Manitoba's Prohibition Reversal

FORCE OF NATURE | DARING TO DEFY BY EXPLORING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Responding Against HUIE that conspire to destroy the Green space and other Industries (NORAHG)

Summary

Victory

Manitoba's Prohibition Reversal

Victory Against Manitoba's Harmful-Prohibition

Provincial Prohibition —

The now-rescinded prohibition has historically defied the majority of Manitobans who did not want prohibition, with more than 60 per cent having indicated that prohibition has been too strict.

Manitoba's 2015 provincial prohibition against no-harm conventional pest control products was reckless, arbitrary, & doomed-to-fail.

Provincial politics in Manitoba is dominated by the Progressive Conservative Party of Manitoba, which is the current government-in-power, & the New Democrats (NDP), the radical pesticide-hating party that had imposed prohibition.

Prohibition was justified in Manitoba under the false-pretexts that pesticides supposedly cause environmental damage, various cancers, & negative effects on pollinators.

The use of insecticides causes none of these things.

In fact, Manitoba's harmful-prohibition has wreaked apocalyptic carnage in the form catastrophic ecological pest disasters, with urban green spaces becoming weed-infested, insect-damaged, & dangerous garbage dumps because conventional pest control products were not allowed.

No one has ever wanted this #@!!% ban nonsense.

Manitoba is a prairie province in western Canada, which has a population of over one million, mostly living in the southern half of the province.

Reversal Of Prohibition —

Namaste, Manitoba — Greetings to you, Manitoba.

Victory against Manitoba's harmful-prohibition.

Manitoba has become part of a real trend against reckless, arbitrary, & doomed-to-fail prohibitions.

Manitobans do not want any #@!!% prohibition nonsense !

The province of Manitoba has rescinded its harmful-prohibition against conventional pest control products.

Manitoba's current Conservative government will allow any pesticide that is evaluated & approved by Health Canada.

Manitoba joins the trend with over 70 other jurisdictions that have stopped or rescinded or limited or changed or have begun to repeal harmful-prohibitions, or have granted commercial businesses with exception statuses.

Manitoba's current Conservative government has recognized that conventional pest control products are scientifically-safe, & will cause **NO** harm to human health, & will cause **NO** harm to the environment.

The Manitoba Conservative government deserves our gratitude & our thanks.

Changes will permit the use of all Health-Canada-approved products, & will enhance protections in areas where children & pets gather.

Resuming Pesticide Use —

Manitoba residents wanted prohibition to end because they were frustrated over being forced to use green alternative pesticides that were too expensive & not effective.

Manitoba's garbage dump green spaces were directly caused by prohibition.

Herbicides needed to be reinstated to get rid of weeds such as dandelions in the most prominent parks & boulevards.

Weeds also needed to be effectively controlled to protect allergy sufferers from weed pollen.

Pest Control Programs —

Manitoba's harmful-prohibition had forced Manitobans to use ineffective green alternatives like Fiesta herbicide in much higher quantities to have any effect — causing more potential environmental hazards.

Fortunately, it will be legal once again for Manitobans to use so-called cosmetic pesticides on their lawns.

It's ok to treat lawns for damaging pests in Manitoba again.

It used to be ok to spray golf course lawns for weeds, but not household lawns (but not anymore).

The science shows that pesticide programs used in the urban landscape will selectively & effectively control disease, insect, & weed pests, but are completely safe for other non-target organisms.

Pesticide Opposition —

Whenever prohibition is imposed, it's not scientists, but extremists, who decide who can use what pesticides, when, & where.

Health Canada, & not extremists, has the essential expertise & ultimate credibility on pest control products.

Prohibiting pesticides as a precaution is unnecessary.

Adhering to this form of precautionary principle is absolutist, misused, vacuous, & is simply another malicious weapon of pesticide-hating doctrine & science-hating fanaticism concocted by anti-pesticide extremists.

Manitobans do not want any #@!!% extremist nonsense !

Protecting The Public —

The public does not require protection from so-called cosmetic pesticides.

Pesticides will not impact human health, bio-diversity, or ecosystems.

Furthermore, pesticides represent no-actual-risk-of-harm to children.

Pesticides are good for the urban landscape, & they will not harm human health & the environment when used properly.

Well-maintained urban landscape will contribute to our quality of life & produce enormous environmental benefits.

The green space maintenance professionals are the planet's great conservationists.

Literature Review —

The radical Manitoba NDP government argued that a literature review of 140 medical studies by Ontario College of Family Physicians (OCFP) offered plenty of evidence indicating that prohibition was needed [???] .

OCFP's evidence provided an assessment that was somewhat valueless, inconclusive, tenuous, & discredited.

The literature review by OCFP was a hate-assessment against Health-Canada-approved pesticides.

Manitobans do not want any #@!% literature review nonsense !

Green Alternatives —

In order to validate prohibition, Manitoba's previous NDP government had been spreading fake-news & false-science into the public discussion, with exaggerations that a single application of Fiesta herbicide, an inferior green alternative herbicide, can successfully replace conventional products such as Killex & Par III.

Predictably, Manitoba's prohibition has forced residents & professionals to rely upon phony, inferior, ineffective, & unaffordable green alternative pesticides like Fiesta herbicide.

The vast majority of Fiesta users overwhelmingly condemn it.

Unfortunately, it is impossible to keep Manitoba's urban environment well-maintained, safe, & attractive by using pesticide-free programs consisting of alternative pesticides & practices only.

In fact, green alternative pesticides, like Fiesta herbicide, have cost 10 to 15 times more than conventional products, in addition to being so ineffective that undesirable repetitious applications have been required.

Before Manitoba's prohibition, conventional herbicides used to work quite well for controlling dandelions since they affected both top-growth & root-growth.

By contrast, green alternative pesticides only affect top-growth.

With the reversal of prohibition, Fiesta will inevitably become a bad memory, & all pesticides sold & used in Manitoba will simply be aligned with federal regulations & rigorous Health Canada assessments.

Alternative practices, like manual weed picking, are also not effective to combat weed infestations.

Pesticide-free programs are medieval, ineffective, & doomed-to-fail.

Alternatives will never, ever, work — & an entire province, Manitoba, has said so.

There are no viable, no efficacious, no economical, & no low-risk alternatives to replace conventional products.

Moreover, inferior & ineffective alternatives cannot ever replace effective & no-risk conventional products.

Finally, it is unsafe to employ practices involving the use of clover as an alternative to grass.

Clover is dangerous for human health & the environment.

Manitobans do not want any #@!!% green alternative nonsense !

Corruption —

There have been examples of Fiesta shilling-corruption at both the provincial & municipal levels of government.

Some officials having gone so far as to operate as paid-for-profit-salesmen for Fiesta herbicide.

Manitobans will not tolerate government officials who have been endorsing Fiesta in public forums under the pretense of sincerity, when in fact they may be simply remunerated as shills or salesmen.

Manitobans do not want any #@!!% Fiesta nonsense !

Resuming Pesticide Use

Reasons —

**To Get Rid Of Weeds Such As Dandelions
In The Most Prominent Parks & Boulevards**

To Protect Allergy Sufferers From Weed Pollen

**To Respond To Complaints From Residents
Concerning Garbage Dump Green Spaces**

**To Align With Manitoba Which Is Prepared
To Remove Its Province-Wide Prohibition**

See below

Media Report 1 —

In spring 2023, the gardening season had started, and Manitobans have more options to deal with weeds.

In November 2022, the provincial government **LIFTED** the ban on cosmetic pesticides, which had been in place since 2014.

Mr David Hinton, owner of Weed Man Manitoba, now has more tools in his toolbox —

For the last seven years, we've only been able to use one product, called Fiesta.

Now, it's still available of course, and we're still using it, but we have more traditional products available to us.

Mr Hinton says those traditional products — such as Killex and Par III — are 10 TO 15 TIMES CHEAPER to use —

*The bio weed controls we've had to use for the last seven years are
EXTREMELY EXPENSIVE .*

*So the product COST IS HIGH , you have to apply it MUCH MORE OFTEN ,
and you have to put it down at a MUCH HIGHER RATE .*

Media Report 2 —

In 2022, councillor Jeff Browaty called for Winnipeg to report on potentially **PHASING-IN COSMETIC PESTICIDE USE TO RID GREEN SPACES OF NOXIOUS WEEDS** , such as dandelions, as the **PROVINCE PREPARED TO REMOVE ITS OWN PROVINCE-WIDE PROHIBITION** .

Councillor Browaty said he will ask council to consider **FUNDING A TARGETED PESTICIDE PROGRAM** in the 2024-2027 multi-year budget process.

He said eliminating the weeds would help **PROTECT ALLERGY SUFFERERS** and ensure Winnipeg maintains a certain **AESTHETIC** .

Councillor Browaty believes council should **USE SOME PESTICIDES TO ELIMINATE WEEDS** in the most prominent parks and boulevards.

According to councillor Jeff Browaty —

*There's certain types of **COMPLAINTS** that are typical from residents ...*

*In the early summer, it's **DANDELIONS** .*

*I do believe we have **IMAGE ROUTES** in our city and I do believe there are places where some level of dandelion and invasive weed control is appropriate.*

According to councillor Browaty —

*(When weeds spread,) it just seems the city is **NOT DOING ITS PART** .*

*A lot of people take a lot of pride and care in their own yard and then it just looks like **THE CITY IS NOT TAKING CARE OF THINGS** (on its land) .*

The councillor said he is not against efforts to « **NATURALIZE** » some city land with indigenous plants but believes some grass-covered sites should have a **MORE MANICURED LOOK** .

[... & SHOULD AVOID THE INEVITABLE **GARBAGE DUMP GREEN SPACES** DIRECTLY CAUSED BY PROHIBITION] .

Fact —

Garbage Dump Green Spaces Are Directly Caused By Prohibition

See below

Response —

Background Information

GARBAGE DUMP GREEN SPACES !

Manitoba's reckless, arbitrary, & doomed-to-fail PROHIBITION has wreaked APOCALYPTIC CONDITIONS in the form CATASTROPHIC ECOLOGICAL CARNAGE DUE TO UNCONTROLLED WEED INVASIONS .

It is IMPOSSIBLE to keep green spaces from becoming weed-infested, insect-damaged, & dangerous GARBAGE DUMPS unless conventional pest control products are allowed.

Manitoba's green spaces & hard-landscapes have needed to be controlled annually in order to remain safe & attractive.

