BURNABY, City of (British Columbia)

Reasons For Prohibition Failure In Burnaby

Burnaby's municipal prohibition against conventional pest control products has become dismal failure.

Its prohibition by-law has been extremely biased & highly prejudicial.

Has allowed hundreds of inconsistent & unfair exception statuses.

Has allowed inconsistent & unfair exception statuses for pest infestations (on city-owned properties only ?!?!).

Has allowed inconsistent & unfair exception statuses based upon the vaguely-defined term « *pest infestations* ».

Has allowed inconsistent & unfair exception statuses for hard-landscapes on city-owned properties.

There should be NO #@!!% exception statuses whatsoever !

Burnaby's prohibition has led to catastrophic ecological carnage in the urban landscape — there are reports of severe, uncontrolled, & destructive European Chafer Insects.

Who wants to live in #@!!% pesticide-free, weed-infested, & dangerous, garbage dumps ?!?!

Burnaby desperately needs effective conventional pest control products, and NOT failed IPM practices !

Burnaby's pesticide-hating elected officials are managing a failed prohibition because it is extremely biased, highly prejudicial, inconsistent, unfair, subversive, & destructive !

Why Is Prohibition Failing In Burnaby ?!?!

Burnaby's Prohibition Has Created European Chafer Problems That Have Torn Lawns Apart & Has Inflicted Garbage Dump Green Spaces

On June 16th, 2008, city of Burnaby legislated its reckless & arbitrary prohibition against conventional pest control products used in the urban landscape.

Beginning April 1st, 2009, this fanatical & unnecessary life-style choice was imposed against both residential properties & city-owned green spaces.

The result has been catastrophic carnage !

Burnaby's home-owners have been trying to fend-off the feasting raccoons, skunks, and crows that have torn apart their home lawns while looking for European Chafer Insects.

These below-ground insects are now implanted in the community, FOREVER, and will destroy lawns year after year, FOREVER !

Why Is Prohibition Failing In Burnaby ?!?!

Burnaby's Prohibition Has Allowed An Inconsistent & Unfair **Exception Status For **Vaguely-Defined Infestations****

Is there hope in Burnaby for controlling the INFESTATIONS of European Chafer Insects ?!?!

An EXCEPTION STATUS has been written into the prohibition's by-law, which states ...

... this by-law shall NOT APPLY in respect of the use of a pesticide to control [A VAGUELY-DEFINED] « INFESTATION ».

The term « INFESTATION » has been VAGUELY-DEFINED by the by-law as ...

... the presence of pests in numbers or under conditions that involves an immediate risk of structural damage to property or significant financial loss in respect of the use of property.

Clearly, this EXCEPTION STATUS has been designed to allow the use of conventional insecticides on town-owned green spaces, like sports fields that are INFESTED with invasive weeds & destructive insects, which must be controlled annually.

Furthermore, any pest INFESTATION on private property would be arbitrarily & politically defined in the harshest manner possible by Burnaby's officials.

Residents are shxt-outta-luck with protecting their private property, because Burnaby's pesticide-hating city councillors will NEVER agree to allow the required annual application of conventional pest control products for the control damaging INFESTATIONS of pests like European Chafer Insects !

No resident in Burnaby wants to live in #@!!% pest-infested garbage dumps !

Why Is Prohibition Failing In Burnaby ?!?!

Burnaby's Prohibition Has Allowed An Inconsistent & Unfair Exception Status For Hard-Landscapes

In Burnaby, an EXCEPTION STATUS has also been allowed ...

... to prevent the deterioration of HARD-LANDSCAPES, such as asphalt, brick pavers, concrete, gravel, rocks, and treated wood.

This is inconsistent & unfair !

City councillors have been allowing pest control applications WHEN IT ARBITRARILY SUITS THEM !

If it is safe for children and adults to walk and play on or near herbicide-treated HARD-LANDSCAPES, then why is it not safe for them to walk and play on herbicide-treated lawns ?!?!

In order to be consistent & fair, Burnaby must provide NO EXCEPTIONS WHATSOEVER.

Burnaby's provision for this EXCEPTION STATUS represents the best example of the failure & the ridiculousness of anti-pesticide prohibition.
