ENDING THE EPA's REIGN OF TERROR !

The chemical alarmism industry, which is comprised of environmental-terrorist organizations, is going to keep at it as long as charity tax-exempt money flows its way. So it's up to the Trump administration to cut the funding & move on to **REAL** problems. With The Era Of Trump, the US EPA's anti-chemical scare-mongering reign of terror with fake-news is coming to an end ! <http://wp.me/p1jq40-amw>

Juris Dr Steven J Milloy

BIOGRAPHY —

Steven J Milloy is among several **LEADING EXPERTS** who have recognized expertise, training, & background in matters concerning pest control products.

He is a Juris Doctor & a leading policy expert on the subject of regulatory affairs & pest control products.

He is also the founder & publisher of the web-site called **JUNKSCIENCE.COM**, the senior legal fellow at the **ENERGY & ENVIRONMENT LEGAL INSTITUTE**, & the author of **SCARE POLLUTION : WHY & HOW TO FIX THE EPA**.

Mr Milloy also served on the **TRUMP EPA TRANSITION TEAM**.

He has also been the president of **CITIZENS FOR THE INTEGRITY OF SCIENCE**, a long-time columnist for **FOXNEWS.COM**, & the co-founder & portfolio manager of **FREE ENTERPRISE ACTION FUND**, the first conservative / libertarian mutual fund.

Juris Dr Milloy earned a BA in Natural Sciences from **JOHNS HOPKINS UNIVERSITY**, a Master of Health Sciences in Biostatistics from **JOHNS HOPKINS UNIVERSITY SCHOOL OF HYGIENE & PUBLIC HEALTH**, a Juris Doctorate from **UNIVERSITY OF BALTIMORE**, & a Master of Laws from **GEORGETOWN UNIVERSITY LAW CENTER**.

As one of the most effective & consistent spokesmen on the subject of public policy & pest control products, Juris Dr Milloy has effectively & consistently spoken out against fanatical-activists & their harmful-prohibitions on a very frequent basis.

He is among several highly-rated leading experts who have recognized expertise, training, & background in matters concerning pest control products, & who promote environmental realism & pesticide truths. <http://wp.me/p1jq40-8DV>

Mr Milloy **SPEAKS THE TRUTH** — & deserves **CONGRATULATION**.

Norah GFON

All bad prohibitions must come to an end

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUE that conspire to destroy the Green space and other industries (NORAHG)

We Speak The Whole Truth From An Independent Perspective

We are the National Organization Responding Against HUJE that conspire to destroy the Green space & other industries (NORAHG). As a non-profit & independent organization, we are environmentalists who are dedicated to reporting about truth-challenged pesticide-hating never-Trump-fanatics (HUJE) who conspire to destroy businesses that are dependent on the use of safe & effective conventional pest control products. We also report on the work of several highly-rated leading experts who have recognized expertise, training, & background in matters concerning pest control products, & who promote environmental realism & pesticide truths.

Not surprisingly, never-Trump-fanatics have demonstrated that they are incapable of processing overwhelming scientific evidence. Should we trust these fanatics, who conveniently ignore scientific evidence, & attempt to impose their politicized-doctrines & twisted life-style choices against our society ?!?!

NORAHG was the brain-child of Mr William H Gathercole & his colleagues in 1991. Mr Gathercole is now retired, although his name continues to appear as founder. We dare to defy the never-Trump-fanatics by exploring the whole truth from an independent perspective on The Pesticide Truths Web-Site ... <http://pesticidetruths.com/> If you wish to receive free reports on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORA H G