Unfortunately, it is IMPOSSIBLE to keep the urban environment well-maintained, safe, & attractive with pesticide-free (aka organic) maintenance practices.

Manitobans have been arbitrarily & unfairly forced to rely on PHONY & INFERIOR & INEFFECTIVE GREEN ALTERNATIVE PESTICIDES like Fiesta herbicide.

Manitobans do not want this #@!!% ban nonsense !

Pest Control Programs

False-Fact —

**Alternative Practices Are Effective
To Combat Weed Infestations**
????????

See below

Media Report —

In the early 2000s, the city of Winnipeg began **REDUCING** its cosmetic pesticide use on boulevards and parks.

By 2014, Winnipeg had essentially no cosmetic spray program by the time the province-wide **PROHIBITION** against cosmetic pesticides was **IMPOSED** by Manitoba’s [**RADICAL**] NDP government.

By November 2022, the use of pesticides was **ALLOWED** on many more private lawns and green spaces, but not within 15 metres of a playground, picnic area, or within a dog park.

The city of Winnipeg had continued to use pesticides for a few non-cosmetic purposes, such as spraying weeds in hard-surface areas (i.e. sidewalk cracks), managing invasive species to protect habitats, and removing poisonous plants.

In addition, **GOLF COURSES** have always been [**UNFAIRLY**] **EXEMPTED** from pesticide bans.

Winnipeg had also turned to [FAILED] techniques [AKA GREEN **ALTERNATIVE PRACTICES**] to combat weeds over the years, which had included increased mowing [FAILURE !] , aeration [FAILURE !] , and fertilization [FAILURE !]

[... & **MANUAL WEED PICKING** WHICH HAS ALSO BEEN A FAILURE – IT WOULD BE BETTER TO DO NOTHING RATHER THAN PICK WEEDS BY HAND] .

Facts —

**It Is Impossible To Successfully
Maintain Properties As Weed-Free,
Safe, & Attractive By Using Practices
Like Manual Weed Picking**

**Inferior & Ineffective Green Alternative
Practices Cannot Replace Effective
& No-Risk Conventional Products**

See below

Response —

Background Information

MANUAL WEED PICKING !

Manual weed picking is **TOTALLY INEFFECTIVE** for weed control, & does not work.

It is **IMPOSSIBLE** to successfully maintain properties as weed-free, safe, & attractive by using practices like manual weed picking.

It is not cost effective, & it is incredibly labour-intensive.

Manual weed picking is a primary reason for the **REPEATED FAILURES OF PROHIBITIONS** against no-risk conventional pest control products used in the urban landscape.

With the adoption of prohibitions, municipal employees & residents are being forced to resort to the back-breaking & agonizing job of manual weed picking.

This means that municipal employees & residents are being devalued & humiliated as mere cotton-pickers.

It would be better to do nothing rather than rely upon manual weed picking.

Relying on manual weed picking means that urban green spaces will inevitably become weed-infested garbage dumps.

Not surprisingly, prohibition has been a **DISMAL FAILURE** for municipalities.

Municipalities **DESPERATELY NEED** conventional pest control products, & not failed green alternative practices like manual weed picking, as well as increased mowing, soil aeration, & fertilization.

Instead of admitting that #@!!% manual weed picking is a **DISMAL FAILURE**, government officials & fanatical-activists prefer living in the world of false-facts & junk science.

No one wants to #@!!% pull weeds by hand.

Links —

City Staff Opposition

False-Facts —

**Winnipeg Should Not Resume Using Pesticides
On Public Lands Because Of Supposed
Environmental Damage [WRONG !] , Negative
Effects On Pollinators [WRONG !] , Bio-Diversity
[WRONG !] , & Increased Cost Of Staff & Equipment
? ? ? ? ? ? ? ? ?**

**Clover Is A Safe Alternative To Grass
? ? ? ? ? ? ? ? ?**

See below

Media Report —

Winnipeg's city staff [EXTREMISTS] report did not recommend creating a new pesticide program now that the PROHIBITION has been lifted.

The pitfalls of using pesticides outweigh the cosmetic benefits of killing weeds [WRONG !] , so Winnipeg SHOULD NOT RESUME USING PESTICIDES on public lands [?!?!] , according to the city staff [EXTREMISTS] report

—

*A cosmetic spray program would ... come with negative environmental effects (on) **POLLINATORS** [WRONG !] and bio-diversity [WRONG !] .*

The city staff [EXTREMISTS] noted it would REQUIRE MORE STAFF AND EQUIPMENT and also HARM THE ENVIRONMENT [WRONG !] .

The city staff [EXTREMISTS] report says most cities have largely backed away from pesticide use [?!?!] .

It also warns pesticides do not only damage dandelions and other weeds, but can kill off broad-leaved plants such as [DANGEROUS] **CLOVER** , which Winnipeg is exploring as an ALTERNATIVE TO GRASS . [?!?!]

[PESTICIDE-HATING] councillor John Orlikow, head of council's community services committee, also OPPOSES a cosmetic pesticide program.

According to [EXTREMIST] Orlikow —

For the city to take on a large-scale program, where would we find the money for it ? ...

*(And) it's counter to most of our policies in trying to be more **ENVIRONMENTALLY-FRIENDLY** . [?!?!]*

Fact —

The Use Of Insecticides Does Not Create Bee Colony Collapse Disorder

See below

Response —

Background Information

THERE IS NO BEE CRISIS !

The alleged losses of bees are, in fact, the **FAULT OF THE BEE-KEEPERS** & their mis-management practices.

They are responsible, & **NOT** neonicotinoid insecticides.

Their prohibition will **NOT** save bees.

The use of neonicotinoids **DOES NOT** create bee colony collapse disorder.

Neonicotinoids are a category of insecticides used to control insects on a variety of agricultural crops, including as a seed treatment, & on turf & ornamental plants, as well as other uses.

The introduction of neonicotinoids has helped boost crop yields while protecting bee health, human health, & the environment.

Historically, bee crises are **NOTHING NEW** since heavy losses have been reported for a long time, & **NOT** because of insecticides.

There is **NO** bee crisis caused by neonicotinoids.

Overall, neonicotinoid insecticides play a **NEGLIGIBLE** role compared to parasitic mites (specifically the Varroa mite) & pathogens (such as Nosema & viral diseases) as main factors, as well as loss of habitat.

Although some neonicotinoid insecticides are toxic to bees upon direct contact (as are many insecticides), they are used in a way that **MINIMIZES** any direct exposure to bees, such as seed treatment.

Seed treatment insecticides have been used for a decade with almost no incidences of negative impacts on bees by minimizing potential exposures of non-target insects such as bees.

On January 5th, 2016, Health Canada & US Environmental Protection Agency (US EPA) released their risk assessments of a neonicotinoid insecticide, **IMIDACLOPRID** , which showed that Approved Pesticide Product Label directions & rules for foliar & seed-treatments of **IMIDACLOPRID** should either **PREVENT OR LIMIT THE UNACCEPTABLE RISKS** to the health of bees.

THERE IS NO BEE CRISIS — a SPECIAL REVIEW shows that there are **MINIMAL & ACCEPTABLE RISKS** to bee health from neonicotinoid insecticides.

Why are only a few bee-keepers losing their bees ?!?!

The most likely cause of losses are the bee-keepers themselves.

Incompetent bee-keepers are harming their own hives.

Fact —

Clover Is Dangerous For Human Health & The Environment

See below

Response —

Background Information

DANGEROUS CLOVER !

Clover is a DANGEROUS FAILURE .

Clover is a HIGH-RISK green product recommended as an alternative to the conventional turfgrass lawn. [?!?!]

In fact, clover is NOT valid as an alternative to conventional grass seed.

Clover is a BOGUS green alternative to turfgrasses.

Clover is DANGEROUS for human health & the environment.

Clover attracts bees that can HARM children & KILL people.

Clover ATTRACTS KILLER BEES .

For people who are allergic to bee stings, a sting may trigger DANGEROUS anaphylactic reactions that are potentially DEADLY .

Additionally, bee stings will release pheromones that prompt other nearby bees to ATTACK .

Extremists who have recommended clover for lawns can be accused of DEPRAVED INDIFFERENCE , since their recommendation can ENDANGER , & even KILL , children, adults, & pets.

DO NOT USE CLOVER .

Fact —

Pesticides Are Good For The Urban Environment

See below

Response —

Background Information

PESTICIDES ARE ENVIRONMENTALLY-FRIENDLY !

People deserve thicker, greener, pest-free turf & ornamental plants.

The use of pest control products will enhance the urban landscape — it is good for the environment.

The modern maintenance industries can be described as the planet's great conservationists that provide the public with what it wants — greener, thicker, pest-free turf & ornamental plants.

And, they can be maintained with products that are government-approved, federally-legal, scientifically-safe, practically-non-toxic, & cause no harm.

For generations, the maintenance industries have been maintaining & conserving the world's largest ground cover vegetation — turf & ornamental plants.

They have contributed extensively to the beautification of our urban landscapes, & the preservation of our environment.

The modern maintenance industries have adopted many outstanding, innovative & interesting ideas in order to provide thicker, greener, pest-free turf & ornamental plants.

These industries create positive waves for society.

The modern maintenance industries must inform the public about their benefits to the urban landscape.

We must promote & defend these industries, whatever the cost may be !

Protecting The Public

False-Fact —

Pesticides Will Impact Human Health [**WRONG !**] ,
Bio-Diversity [**WRONG !**] , The Health Of Our
Ecosystems [**WRONG !**] , Spending Money,
& Do More Harm Than Good [**WRONG !**]
? ? ? ? ? ? ? ? ? ?

See below

Media Report —

An [**EXTREMIST**] organization that lobbied **AGAINST** the decision to end Manitoba's pesticide **PROHIBITION** agreed with the city staff report that a cosmetic pesticide program should not be added.

According to Josh Brandon at [**EXTREMIST-ORGANIZATION**] Cosmetic Pesticide Ban Manitoba —

*When you look overall at the **IMPACTS OF PESTICIDES** on human health [**?!?!**] , on bio-diversity [**?!?!**] , on the health of our ecosystems [**?!?!**] , it doesn't make sense to be spending money on potentially dangerous [**?!?!**] chemicals.*

Brandon said those findings indicate using pesticides to eliminate weeds **CAUSES MORE HARM THAN GOOD** [**?!?!**] .

According to [EXTREMIST] Brandon —

There's no scientific basis for saying that dandelions on a boulevard are a problem. [?!?!] This is a cultural preference that's been created in our society.

Fact —

The Public Does Not Require Protection From So-Called Cosmetic Pesticides

See below

Response —

Background Information

CATASTROPHIC CARNAGE !

Manitoba had empowered itself to arbitrarily prohibit safe & effective conventional pest control products by arbitrarily declaring them as cosmetic, non-essential, unnecessary, & illegal.

Additionally, with extreme bias & total prejudice, the [RADICAL] Manitoba NDP government of the time had endorsed PHONY & INFERIOR & INEFFECTIVE GREEN ALTERNATIVE PESTICIDES , like Fiesta herbicide, that WILL NOT WORK.

Manitoba's extremist actions were NOT based on any scientific evidence, but rather, they were driven by agenda, ideology, politics, propaganda, & fake-news.

Its prohibition had become a HARMFUL & DISMAL FAILURE since it has WREAKED HAVOC WITH ...

- CATASTROPHIC CARNAGE OF PESTICIDE-USER BUSINESSES THAT HAD SUFFERED FROM BANRUPTCY & FAILURE
- CATASTROPHIC PEST & ECOLOGICAL CARNAGE OF URBAN LANDSCAPES DUE TO UNCONTROLLED WEEDS
- CATASTROPHIC FINANCIAL CARNAGE OF WEAKENED COMMUNITIES

Curiously, Manitoba municipalities have routinely circumvented prohibition by taking advantage of EXCEPTION STATUSES that are INCONSISTENT & UNFAIR .

Overall, the public DOES NOT require Manitoba's protection from so-called cosmetic pesticides.

Literature Review

False-Fact —

The Radical Manitoba NDP Government Argued That A So-Called Literature Review Of 140 On-Line Medical [??] Studies By Ontario College Of Family Physicians (OCFP) Offered Plenty Of Evidence Indicating That Prohibition Was Needed [?!??]

See below

Media Report —

According to a city spokesman —

These changes [AKA HARMFUL-PROHIBITION] began in response to greater health concerns within society [IE A VOCAL, UNEDUCATED, & EXTREMIST MINORITY] and STRICTER label requirements related to pesticides [?!?!] .

When the provincial PROHIBITION was introduced in 2014, the [RADICAL] Manitoba NDP government of the time said it was needed to REDUCE PUBLIC EXPOSURE to synthetic chemicals [?!?!?!?] , and better prevent them from entering Manitoba's LAND, AIR, AND WATER [?!?!?!?] .

The [RADICAL] Manitoba NDP government argued a review of **140 ONTARIO MEDICAL STUDIES** [?!?!] in 2012 offered plenty of evidence a PROHIBITION was needed, linking pesticides to several health risks [?!?!] , including asthma [?!?!] and lung disease [?!?!] .

Facts —

**The Literature Review By Ontario College
Of Family Physicians Was A Hate-Assessment
Against Health-Canada-Approved Pesticides**

**OCFP's Basing Its Assessment Upon A
Mere 140 Studies Is Somewhat Valueless**

**OCFP Concocted A Valueless & Discredited
Literature Review That Alleged Having 140
Undisclosed, Non-Existent,& Unverifiable Secret
Evidence About The Safety Of Pesticides**

See below

Response —

Background Information

OCFP'S HATE-ASSESSMENTS AGAINST PESTICIDES !

OCFP's Literature Review

Ontario College of Family Physicians (OCFP) is a **DISCREDITED, RADICAL, & SCIENTIFICALLY-IGNORANT** organization that has been **INDIRECTLY OPERATING** as a **PUBLIC INFORMATION SHIELD THAT DISPENSES HATE-ASSESSMENTS** to support the anti-pesticide campaigns of other environmental-extremist-organizations, like Canadian Cancer Society & Canadian Association of Physicians for the Environment, as well as Liberal & New Democrat governments.

In 2004, OCFP, with Margaret Sanborn, **CONSPIRED** with many other environmental-extremist organizations to impose **HATE-ASSESSMENTS** against Health-Canada-approved pest control products.

It CONCOCTED a VALUELESS & DISCREDITED « *LITERATURE REVIEW* » that ALLEGED having 140 STUDIES THAT ARE UNDISCLOSED, NON-EXISTENT, & UNVERIFIABLE SECRET EVIDENCE about the safety of pest control products.

OCFP is one of the DESTROYERS of the lawn care industry because it SUBVERSIVELY CONSPIRED , with Liberal & New Democrat governments, against Health-Canada-approved products that are DESPERATELY-NEEDED to protect the urban landscape.

OCFP has mercilessly terrorized, baselessly-smearred, falsely-accused, grotesquely-punished, innocently-convicted, shamelessly-persecuted, & wrongfully-deprived those people working in the professional lawn care industry.

OCFP DESTROYED the professional lawn care industry by CHERRY-PICKING a handful of studies which were VALUELESS .

In fact, there is NOT ONE KNOWN ILLNESS & NOT ONE DEATH from the proper use of pest control products used in urban landscape.

OCFP's Attacks Against Health Canada

How could OCFP provide ASSESSMENTS that has somehow been withheld from the entire world ?!?!

Does OCFP realize that its ASSESSMENTS are based upon a mere 140 studies is somewhat VALUELESS ?!?!

By contrast, pest control products like 2,4-D herbicide have been the subject of over 40,000 STUDIES .

40,000 !

Furthermore, since 1988, The Industry Task Force II on 2,4-D Research Data has submitted to US Environmental Protection Agency (US EPA) over 250 STUDIES concerning mammalian & environmental toxicology, environmental fate & residues.

2,4-D is probably THE MOST STUDIED & BEST UNDERSTOOD of any chemical — not just pesticide — in existence.

Even Canadian Cancer Society has STATED REPEATEDLY that scientific research DOES NOT PROVIDE A CONCLUSIVE LINK between pest control products & cancer.

The **SCIENTIFIC-ASSESSMENT** of pest control products indicates that they are **PRACTICALLY-NON-TOXIC** when used properly in the urban landscape.

In essence, OCFP's assessments are actually **HATE-ASSESSMENTS** designed to **ATTACK & DISCREDIT** Health Canada & its approval of conventional pest control products.

Real Studies Overwhelmingly Show That Pesticides Are Scientifically-Safe

US Environmental Protection Agency (**US EPA**), Health Canada, & other science-based national regulatory agencies have clearly demonstrated that pest control products used in the urban landscape are **LESS TOXIC THAN** — • Aspirin • baking soda • caffeine • cannabis • nicotine • table salt • Tylenol .

Additionally, these products are **NO MORE TOXIC THAN** — • ethanol (an edible beverage constituent in beer, wine, & other intoxicating beverages) • mouthwash (Listerine) • Vitamin C .

The **SCIENTIFIC-ASSESSMENT** of pest control products proves that they are scientifically-safe, practically non-toxic, will cause **NO** harm, will **NOT** cause cancer, & will **NOT** cause irreversible damage if consumed orally.

The probable lethal dose for a person ingesting the concentrated form of many of these products is **ONE LITRE** , the volume of an entire milk carton.

By comparison, drinking **SIX LITRES** of water, a fluid that is seemingly harmless, can lead to water poisoning or dilutional hyponatremia, which is a potentially fatal disturbance in brain functions.

In essence, water is only **FIVE TIMES SAFER** than many of these products.

The **SCIENTIFIC-ASSESSMENT** of pest control products indicate that they will **NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT** — they are **SCIENTIFICALLY-SAFE** .

OCFP's Authors & Reviewers

OCFP is a mere trade association, & NOT a science, NOT a research, & NOT a health organization.

What is OCFP's problem with pesticides ?!?!?

OCFP's « LITERATURE REVIEW » was a HATE-ASSESSMENT against pesticides.

OCFP's « LITERATURE REVIEW » has been considered VALUELESS because many of the authors & reviewers were UNETHICAL, UNPROFESSIONAL, & / OR INSUFFICIENTLY-EDUCATED —

- Not a single author or reviewer had any recognized training, education, or background in matters concerning pest control products.
- An author-doctor was found guilty of professional mis-conduct over sexual activities.
- An author-doctor was no longer able to practice medicine because his license was suspended.
- Some doctors, who were credited as reviewers, have denied ever having reviewed the document.

The OCFP's « LITERATURE REVIEW » is INARGUABLY DISCREDITED .

OCFP Has Not Been In The Information Loop

OCFP's « LITERATURE REVIEW » WAS NOT A SERIOUS SCIENTIFIC ASSESSMENT — it was a HATE-ASSESSMENT against pesticides.

OCFP conducted a mere literature review, which means it could only use those studies found in the OPEN PUBLIC LITERATURE / OPEN INTERNET ON THE WORLD WIDE WEB .

Furthermore, OCFP has been RIDICULOUSLY IMPLYING that its NON-EXPERT ASSESSMENT of these studies is somehow being withheld from Health Canada & EVERY other regulatory agency in the world.

In defiance of OCFP, **INDISPUTABLE & CONCLUSIVE SCIENTIFIC RESEARCH** shows that, as reported through Health Canada's **VAST TOXICOLOGY DATABASE**, **NO HARM WILL OCCUR** when pest control products are used according to label directions.

OCFP has **NOT** been in « **THE INFORMATION LOOP** » on issues regarding pest control products, & has **NEVER** availed itself of the **EXTENSIVE TOXICOLOGY DATABASE** that is available from Health Canada & its « **READING ROOM** » .

The authors & reviewers of OCFP's « **LITERATURE REVIEW** » were not only **SCIENTIFICALLY-IGNORANT** , they were also **LAZY & STUPID** .

Clearly, they prefer **CONCOCTING HATE-ASSESSMENTS** against Health-Canada-approved products.

Re : A Sea Of Yellow

**Pesticide Ban Leads To
Dandelion Infestation**

Date : June 10th, 2019

Origin : Global News

Media Report

Location : Province Of Manitoba

**From : Produced By Force Of Nature
& Edited For Length & Clarity**

Selected & Adapted Excerpts

Media Report :

✓ — MANITOBA — A Sea Of Yellow — Pesticide Ban Leads To Dandelion Infestation — **Reference**
— pdf — **LINK**

<https://pesticidetruths.com/wp-content/uploads/2023/05/Reference-Manitoba-Winnipeg-2019-06-10-Manitoba-Cosmetic-Pesticide-Ban-Leads-To-Dandelion-Infestation.pdf>

Manitoba's Pesticide Ban Has Led To Dandelion Infestations

Green Alternatives

Facts —

**Before Manitoba's Prohibition, Conventional
Pesticides Used To Work Quite Well For
Controlling Dandelions & They Affected
Both Top-Growth & Root-Growth**

**After Prohibition, Green Alternative
Pesticides Only Affected Top-Growth**

See below

Media Report —

It's a **SEA OF YELLOW** — and then white — popping up across Winnipeg boulevards and parks.

Winnipeg's dandelions have arguably become **STEADILY WORSE** since the province banned **[IE PROHIBITED]** herbicides for cosmetic purposes five years ago.

Several local parks are now **MORE DANDELION THAN GRASS** .

Emily Bielik-Cran said she enjoys taking care of her front lawn, but when it comes to mowing the grass beside her house, and the dandelions that come with it, it's a hassle.

According to Bielik-Cran —

We never used to have these dandelions here ...

... they are getting worse each year.

I was telling my husband we have to get our own poison because it's going to come onto our lawn.

In 2014, the [RADICAL] Manitoba NDP government PROHIBITED against [SO-CALLED] cosmetic pesticides used to fight weeds like dandelions.

But on the campaign trail in 2016, the Progressive Conservatives promised to launch a REVIEW of that legislation [IE PROHIBITION] .

However, the results are not yet in.

The provincial government declined an on-camera interview, but provided Global News with this statement —

The government is committed to legislation that balances safe, useable, and aesthetic green spaces while protecting human health and the environment.

The regulation of cosmetic pesticides is under REVIEW to determine whether or not any amendments are necessary to achieve those legislative objectives.

It's similar to a statement provided to Global News about the issue in May 2018.

Most of the eco-friendly products [AKA GREEN ALTERNATIVE PESTICIDES] around now burn the leaves off the dandelion, but do not get deep enough to the root to kill the entire plant, said one Winnipeg expert.

According to Ken Land at St Mary's Nursery & Garden Centre —

Since the ban went in place, the older products [AKA CONVENTIONAL PESTICIDES] used to work quite well for controlling dandelions and they would kill the root of the plant.

The newer products [AKA GREEN ALTERNATIVE PESTICIDES] are top-growth control.

The province said it continues to have discussions with various parties and that any modifications to the ban [IE PROHIBITION] would be carefully considered.

Fact —

Many Residents Have Expressed Their Frustration Over Being Forced To Use Green Alternative Pesticides That Are Phony, Inferior, Ineffective, & Unaffordable

See below

Response —

Background Information

ORGANIC MAINTENANCE & GREEN ALTERNATIVES !

In the 9|11 era, pesticide-hating doctrine is a failure because of **MEDIEVAL & INEFFECTIVE** organic pesticide-free maintenance of turfgrasses.

HARMFUL-PROHIBITIONS are **FAILURES** because of **PHONY, INFERIOR, INEFFECTIVE, & UNAFFORDABLE GREEN ALTERNATIVE PESTICIDES** , including bio-pesticides & non-synthetic pesticides.

GREEN ALTERNATIVES cannot replace effective & no-risk conventional products.

On urban playing surfaces, practices that rely on **GREEN ALTERNATIVE PESTICIDES** will **NOT** be able to provide **GOOD-QUALITY PLAYING CONDITIONS & AESTHETICS** .

It will be **IMPOSSIBLE** to protect urban green spaces from damaging pests by relying on **GREEN ALTERNATIVES** which are **PHONY, INFERIOR, & INEFFECTIVE** , with questionably higher toxicity & with higher environmental risks.

Those who use urban green spaces **DO NOT** need additional **PROTECTION** by imposing the **GREEN ALTERNATIVE** nonsense.

Nevertheless, conventional products can be used safely & will cause no harm to human health & the environment.

Nonetheless, **TOTAL-HATE-TERROR** against conventional products will never end !

Facts —

Pesticide-Free Programs Are Medieval, Ineffective, & Doomed-To-Fail Alternatives Will Never, Ever, Work

See below

Response —

Background Information

THE ORGANIC MENACE OF PESTICIDE-FREE PROGRAMS !

MEDIEVAL & INEFFECTIVE organic maintenance programs have been AN UNAFFORDABLE MENACE & AN EXPENSIVE FAILURE .

There are NO successful practices for these programs — they are MEDIEVAL & INEFFECTIVE .

Whenever HARMFUL-PROHIBITION is imposed, GREEN ALTERNATIVE PESTICIDES are incorporated into the maintenance programs — not because they work — but because the rules & legislation will overwhelmingly & unfairly favour these products.

When it comes to HARMFUL-PROHIBITION against no-risk conventional products, state, municipal, & county officials are THINKING TWICE about banning these products by looking at the ORGANIC MENACE that is DOOMED-TO-FAIL .

There are NO successful practices for organic pesticide-free programs, only DISMAL FAILURES that are promoted by extremists with unverifiable success stories.

Overall, organic pesticide-free programs that rely on GREEN ALTERNATIVE PESTICIDES will be UNABLE to provide effective & economical pest control.

This is because these ALTERNATIVES are PHONY, INFERIOR, INEFFECTIVE, & UNAFFORDABLE , & will NEVER adequately control infestations of recurring invasive weeds, destructive insects, & harmful diseases.

They will NEVER REDUCE & NEVER ELIMINATE the need for no-risk conventional pest control products.

In all cases, ALTERNATIVES WILL NEVER, EVER, WORK .

Fact —

There Are No Viable, No Efficacious, No Economical, & No Low-Risk Alternatives To Replace Conventional Products

See below

Response —

Background Information

GREEN ALTERNATIVE PESTICIDES !

Jurisdictions like Ontario have imposed **HARMFUL-PROHIBITION** by **MIS-LEADING THE PUBLIC** with the false-assumption that so-called green alternative pesticides are as safe & as effective as conventional products.

These jurisdictions have concocted lists of so-called permitted pesticides (aka **ALTERNATIVES** that are **PHONY, INFERIOR, INEFFECTIVE, & UNAFFORDABLE**) that **CANNOT** possibly be as safe & as effective as conventional pest control products.

GREEN ALTERNATIVE PESTICIDES are products that were supposed to replace conventional pest control products.

Despite claims to the contrary, overall, there are **NO** viable, **NO** efficacious, **NO** economical, & **NO** low-risk alternatives to replace conventional products.

So-called alternatives, such as corn gluten meal, Fiesta, flame-throwers, nematodes, & Sarritor, are **DISMAL FAILURES** .

Fortunately, conventional pest control products are effective, as well as safe, economical, & no-risk.

Organic pesticide-free maintenance with these alternatives has been a **DISMAL FAILURE** .

Manitoba's Cosmetic Pesticide Ban Has Led To Dandelion Take-Over

Resuming Pesticide Use

Fact —

**Manitoba Residents Want Prohibition To
End Because They Are Frustrated Over
Being Forced To Use Green Alternative
Pesticides They Believe Are Too
Expensive & Not Effective Enough**

See below

Media Report —

A **SEA OF YELLOW** is blanketing boulevards and lawns across Manitoba as the provincial Conservative government decides what to do about a pesticide ban [**IE HARMFUL-PROHIBITION**] it promised to **REVIEW** years ago.

In 2014, the [**RADICAL**] Manitoba NDP government banned [**IE PROHIBITED**] cosmetic pesticides used to fight weeds like dandelions.

At the time, the province said the ban [**IE HARMFUL-PROHIBITION**] was in the best interests of the health of Manitobans [**WRONG !**] and of the environment [**WRONG !**].

But on the campaign trail in 2016, the Progressive Conservatives launched a **REVIEW** of that legislation.

It wrapped that same year, but in 2018, the results still are not in.

While Manitobans wait, they walk past THOUSANDS OF DANDELIONS on city property and in almost every yard in the city.

MANY RESIDENTS HAVE EXPRESSED THEIR FRUSTRATION OVER HAVING TO USE [GREEN ALTERNATIVE] PESTICIDES THEY BELIEVE ARE TOO EXPENSIVE AND NOT EFFECTIVE ENOUGH.

Winnipegger Jeannette Delorme SPENDS HOURS digging up the weeds on her St Vital property every spring and fall, filling entire buckets with dandelions.

According to Delorme —

They're never ending.

They'll come and there's no way you can eradicate it.

Absolutely no way.

Delorme installed a rock garden over her front lawn to help keep the weeds off of her property, but on May 28th, 2018, she was still out with tools making sure all of the dandelions were gone.

According to Delorme —

The weeds are going to take over if you let them, but you just have to keep at it and keep pulling and keep chopping.

It's a lot of elbow grease.

But good news could be on the way for those who want to see less yellow and white this summer — on May 28th, 2018, Minister of Sustainable Development Rochelle Squires said to expect the delayed announcement about pesticides soon.

According to Minister Squires —

We need to talk to retailers, consumer applicators, and to ensure that the environmental integrity is being maintained.

Progress is being made but it's important that we get it right.

The province said it continues to have discussions with various parties and that any modifications to the ban would be carefully considered.

Fact —

**Manitoba Joins The Trend With Over 70
Other Jurisdictions That Have Stopped
Or Rescinded Or Limited Or Have Begun
To Repeal Harmful-Prohibitions**

See below

Response —

Background Information

VICTORY AGAINST MANITOBA'S HARMFUL-PROHIBITION !

Namaste, Manitoba.

Manitoba's harmful-prohibition has forced residents & professionals to rely upon phony & inferior & ineffective green alternative pesticides like Fiesta Herbicide.

Unfortunately, it is impossible to keep Manitoba's urban environment well-maintained, safe, & attractive with Fiesta or any other green alternative.

In fact, Manitoba's harmful-prohibition has wreaked apocalyptic havoc in the form catastrophic ecological carnage & pest disasters, due to urban green spaces becoming weed-infested, insect-damaged, & dangerous garbage dumps.

When the province of Manitoba rescinds prohibition, it will join the **TREND** with over 70 other jurisdictions that have stopped or rescinded or limited or have begun to repeal harmful-prohibitions, or have granted commercial businesses with exception statuses.

Manitoba Joins The Trend Against Harmful-Prohibition

Resuming Pesticide Use

Fact —

**Changes Will Permit The Use Of All
Health-Canada-Registered Products,
& Enhance Protections In Areas
Where Children & Pets Gather**

See below

Media Release —

The Manitoba Conservative government has passed legislation AMENDING the Environment Act **TO GIVE MANITOBANS THE CHOICE TO BE ABLE TO PURCHASE AND USE COSMETIC PESTICIDES ON THEIR LAWNS THAT ARE ALREADY REGISTERED WITH HEALTH CANADA** and, out of an abundance of caution, the list of SENSITIVE AREAS that would be PROTECTED from the application of these products has been EXPANDED , Environment, Climate, and Parks Minister Jeff Wharton announced today.

According to Minister Wharton —

Our government is committed to PROTECTING the environment and we RELY ON SCIENCE to inform the proper use of cosmetic pesticides.

We recognize Health Canada as the FOREMOST EXPERT in this field to evaluate pesticides used in Manitoba.

Pesticides REGISTERED with Health Canada go through a RIGOROUS REVIEW PROCESS that assesses the risk of pesticides to human health, animal health, and the environment, and must meet STRICT HEALTH AND SAFETY MEASURES .

Manitoba will continue to RELY ON HEALTH CANADA to evaluate pesticide products, and all pesticides sold and used in Manitoba must be FEDERALLY-REGISTERED under the Pest Control Products Act.

Manitoba still has the STRICTEST PESTICIDE REGULATIONS among the Prairie provinces by PROHIBITING cosmetic pesticide use in SENSITIVE AREAS , the minister noted.

According to Minister Wharton —

By expanding the list of SENSITIVE AREAS , our government continues to PROTECT CHILDREN AND PETS , while keeping communities safe and minimizing environmental impact.

These PROTECTED AREAS include schools, hospitals, child-care centres, provincial parks, designated municipal picnic areas, playgrounds, and dog parks.

To understand better the experience of Manitobans with previous cosmetic pesticide restrictions, which were put in place in 2015, the Manitoba government launched a PUBLIC CONSULTATION .

More than 60 per cent of respondents indicated restrictions on the sale and usage of pesticides for cosmetic use were TOO STRICT , and over 70 per cent of respondents WANTED RESTRICTIONS REDUCED OR RESCINDED .

Municipalities have reported the previous approach ADDED UNNECESSARY COSTS because of REPEATED APPLICATIONS .

Municipalities and other stake-holders asked for GREATER FLEXIBILITY to have USEABLE AESTHETIC GREEN SPACES in communities, noted Wharton.

The legislation ALLOWS the use of all Health-Canada-REGISTERED cosmetic pesticides in LOW-RISK AREAS like boulevards, sidewalks, right-of-ways, and fairgrounds.

Manitobans will also have the ability to apply all pesticides REGISTERED with Health Canada on their lawns.

According to Kam Blight, president at Association of Manitoba Municipalities —

*The Association of Manitoba Municipalities welcomes the Manitoba government's decision to **ALIGN** with federal regulations and **RIGOROUS REVIEW PROCESSES** at Health Canada.*

*These legislative changes will **ALLOW** municipalities to **EFFECTIVELY MANAGE** weed control programs while **MITIGATING FINANCIAL PRESSURES** on municipal budgets.*

According to Chad Labbe, president at Manitoba Nursery Landscape Association —

*Our **GREEN SPACES CONTRIBUTE TO OUR QUALITY OF LIFE AND PRODUCE ENORMOUS ENVIRONMENTAL BENEFITS**, but are continually threatened by extreme climate conditions and invasive species.*

*It is essential as green industry professionals, that we have **CHOICES** when selecting the best products available to protect these valuable landscapes.*

*The new regulations will encourage innovation and **ALLOW** more options when deciding how to deal with pests that threaten our landscapes.*

Health Canada can initiate a **SPECIAL REVIEW** at any time if and when new research emerges that identifies risks from pesticides where there is reasonable grounds to believe that health or environmental risks, or the value of a pesticide are no longer acceptable, the minister noted.

When using pesticides and chemicals, consumers should follow directions and only use products for intended purposes, the minister added.

Facts —

**Green Spaces Contribute To Our Quality Of Life
& Produce Enormous Environmental Benefits**

**The Green Space Maintenance Professionals
Are The Planet's Great Conservationists**

Response —

Background Information

THE BENEFITS OF GREEN SPACES !

Turfgrasses & ornamental plants are tremendous economic assets that provide vital green spaces that enhance our community's beauty & overall healthy state.

Here are some of the benefits of well-maintained turfgrasses —

- A healthy green space will reduce noise pollution.
- A landscape with healthy trees & lawns will cool & clean the air we breathe.
- A nicely landscaped yard will add value to the property by as much as 25 per cent.
- A thick healthy lawn will prevent soil erosion.
- A vigorous lawn will filter surface water & will return it back to the water table.
- A well-maintained landscape will make us feel good.
- An attractive landscape will be pleasing to the eye.

The golf course superintendents & landscape care professionals are **THE PLANET'S GREAT CONSERVATIONISTS** .

We must promote & defend the green space maintenance industries, whatever the cost may be !

Manitoba Joins The Trend Against Harmful-Prohibition

Resuming Pesticide Use

Fact —

It Is Legal Once Again For Manitobans To Use Cosmetic Pesticides On Their Lawns

See below

Media Report —

IT IS LEGAL ONCE AGAIN FOR MANITOBANS TO USE COSMETIC PESTICIDES ON THEIR LAWNS.

The Manitoba Conservative government has passed legislation **AMENDING** the Environment Act to give Manitobans the **CHOICE** to be able to purchase and use cosmetic pesticides on their lawns.

The pesticides must already be **REGISTERED** with Health Canada.

Environment, Climate, and Parks Minister Jeff Wharton says, out of an abundance of caution, they have also **EXPANDED** the list of **SENSITIVE AREAS** that would be protected from the application of these products.

According to Minister Wharton —

*Our government is committed to **PROTECTING** the environment and we **RELY ON SCIENCE** to inform the proper use of cosmetic pesticides.*

*We recognize Health Canada as the **FOREMOST EXPERT** in this field to evaluate pesticides used in Manitoba.*

*Pesticides **REGISTERED** with Health Canada go through a **RIGOROUS REVIEW PROCESS** that assesses the risk of pesticides to human health,*

*animal health, and the environment, and must meet **STRICT HEALTH AND SAFETY MEASURES** .*

*Manitoba will continue to **RELY ON HEALTH CANADA** to evaluate pesticide products, and all pesticides sold and used in Manitoba must be **FEDERALLY-REGISTERED** under the Pest Control Products Act.*

According to Wharton, Manitoba still has the **STRICTEST PESTICIDE REGULATIONS** among the Prairie provinces by **PROHIBITING** cosmetic pesticide use in **SENSITIVE AREAS** .

According to Minister Wharton —

*By expanding the list of **SENSITIVE AREAS** , our government continues to **PROTECT CHILDREN AND PETS** , while keeping communities safe and minimizing environmental impact.*

*These **PROTECTED AREAS** include schools, hospitals, child-care centres, provincial parks, designated municipal picnic areas, playgrounds, and dog parks.*

To understand better the experience of Manitobans with previous cosmetic pesticide restrictions, which were put in place in 2015, the Manitoba government launched a **PUBLIC CONSULTATION** .

More than 60 per cent of respondents indicated restrictions on the sale and usage of pesticides for cosmetic use were **TOO STRICT** , and over 70 per cent of respondents **WANTED RESTRICTIONS REDUCED OR RESCINDED** .

Municipalities have reported the previous approach added **UNNECESSARY COSTS** because of **REPEATED APPLICATIONS** .

Minister Wharton says municipalities and other stake-holders asked for **GREATER FLEXIBILITY** to have **USEABLE AESTHETIC GREEN SPACES** in communities.

The legislation **ALLOWS** the use of all Health-Canada-**REGISTERED** cosmetic pesticides in **LOW-RISK AREAS** like boulevards, sidewalks, right-of-ways, and fairgrounds.

Manitobans will also have the ability to apply all pesticides **REGISTERED** with Health Canada on their lawns.

According to Kam Blight, president at Association of Manitoba Municipalities —

*The Association of Manitoba Municipalities welcomes the Manitoba government's decision to **ALIGN WITH FEDERAL REGULATIONS** and **RIGOROUS REVIEW PROCESSES** at Health Canada.*

*These legislative changes will **ALLOW** municipalities to effectively manage weed control programs while **MITIGATING FINANCIAL PRESSURES** on municipal budgets.*

Minister Wharton says Health Canada can initiate a **SPECIAL REVIEW** at any time, if and when new research emerges that identifies risks from pesticides where is reasonable grounds to believe that health or environmental risks, or the value of a pesticide is no longer acceptable.

Manitoba Joins The Trend Against Harmful-Prohibition

Reversing Prohibition

Facts —

**It's Going To Be OK To Spray Lawns For
Damaging Pests In Manitoba Again**

**In Ontario, It's Not Scientists, But
Politicians, Who Decide Who Can Use
What Pesticides, When, & Where**

**It Used To Be OK To Spray Golf Course
Lawns For Weeds, But Not Household
Lawns (But Not Anymore)**

See below

Media Report —

IT'S GOING TO BE OK TO SPRAY LAWNS for dandelions, chinch bugs, and grubs in Manitoba again, but there are no signs that Ontario is going to follow suit.

The Manitoba Conservative government said it's not the expert on the pesticides safety — the federal health department's Pest Management Regulatory Agency is.

In 2014, the [RADICAL] Manitoba NDP government banned [IE PROHIBITED] the cosmetic use of pesticides on lawns, parks, and other public spaces.

Now the Conservatives [AKA PC] are REVERSING that, but retaining bans for SENSITIVE AREAS and where there are CHILDREN AND PETS , such as schools, hospitals, child-care centres, and provincial parks.

According to Jeff Wharton, Minister at Environment, Climate, and Parks

*We recognize Health Canada as the **FOREMOST EXPERT** in this field to evaluate pesticides.*

Pesticides REGISTERED with Health Canada go through a RIGOROUS REVIEW PROCESS that assesses the risk of pesticides to human health, animal health, and the environment, and must meet STRICT HEALTH AND SAFETY MEASURES .

Manitoba will continue to RELY ON HEALTH CANADA to evaluate pesticide products and all pesticides sold and used in Manitoba.

IN ONTARIO, IT'S NOT SCIENTISTS, BUT POLITICIANS, WHO DECIDE WHO CAN USE WHAT PESTICIDES, WHEN, AND WHERE.

For example, **IT'S OK TO SPRAY GOLF COURSE LAWNS FOR WEEDS, BUT NOT HOUSEHOLD LAWNS .**

Protecting Children

False-Fact —

The Science Is Clear [?!?!] , Pesticides Are
Harmful To Children's Health [WRONG !]
? ? ? ? ? ? ? ? ?

See below

Media Release —

On Earth Day, the [RADICAL] Manitoba NDP government announced they will delay Bill 22, which would LIFT THE BAN [IE RESCIND PROHIBITION] on harmful [?!?!] chemical pesticides, putting the health of families and the future of sustainable businesses at risk [WRONG !] .

According to [EXTREMIST] NDP critic for the environment and climate change, Lisa Naylor —

Delaying this bill is a no-brainer. [?!?!]

*We are using our power as the Official Opposition to protect **PROTECT CHILDREN** and communities from pesticides. [WRONG !]*

Bill 22, the Environment Amendment Act (Pesticide Restrictions), would REVERSE THE BAN on the use of dangerous [?!?!] chemical pesticides on residential lawns that was first implemented by the NDP in 2014.

The [RADICAL] NDP government bill banned dozens of chemicals from use on residential lawns and the grounds of schools, hospitals and child care centres.

It also mandated pesticide sellers comply with regulations.

The PC's bill would deregulate the sale of pesticides.

Emergency room [EXTREMIST] doctor Paul Doucet commended [?!?!] the NDP for delaying the bill.

According to Doucet —

THE SCIENCE IS CLEAR . [?!?!]

PESTICIDES ARE HARMFUL TO CHILDREN'S HEALTH [WRONG !] *and increases their risk of serious diseases like cancer* [WRONG !] .

I was proud to stand to stand with the NDP in 2014 when they chose to **PROTECT KIDS** [?!?!] *and the health of communities* [?!?!] .

I'm disappointed that this PC government would take such a dangerous [?!?!] *step backwards.*

Local [EXTREMIST] natural cider-maker Jesse Oberman said he opposes the bill because it puts his company at risk [?!?!] .

According to Oberman —

My company relies on foraged fruit from communities.

My business is built on the assumption that this fruit is clean and safe, but the PCs bill puts that at risk. [?!?!]

I'm glad to see the NDP delaying this bill — it's the right thing to do [WRONG !] *to keep people healthy* [?!?!] *and support local organic businesses* [?!?!] *like mine.*

NDP [EXTREMIST] leader Wab Kinew argued that the PC bill goes against the will of Manitobans.

According to Kinew —

I know Manitobans want to make our province cleaner and healthier — this bill sets us back [WRONG !] .

It's **BAD FOR KIDS** [WRONG !] *and families* [WRONG !] *and bad for small business* [WRONG !] .

[CHILDREN ARE NOT AT RISK !]

Our team [IE THE RADICAL NDP] is committed to building a brighter future for everyone in Manitoba.

That means we have to limit the use of harmful chemicals [?!?!] and help families, businesses and consumers make cleaner choices [?!?!] .

Fact —

**The Science Shows That Pesticides Used
In The Urban Landscape Will Selectively
& Effectively Control Disease, Insect, &
Weed Pests, But Are Completely Safe
For Other Non-Target Organisms**

See below

Response —

Background Information

THE SCIENCE SHOWS PESTICIDES ARE SELECTIVE & SAFE !

Pest control products used in the urban landscape will **SELECTIVELY & EFFECTIVELY** control disease, insect, & weed pests, but are completely safe for other non-target organisms — they do not injure turfgrasses, & have no persistence beyond season of use.

These products can be **USED SAFELY** because the amount required to affect human health is significantly higher than any potential level of exposure.

The concept that a low level of exposure to a substance will not adversely affect human ties directly into the fundamental principle of toxicology — the study of negative effects on living systems — that « *THE DOSE MAKES THE POISON* » .

People are exposed daily to numerous man-made & natural substances that may impact human health, but will cause **NO HARM** in small doses (example, low levels of naturally-occurring cyanide in almonds), & conversely, ordinary harmless substances that can be highly toxic or deadly if not used properly or over-consumed (example, water).

The risks of pest control products are extensively assessed by Health Canada & by US Environmental Protection Agency (**US EPA**) to ensure that they are **SCIENTIFICALLY-SAFE** when used properly.

Fact —

Pesticides Represent No-Actual-Risk-Of-Harm To Children

See below

Response —

Background Information

CHILDREN ARE NOT AT RISK !

No one needs to worry about children, & even pets, playing on pesticide-treated grass.

This is because all pest control products are federally-approved, scientifically-safe, practically-non-toxic, & will cause no harm, even to children, & even to pets.

They represent no-actual-risk-of-harm.

It is a myth that children, & pets, are somehow at greater risk from exposure than adults because they play closer to the ground & their bodies are still developing.

According to Health Canada & US EPA, there are no unacceptable risks for children & pets.

The safety assessments of pest control products by Health Canada & US EPA **DO** take children & pets into consideration.

These assessments **DO** consider children's & pet's physiology, behaviours, & habits while playing on treated grass.

Typically, for all pest control products needed for professional lawn care maintenance, the government-approved labels state « *KEEP PEOPLE OFF TREATED AREA UNTIL FOLIAGE IS DRY* » .

The same can be said for the vast majority of pest control products needed to protect golf courses.

Evidence About The Safety Of Pesticides**

See below

Media Release —

Manitoba needs to follow good science and not give into ideological environmentalists who value knee-jerk emotionalism over positive outcomes.

Case in point is the province's **SENSIBLE DECISION** to **LIFT THE BAN [IE RESCIND PROHIBITION]** , at least partially, on cosmetic pesticides passed by the previous **[RADICAL]** NDP government back in 2014.

Cosmetic pesticides are pesticides used to control weeds and make private lawns and grassy areas visually appealing.

The current Conservative government **INTENDED TO LIFT THE BAN** on cosmetic pesticides on private lawns and some other designated municipal parks and fields.

Its bill would have continued to ban pesticides around schools, child-care centres, hospitals, municipal playgrounds, and provincial parks.

The **[RADICAL]** opposition NDP used its legislative privileges to delay the bill until the fall session as they are permitted to do so for a handful of bills.

However, one wonders why the **[RADICAL]** opposition NDP would not meet the government half-way given that the government's bill was a compromise.

So, from a **[RADICAL]** opposition NDP perspective, they would still be receiving significant concessions from the government for their side.

On the areas where the ban would be lifted, there is still a requirement that pesticides would have to be chemical products **APPROVED** by Health Canada.

Thus, there is a safeguard to ensure any chemicals would be **APPROVED** by Canada's main health regulator to **PROTECT** health and environment.

Why is the **[RADICAL]** opposition NDP **NOT TRUSTING** the scientists and regulators at Health Canada ?

Doubtless, they trust them in many other areas when it comes to health of Canadians.

So, why is the **[RADICAL]** opposition NDP willing to die on this hill ?

Despite the popularity of cosmetic pesticide bans **[IE PROHIBITION]** across Canada, **A COMPREHENSIVE SCAN OF SCIENTIFIC REVIEWS** **[BY OCFP'S LITERATURE REVIEW ?!?!]** shows the negative link **[WRONG !]** between these pesticides and human health and environment to be **VERY INCONCLUSIVE AND TENUOUS** at best **[?!?!]**.

If there were significant effects, Health Canada would not even be approving certain products for use on lawns.

So, there is **NO COMPELLING POLICY RATIONALE** for a broad-based ban **[IE PROHIBITION]** on cosmetic pesticides.

It is a pet cause among [RADICAL] ideological environmentalists who often adopt positions that involve PLACING THE **PRECAUTIONARY PRINCIPLE** ON STEROIDS .

They have an ABSOLUTIST POSITION ON CHEMICALS THAT IS ABOUT EMOTION NOT SCIENCE .

Dying on this hill is a concession to the ideological environmentalist wing of the [RADICAL] provincial NDP, and is also a concession to a tiny handful of fearful businesses who worry pesticides will affect their livelihood, and to good old-fashioned **NIMBYISM** at its finest.

[**NIMBYISM** — the practice of objecting to something that will affect one or take place in one's locality.]

People worried — without empirical data — that what you are doing on your lawn will affect their children.

The [RADICAL] opposition NDP is also taking advantage of a HEIGHTENED CLIMATE OF FEAR over health engendered by the pandemic policy environment.

Fact —

**Precautionary Principle Is Absolutist,
Misused, Vacuous, & Is Simply Another
Malicious Weapon Of Pesticide-Hating
Doctrine & Science-Hating Fanaticism
Concocted By Anti-Pesticide Extremists**

See below

Response —

Background Information

INVALIDATED PRECAUTIONARY PRINCIPLE !

Manitoba's anti-pesticide version of the so-called **PRECAUTIONARY PRINCIPLE** is absolutist, misused, vacuous, & is simply another malicious weapon of pesticide-hating doctrine & science-hating fanaticism concocted by anti-pesticide extremists.

As everyone knows, relying upon the **PRECAUTIONARY PRINCIPLE** is worthless.

Better safe than sorry ?!?!

Really ?!?!

The sacred **PRECAUTIONARY PRINCIPLE** is also known as the do-nothing principle.

Those that do-nothing need not worry about ever taking a risk or ever making a mistake.

The **PRECAUTIONARY PRINCIPLE** was intended for use where science does not exist.

Unfortunately, the **PRECAUTIONARY PRINCIPLE** is mis-used to serve the ambitions of anti-pesticide & environmental-extremists.

It has been **INVALIDATED** .

Fact —

OCFP's Literature Review Showing A Negative Link Between Pesticides & Human Health & Environment Is Very Inconclusive & Tenuous At Best

See below

Response —

Background Information

OCFP'S LITERATURE REVIEW !

In 2004, Ontario College of Family Physicians (OCFP) **CONSPIRED** with many other environmental-extremist organizations to **CONCOCT** a « **LITERATURE REVIEW** » designed to **ATTACK & DISCREDIT** Health Canada & its approval of conventional pest control products.

OCFP is a mere trade association — it is **NOT** a science, **NOT** a research, & **NOT** a health organization.

OCFP's « **LITERATURE REVIEW** » consisted of a mere **140 STUDIES** that have somehow been withheld from the entire world [?!?!] .

OCFP **CHERRY-PICKED** a handful of studies which were **VALUELESS** .

In defiance of OCFP, **INDISPUTABLE & CONCLUSIVE SCIENTIFIC RESEARCH** shows that, as reported through Health Canada's **VAST TOXICOLOGY DATABASE** , **NO HARM WILL OCCUR** when pest control products are used according to label directions.

For example, pest control products like 2,4-D herbicide have been the subject of over **40,000 STUDIES** .

2,4-D is probably **THE MOST STUDIED & BEST UNDERSTOOD** of any chemical — not just pesticide — in existence.

Furthermore, since 1988, The Industry Task Force II on 2,4-D Research Data has submitted to US Environmental Protection Agency (US EPA) over **250 STUDIES** concerning mammalian & environmental toxicology, environmental fate & residues.

Additionally, the **SCIENTIFIC-ASSESSMENT** of pest control products indicate that they will **NOT CAUSE HARM TO PEOPLE, ANIMALS, OR THE ENVIRONMENT** — they are **SCIENTIFICALLY-SAFE** when used properly in the urban landscape.

In fact, there is **NOT ONE KNOWN ILLNESS & NOT ONE DEATH** from the proper use of pest control products used in urban landscape.

OCFP'S « **LITERATURE REVIEW** » **WAS NOT A SERIOUS SCIENTIFIC ASSESSMENT** — & has been **INARGUABLY DISCREDITED** as a mere **HATE-ASSESSMENT** against Health-Canada-approved products.

Alternatives Like Fiesta Herbicide In Much
Higher Quantities To Have Any Effect —
Causing More Environmental Hazards**

See below

Media Release —

As a result of this shotgun marriage of convenience between environmental ideologues, frightened business interests, and scared suburbanites, municipalities across Manitoba are facing **SKY-ROCKETING COSTS FROM USING INEFFECTIVE AND PRICEY CHEMICALS [IE GREEN ALTERNATIVES LIKE FIESTA HERBICIDE]** to control noxious weeds and beautify their communities.

In fact, this policy ironically might have unintended consequence of **DAMAGING THE ENVIRONMENT MORE** by forcing municipalities to use **INEFFECTIVE CHEMICAL PRODUCTS [AKA GREEN ALTERNATIVES LIKE FIESTA HERBICIDE] IN MUCH HIGHER QUANTITIES TO HAVE ANY EFFECTS — CAUSING MORE ENVIRONMENTAL HAZARDS** than the original [IE CONVENTIONAL PRODUCT] which would have been allowed with the use of Health-Canada-approved chemicals.

But environmentalists, and political parties beholden to environmentalists, **IGNORE UNINTENDED CONSEQUENCES IN THEIR POLICY CALCULUS** .

THEY VALUE SYMBOLIC POLITICS AND EMOTIONALISM OVER GOOD OUTCOMES .

As soon as possible, **THE MANITOBA GOVERNMENT MUST RE-INTRODUCE THE BILL AND SIDE WITH SENSIBLE, FACT-BASED POLICY** .

Fact —

The Vast Majority Of Fiesta Users Overwhelmingly Condemn It As Inferior

See below

Response —

Background Information

FAILURE OF FIESTA GREEN ALTERNATIVE !

Fiesta herbicide is a PHONY, INFERIOR, INEFFECTIVE, & STUNNINGLY EXPENSIVE GREEN ALTERNATIVE PESTICIDE that is somehow expected to replace three-way conventional phenoxy turf herbicides, such as Killex, Par III, & others that contain the active ingredient 2,4-D.

Only the use of conventional herbicides has been shown to be effective against broad-leaved weeds — & not Fiesta — their applications are NO-RISK, LOW-RATE, SAFE, & EFFECTIVE .

By comparison, Fiesta is PHONY & INFERIOR & INEFFECTIVE & EXORBITANT when compared to single-applications of three-way herbicides that contain 2,4-D.

The vast majority of Fiesta users OVERWHELMINGLY CONDEMN IT .

In fact, quite often, observers believe it would be better to do NOTHING rather than use Fiesta herbicide.

Fiesta herbicide (aka Scotts EcoSense & Weed-B-Gon) is a primary reason for the REPEATED FAILURES of provincial & municipal PROHIBITIONS imposed against conventional pest control products used in the urban landscape.

With the adoption of these RECKLESS, ARBITRARY, & DOOMED-TO-FAIL PROHIBITIONS , professionals & residents are being forced to rely on this INFERIOR green alternative herbicide.

In order to validate their **PROHIBITIONS** , government officials have been perpetuating the fake-news myth that a single application of Fiesta herbicide, a **PHONY & INFERIOR & INEFFECTIVE & EXORBITANT** green alternative herbicide, can successfully replace conventional products such as Killex & Par III.

This is **WRONG** !

In fact, Fiesta **CANNOT** be used to validate **ANY** prohibition.

Fiesta is **INFERIOR** !

National Organization Responding Against HUIE that conspire to destroy the Green space and other Industries (NORAHG)

Background Information

The Real Trends

**There Are Real Trends Against Reckless,
Arbitrary, & Doomed-To-Fail Prohibitions**

The Complete Media History

Summary —

Government officials are no longer readily jumping in favour of RECKLESS, ARBITRARY, & DOOMED-TO-FAIL PROHIBITIONS .

It is clear that pesticide-hating fanatics conspire to impose HARMFUL-PROHIBITIONS in order to DESTROY our urban green space environments, such as PLAYING SURFACES used by CHILDREN .

According to government officials, PROHIBITION will make green spaces AESTHETICALLY DIFFERENT .

In other words, residents had better get used to living in an urban landscape that LOOKS LIKE A PEST-INFESTED & DANGEROUS GARBAGE DUMP .

In essence, residents have been told to PUT-UP-&-SHUT-UP !

Unfortunately, it is IMPOSSIBLE to keep PLAYING SURFACES well-maintained, safe, & attractive without conventional pest control products.

Without these products, PLAYING SURFACES are DESTROYED — they become thin & yellow, invaded by weeds, & infested with insects.

With HARMFUL-PROHIBITIONS , the safety & appearance of PLAYING SURFACES are jeopardized with CATASTROPHIC ECOLOGICAL CARNAGE & PEST DISASTERS due to uncontrolled & dangerous insects like white grubs, & from invasive & dangerous weeds like dandelions.

With weed invasions & insect infestations, safe turf **PLAYING SURFACES** are **DESTROYED** — **CHILDREN** are at **HIGH-RISK** of slipping & tripping & becoming seriously hurt.

In essence, pest control products prevent harm & keep **CHILDREN** safe from injuries.

There are over **70** jurisdictions that have **STOPPED** or **RESCINDED** or **LIMITED** or have begun to **REPEAL HARMFUL-PROHIBITIONS** , or have granted commercial businesses with an **EXCEPTION STATUS** .

Locations —

The following jurisdictions have joined the **REAL TRENDS** against **RECKLESS, ARBITRARY, & DOOMED-TO-FAIL PROHIBITIONS** ...

• Alberta (Province) • Altona (Manitoba) • Anne Arundel County (Maryland) • Ashland (Oregon) • Beaumont (Alberta) • Belleville (Ontario) • Brazil (see notes below) • British Columbia (BC, Province) • Burnaby (BC) • Calgary (Alberta) • California (State - see notes below) • Campbell River (BC) • Charlottetown (Prince Edward Island) • Chicago (Illinois) • Coquitlam (BC) • Deer Lake (Newfoundland) • Delta (BC) • Durango (Colorado) • Edmonton (Alberta) • European Union (EU, nations of - see notes below) • Everett (Washington) • Gibsons (BC) • Golden (BC) • Guelph (Ontario) • Guelph-Eramosa (Ontario) • Hudson (Quebec - see notes below) • Kamloops (BC) • Kaua'i County (Hawai'i) • Kelowna (BC) • Lawrence (Kansas) • Lincoln City (Oregon) • Maine (State) • Manitoba (Province - see notes below) • Merritt (BC) • Montgomery County (Maryland - see notes below) • New Brunswick (Province) • Newfoundland (Province) • Ontario (Province - see notes below) • Parksville (BC) • Port Alberni (BC) • Portage La Prairie (Manitoba) • Prince Edward Island (Province) • Qualicum Beach (BC) • Quebec (Province - see notes below) • Regina (Saskatchewan) • Revelstoke (BC) • Rossland (BC) • Saanich (District of, BC) • Saint John's (Newfoundland) • Saint Josephine (Oregon) • Salmon Arm (BC) • Saskatchewan (Province) • Scarborough (Maine) • Steinbach (Manitoba) • Stratford (Prince Edward Island) • Stuartburn (Manitoba) • Summerside (Prince Edward Island) • United Kingdom (UK - see notes below) • USA (see notes below) • Vancouver (BC) • Vernon (BC) • Winkler (Manitoba)

Notes —

- ALTONA, MANITOBA — Municipal Government Has Opposed Manitoba's Provincial Prohibition
- BRAZIL — Brazil's Anvisa Health Agency Has Said That Glyphosate Does Not Pose A Hazard To The Average Person
- BRITISH COLUMBIA — Proposed Provincial Prohibition Has Been Stopped — Prohibition Was Not Recommended By Special Committee On Cosmetic Pesticides — Professional Lawn Care Businesses & Golf Facilities Have Been Granted Exception Statuses
- CALIFORNIA — Golf Course Has Been Saved After A Federal Judge Dismissed A Legal Challenge
- EDMONTON, ALBERTA — Edmonton Has Resumed Its Use Of Conventional Herbicides That Are No-Risk, Safe, & Effective — Getting Rid Of Inferior Fiesta Green Alternative Herbicide Proved That Edmonton's Doomed-To-Fail Prohibition Against Conventional Weed Control Products Was A Dismal Failure
- EUROPEAN UNION — Glyphosate Has Been Re-Approved For Several Years
- HUDSON, QUEBEC — Existing Prohibition Has Been Morally Invalidated Since Several Government Officials Who Were Responsible For Prohibition Are Now Facing Charges Of Fraud, Corruption, & Tax-Evasion
- MANITOBA — Provincial Prohibition Has Been Reversed
- MONTGOMERY COUNTY, MARYLAND — A Pesticide Ban Exception Status Has Been Provided To County-Owned Properties — It Is Illegal To Apply Pesticides On Private Lawns & At Childcare Facilities — Officials Cannot Ever Foresee A Day When All Green Spaces Will Be Pesticide-Free
- NEW BRUNSWICK — Existing Provincial Prohibition Has Been Limited — Several Active Ingredients Have Been Permitted, Except 2,4-D — Professional Lawn Care Businesses Have Been Granted Exception Status
- NEWFOUNDLAND — Existing Provincial Prohibition Has Only Been Limited — Several Active Ingredients Have Been Permitted, Except 2,4-D, Mecoprop, Dicamba, MCPA, & Carbaryl — Commercial Applicators Have Been Granted Exception Status — A Pesticide Ban Exception Status Has Been Provided To Industries Like Golf, Forestry, Agriculture, & Road-Related Usage — These Industries Employ The Very Same Pest Control Products Otherwise Prohibited For The Modern Professional Lawn Care Industry
- ONTARIO — A Pesticide Ban Exception Status Has Been Provided To Industries Like Golf, Sports Fields, Specialty Turf, Cemeteries, Forestry, & Agriculture — These Industries Employ The Very Same Pest Control Products Otherwise Prohibited For The Modern Professional Lawn Care Industry
- ONTARIO — Proposed Amendment To Provincial Pesticide Ban Has Begun The Process To Repeal Provincial Prohibition — Ontario Has Harmonized Its Pesticides Classes With The Federal Government's Existing Categories
- PORT ALBERNI, BRITISH COLUMBIA — Municipal Prohibition Has Been Rescinded — The Use Of Conventional Herbicides Like Roundup Has Been Resumed On Ball Diamonds & Hard Surface Areas — Fiesta Green Alternative Herbicide Was A Dismal Failure — Inferior Fiesta Herbicide Became An Example Of The Stuningly Exorbitant Cost Of Organic Pesticide-Free Maintenance
- PORTAGE LA PRAIRIE, MANITOBA — Municipal Government Has Opposed Manitoba's Provincial Prohibition
- PRINCE EDWARD ISLAND — Existing Provincial Prohibition Has Only Been Limited — Several Active Ingredients Have Been Permitted, Except 2,4-D — Professional Lawn Care Granted Exception Status
- QUEBEC — Existing Provincial Prohibition Has Only Been Limited — Existing Prohibition Invalidated — Ban Defeated By Lawsuit — Several Active Ingredients Permitted, Except 2,4-D — Existing Provincial Prohibition Morally Invalidated — Ban Defeated By Lawsuit
- SASKATCHEWAN — Proposed Provincial Prohibition Against Neonicotinoids Has Been Stopped
- STEINBACH, MANITOBA — Municipal Government Has Opposed Manitoba's Provincial Prohibition

- STUARTBURN, MANITOBA — Municipal Government Has Opposed Manitoba's Provincial Prohibition
- UNITED KINGDOM — Has Suspended European Union Prohibition Against Neonicotinoid Insecticides
- USA — A Vast Majority Of States Have Legislated Pre-Emption Laws — Virtually All Proposed Prohibitions Have Been Stopped
- WINKLER, MANITOBA — Municipal Government Has Opposed Manitoba's Provincial Prohibition

Norah GFON

**All bad pesticide-hating extremism
must come to an end**

FORCE OF NATURE || DARING TO DEFEAT BY EMBRACING THE WHOLE TRUTH FROM AN INDEPENDENT PERSPECTIVE
National Organization Resisting Against PEST that conspires to destroy the green space & other industries (NORANCE)

About NORAHG

VICTORIES

Against Anti-Pesticide Terrxrists

VICTORIES AGAINST ANTI-PESTICIDE TERRXRISTS is a series destined for the green space industry, across Canada, the United States, & overseas, & can be found on [The Pesticide Truths Web-Site](#) .

VICTORIES AGAINST ANTI-PESTICIDE TERRXRISTS is a series committed to SOUND SCIENCE, as well as ground breaking original KNOWLEDGE that informs, entertains, & creates real change.

All KNOWLEDGE, excerpts, & pictures contained in VICTORY AGAINST ANTI-PESTICIDE TERRXRISTS were retrieved from the Internet, & may be considered in the public domain.

The KNOWLEDGE presented in VICTORIES AGAINST ANTI-PESTICIDE TERRXRISTS is for preliminary planning.

Before making a final decision, the turf manager is expected to obtain trusted expert KNOWLEDGE from extension specialists, local distributors and / or agronomists.

All decisions must take into account the prevailing growing conditions, the time of year, & the established management practices.

All products mentioned in VICTORIES AGAINST ANTI-PESTICIDE TERRXRISTS should be used in accordance with the manufacturer's directions, & according to provincial, state, & federal law.

For the official advantages, benefits, features, precautions, & restrictions concerning any product, the turf manager must rely only on the information furnished by the manufacturer.

The mention of trade names does not constitute a guarantee or a warranty.

Here Is A Look At Mr Gathercole's Astonishing Career

FIELDS OF UNIVERSITY STUDY — • Crop, Horticulture, & Turfgrass Sciences • Mathematics & Physics • Minor in Business Administration.

ALMA MATERS — • McGill University • University of Guelph • the first person ever to obtain bachelors of science degrees & contribute directly to both the professional lawn care & golf maintenance industries.

EXPERTISE — • turf & ornamental maintenance & troubleshooting • history of the green space industry • sales & distribution of seeds, chemicals, fertilizers, & equipment • fertilizer manufacturing & distribution • environmental issues & pesticide-hating extremism.

NOTABLE ACTIVITIES — • worked in virtually all aspects of the green space industry, including golf maintenance, professional lawn care, tree & shrub care, distribution, environmental compliance,

government negotiations, policy-making, public affairs lobbying, & workplace safety • the supervisor, consultant, & programmer for the successful execution of hundreds-of-thousands of management operations in the golf course & urban landscape, as well as millions of pest control applications • the advisor, instructor, & trainer for thousands of turf & ornamental managers & technicians • the pesticide certification instructor for thousands of industry workers • a founder of the modern professional lawn care industry • the prolific writer for industry publications, reports, & blogs • the first to confirm the invasion of European Chafer insects in both the Montreal region & the Vancouver / Fraser Valley region • with Dr Peter Dernoeden, the first to confirm the presence of Take All Patch as a disease of turf in Eastern Canada • with Dr David Shetlar, the first to confirm the presence of Kentucky Bluegrass Scale as an insect pest in south-western Ontario, & later, in the Montreal & Vancouver regions.

TRIBUTES — *Thanks for what you did for me as a turf manager. I have the highest respect for your knowledge and what you did for all the supers in Quebec. Endless hours of research I must say.* — From [Mr Douglas Meyer](#), who served as the President of Canadian Golf Superintendents Trade Association (CGSA), & the expert-golf-course-manager responsible for obtaining & retaining the Certified Audubon Co-operative Sanctuary Status at Beaconsfield Golf Club in Quebec. *I do acknowledge that these accolades also are due to both you and Otto and yourself as you both mentored me. I followed both your footsteps.* — From [Mr Don Gordon](#), who was a saviour & one of the heroes of the Canadian green space maintenance industry. He was office manager, & later, vice-president of operations at OJ Company in Quebec.

SPECIAL CONTRIBUTIONS — • the creator of the PESTICIDE BAN EXCEPTION STATUS that allowed the golf industry to avoid being subjected to anti-pesticide prohibition for a generation • the creator of the signs that are now used for posting after application • the co-founder of annual winter convention for Quebec golf course superintendents • the founder of the first ever Turf Summit with guest, the great communicator, [Dr Jack L Eggens](#) • the major influence in the decision by the [Canadian Cancer Society](#) to stop selling-for-profit fresh pesticide-treated daffodils • the only true reliable witness of the events of anti-pesticide prohibition in the town of Hudson, Quebec, with the wicked old clown witch, [June Irwin](#) • the founder (now retired) of the FORCE OF NATURE series of reports & blogs.

NOTABLE AWARD — • the first man-of-the-year for contributions leading to the successful founding of the Quebec professional lawn care trade association, which served as a beach-head against PESTICIDE-HATING EXTREMISTS in the 1980s & 1990s.

LEGACIES — Mr Gathercole & his colleagues ... • designed & implemented strategies that reined-in PESTICIDE-HATING EXTREMISTS & provided peace & prosperity for the entire modern green space industry for a generation • orchestrated legal action against PESTICIDE-HATING EXTREMISTS in the town of Hudson, Quebec • launched the largest founding professional lawn care business in the nation • quadrupled the business revenues of one of the largest suppliers in the nation.

Mr Gathercole is now retired, although his name continues to appear as the founder of the FORCE OF NATURE series of reports & blogs.

We Speak The Whole Truth From An Independent Perspective

We dare to defy by exploring the whole truth from an independent perspective on [The Pesticide Truths Web-Site](#) .

We are the NATIONAL ORGANIZATION RESPONDING AGAINST HUJE that conspire to destroy the GREEN space & other industries (NORAHG). As a non-profit & independent organization, we are environmentalists who are dedicated to reporting about truth-challenged subversive-fanatics (HUJE)

who conspire to destroy businesses that are dependent on the use of safe & effective conventional pest control products. We also report on the work of several highly-rated leading [REAL EXPERTS](#) who have recognized expertise, training, & background in matters concerning pest control products, & who promote environmental realism & pesticide truths.

NORAHG produces [VICTORIES AGAINST ANTI-PESTICIDE TERRKRISTS](#), a series of reports & blogs providing UP-TO-DATE KNOWLEDGE on issues such as — • [Communities Are Rescinding Prohibitions](#) • [Madison, Wisconsin, Violated Its Own Pesticide Policies](#) • [Municipal Prohibition Failures In British Columbia](#) • [Our Children Are Safe When Pesticide Bans Are Stopped](#) • [Prohibition By-Laws In British Columbia](#) • [Real Trends Against Anti-Glyphosate Terrkrism](#) • [Society Must Be Liberated From Anti-Pesticide Occupation](#) • [The Public Does Not Want Pesticide Bans](#) • [Victories Against Prohibitions](#).

NORAHG also produces FORCE OF NATURE, which dares to defy the pesticide-hating fanabxcs by exploring the whole truth from an independent perspective on [The Pesticide Truths Web-Site](#) .

If you wish to receive free reports & blogs on issues that concern you, please contact us at ... force.of.de.nature@gmail.com WILLIAM H GATHERCOLE AND NORAH G

We are the NATIONAL ORGANIZATION RESPONDING AGAINST HUJE that conspire to destroy the GREEN space & other industries (NORAHG).

We dare to defy by exploring the whole truth from an independent perspective on [The Pesticide Truths Web-Site](#) .
